**Samuel Colt's Submarine Battery** Philip K. Lundeborg,1974 **Smithsonian studies in history and technology**,1974 Monthly Catalog of United States Government Publications ,1975-09 **Monthly Catalog of United States Government Publications, Cumulative Index** United States. Superintendent of Documents,1976 **The Russian Rockefellers** Robert W. Tolf,2020-03-24 The name of Nobel usually calls to mind Alfred Nobel inventor of dynamite and the internationally prestigious prizes that bear his name But Alfred was only one member of a creative and innovative family who built an industrial empire in prerevolutionary Russia The saga begins with an emigr from Sweden Immanuel Nobel who was an architect a pioneer producer of steam engines and a maker of armaments including the underwater mines that were widely used in the Crimean War Immanuel s sons included Alfred Robert who directed the family s activities in the Caspian oil fields and Ludwig an engineering genius and manufacturing magnate whose boundless energy and fierce determination created the Russian petroleum industry Ludwig s son Emanuel showed similar mettle shrewdly bargaining with the Rothschilds for control of the Russian markets and competing head on with Standard Oil Royal Dutch and Shell for lucrative world markets Emanuel not only expanded the Russian oil industry but also helped to modernize the Russian navy and commanded a fleet of three hundred ships Perhaps no family in history has played so decisive a role in building an industrial empire in an underdeveloped but resource rich nation Yet the achievements of the Nobel family have been largely forgotten When the Bolsheviks came to power the empire which had taken eighty years to design and build was nearly destroyed bringing a sudden and bitter end to one of the most remarkable industrial odysseys in world history American Civil War Spencer C. Tucker,2013-09-30 This expansive multivolume reference work provides a broad multidisciplinary examination of the Civil War period ranging from pre Civil War developments and catalysts such as the Mexican American War to the rebuilding of the war torn nation during Reconstruction The Civil War was undoubtedly the most important and seminal event in 19th century American history Students who understand the Civil War have a better grasp of the central dilemmas in the American historical narrative states rights versus federalism freedom versus slavery the role of the military establishment the extent of presidential powers and individual rights versus collective rights Many of these dilemmas continue to shape modern society and politics This comprehensive work facilitates both detailed reading and quick referencing for readers from the high school level to senior scholars in the field The exhaustive coverage of this encyclopedia includes all significant battles and skirmishes important figures both civilian and military weapons government relations with Native Americans and a plethora of social political cultural military and economic developments The entries also address the many events that led to the conflict the international diplomacy of the war the rise of the Republican Party and the growing crisis and stalemate in American politics slavery and its impact on the nation as a whole the secession crisis the emergence of the total war concept and the complex challenges of the aftermath of the conflict Gun Barons John Bainbridge, Jr.,2022-05-24 John Bainbridge

Jr s Gun Barons is a narrative history of six charismatic and idiosyncratic men who changed the course of American history through the invention and refinement of repeating weapons Love them or hate them guns are woven deeply into the American soul Names like Colt Smith Wesson Winchester and Remington are legendary Yet few people are aware of the roles these men played at a crucial time in United States history from westward expansion in the 1840s through the Civil War and into the dawn of the Gilded Age Through personal drive and fueled by bloodshed they helped propel the young country into the forefront of the world s industrial powers Their creations helped save a nation divided while planting seeds that would divide the country again a century later Their inventions embodied an intoxicating thread of American individualism part fiction part reality that remains the foundation of modern gun culture They promoted guns not only for the soldier but for the Everyman and also made themselves wealthy beyond their most fevered dreams Gun Barons captures how their bold inventiveness dwelled in the psyche of an entire people not just in the minds of men who made firearm fortunes Whether we revere these larger than life men or vilify them they helped forge the American character

**Proceedings of the Technology and the Mine Problem Symposium** Albert M. Bottoms, Barbara Honegger, 1996 *Industrializing Antebellum America* B. Tucker, 2016-04-30 This book explores the rise of manufacturing through the beliefs and practices of key industrialists and their families exploring how they represented the diverse possibilities for the organization of a new industrial society

**The Development of Mine Warfare** Norman E. Youngblood, 2006-06-30 In 1997 the International Campaign to Ban Landmines ICBL coordinated the Convention on the Prohibition of the Use Stockpiling Production and Transfer of Anti Personnel Mines and on their Destruction As of mid 2005 145 states had signed the agreement The ICBL s efforts were in large part a response to the careless use of landmines in the previous fifty years The history of mine use in warfare however goes back much further than the World Wars of the 20th century and includes both land and sea use This first comprehensive study traces the technical tactical and ethical developments of mine warfare from ancient times to the present Beginning with mine warfare s roots in ancient Assyria and China Youngblood takes the reader through the centuries of debate about how these hidden weapons should be used A look at 19th century developments explores the intertwined development of land and sea mines and the inventors behind them including Robert Fulton Samuel Colt and Immanuel Nobel father of Alfred Nobel Subsequent chapters examine the use of mines in the American Civil War the Russo Japanese War both World Wars and the battlefields of the Cold War and chart key battles and technical innovations such as the development of air delivered munitions Finally the author addresses the ethical concerns raised by the careless mining namely the impact on civilians and the difficulties of de mining and the treaties that regulate landmine use

