was returning from Europe where he had been studying painting On shipboard he heard another passenger talking about how electricity could travel through a wire in an instant Morse had the idea that electricity could be used to send messages If he had known how many scientists and inventors had already had the same idea he might never have worked on developing a method of sending messages But he didn't know and his idea of creating a code out of dots and dashes the Morse code made the telegraph a practical method of sending messages through electric wires Book jacket