**Shielding the Republic** Robert Stanton Browning,1981 [Devil's Right Hand](#) M. William Phelps,2013-09-03 The Devil s Right Hand chroniclesthe legacy of death and destruction in the gunmaking Colt family during the nineteenth century a legacy largely remembered for a lurid murder case that inspired Edgar Allan Poe s story The Oblong Box but one that encompassed much more New York Times and nationally bestselling author M William Phelps reveals an unfathomable pattern surrounding repeating arms inventor Samuel Colt from the death of all his children including Sam s sea captain son s mysterious demise aboard his yacht to the eccentric life of his widow But the tip of this iceberg was the 1841 42 murder case of brother John C Colt one of New York s most sensational scandals Printer Samuel Adams went to collect a debt from bookkeeper and author John Colt and was never seen alive again Shocking revelations followed Did John shoot Adams with one of his brother s Colt firearms before hacking him up and packing him in an oblong box Did Sam Colt invent the revolving pistol or steal the idea Part historical true crime part family biography and cultural history The Devil s Right Hand is a stirring narrative about a darkly cursed American dynasty [Improvised Explosive Devices](#) James Revill,2016-07-15 This book begins with an account of the evolution of improvised explosive devices using a number of micro case studies to explore how and why actors have initiated IED campaigns how new and old technologies and expertise have been exploited and how ethical barriers to IED development and deployment have been dealt with It proceeds to bring the evidence from the case studies together to identify themes and trends in IED development before looking at what can realistically be done to mitigate the threat of IEDs in the new wars of the twenty first century The book suggests that the advance and availability of a combination of technological factors in conjunction with changes in the nature of contemporary conflicts have led to the emergence of IEDs as the paradigmatic weapons of new wars However their prevalence in contemporary and future conflicts

is not inevitable but rather depends on the willingness of multiple sets of actors at different levels to build a web of preventative measures to mitigate if not eradicate IED development and deployment The Journal of Military History ,2008-07 **Damn the Torpedoes** Tamara Moser Melia,1991 Network Nation Richard R. John,2015-10-05 The telegraph and the telephone were the first electrical communications networks to become hallmarks of modernity Yet they were not initially expected to achieve universal accessibility In this pioneering history of their evolution Richard R John demonstrates how access to these networks was determined not only by technological imperatives and economic incentives but also by political decision making at the federal state and municipal levels In the decades between the Civil War and the First World War Western Union and the Bell System emerged as the dominant providers for the telegraph and telephone Both operated networks that were products not only of technology and economics but also of a distinctive political economy Western Union arose in an antimonopolistic political economy that glorified equal rights and vilified special privilege The Bell System flourished in a progressive political economy that idealized public utility and disparaged unnecessary waste The popularization of the telegraph and the telephone was opposed by business lobbies that were intent on perpetuating specialty services In fact it wasn't until 1900 that the civic ideal of mass access trumped the elitist ideal of exclusivity in shaping the commercialization of the telephone The telegraph did not become widely accessible until 1910 sixty five years after the first fee for service telegraph line opened in 1845 Network Nation places the history of telecommunications within the broader context of American politics business and discourse This engrossing and provocative book persuades us of the critical role of political economy in the development of new technologies and their implementation *Civil War Torpedoes and the Global Development of Landmine Warfare* Earl J. Hess,2023-01-30 Civil War Torpedoes and the Global Development of Landmine Warfare recounts the use of landmines in the American Civil War from their predecessors before 1861 through their legacy in the post Cold War era A handful of Confederates pioneered the use of torpedoes as landmines were commonly called in the 1860s burying them in front of fortifications along roads and as booby traps Federal troops quickly learned how to deal with them often using Confederate prisoners to dig them up The first doctrine of landmine use in global history appeared during the Civil War Hess discusses not only the technical and tactical aspects of the Civil War torpedo but the morality and doctrine that surrounded this weapon in ways that illuminate how modern landmines have shaped international conflicts to our own time Through intensive research in archival institutions published primary sources and technical literature Hess has created the definitive account of Civil War era landmine warfare within its global context **Warship International** ,1975 **American National Biography** ,1999
