**The Subject of Race in American Science Fiction** Sharon DeGraw, 2006-12-19 While the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in American SF In his Mars series Edgar Rice Burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism Writing in the 1930s George S Schuyler revised Burroughs normative SF triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead While both Burroughs and Schuyler wrote SF focusing on racial identity the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored Beginning in the 1960s Samuel R Delany more fully joined SF and African American literature Delany expands on Schuyler's racial constructionist approach to identity including gender and sexuality in addition to race Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature Connecting the popular fiction of Burroughs the controversial career of Schuyler and the postmodern texts of Delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today      *Ash of stars* , A critical appreciation of the acclaimed science fiction writer and his works      **Dark Horizons** Tom Moylan, Raffaella Baccolini, 2013-12-02 First published in 2003 With essays by an international and interdisciplinary group of scholars Dark Horizons focuses on the development of critical dystopia in science fiction at the end of the twentieth century In these narratives of places more terrible than even the reality produced by the neo conservative backlash of the 1980s and the neoliberal hegemony of the

1990s utopian horizons stubbornly anticipate a different and more just world The top notch team of contributors explores this development in a variety of ways by looking at questions of form politics the politics of form and the form of politics In a broader context the essays connect their textual and theoretical analyses with historical developments such as September 11th the rise and downturn of the global economy and the growth of anti capitalist movements BP 250 R. Reginald, Mary Wickizer Burgess, Mary A. Burgess, 1996-01-01 An Annotated Bibliography of the First 300 Publications of the Borgo Press 1975 1998 **Worlds Apart** Carl Darryl Malmgren, 1991-07-22 Malmgren succeeds in formulating a typology of science fiction that will become a standard reference for some years to come Choice the most intelligently organized and effectively argued general study of SF that I have ever read Rob Latham SFRA Review required reading for its evenhanded overview of so much of the previous critical theoretical material devoted to science fiction American Book Review Worlds Apart provides a comprehensive theoretical model for science fiction by examining the worlds of science fiction and the discourse which inscribes them Malmgren identifies the basic science fiction types including alien encounters alternate societies and worlds and fantasy and examines the role of the reader in concretizing and interpreting these science fiction worlds **The Annotated Guide to Startling Stories** Leon L. and the Internet      **The Year's Scholarship in Science Fiction, Fantasy, and Horror Literature, 1982** Marshall B. Tymn, 1985      **Futurescapes** Ralph Pordzik, 2009 This book testifies to the growing interest in the many spaces of utopia It intends to map out on utopian and science fiction discourses some of the new and revisionist models of spatial analysis applied in Literary and Cultural Studies in recent years The aim of the volume is to side step the established generic binary of utopia and dystopia or science fiction and thus to open the analysis of utopian literature to new lines of inquiry The essays collected here propose to think of utopias not so much as fictional texts about future change and transformation but as vital elements in a cultural process through which social spatial and subjective identities are formed Utopias can thus be read as textual systems implying a distinct spatial and temporal dimension as spatial practices that tend to naturalize a cultural and social construction that of the good life the radically improved welfare state the Christian paradise the counter society etc and make that representation operational by interpellating their readers in some determinate relation to their givenness as sites of political and individual improvement This volume is of interest for all scholars and students of literature who wish to explore the ways in which utopias of the past and recent present have circulated as media of cultural exchange and homogenization as sites of cultural and linguistic appropriation and as foci for the spatial formation of national and regional identities in the English speaking world      **Modern Retellings of Chivalric Texts** Gloria Allaire, 2018-12-21 Published in 1999 the ten essays in this collection identify and examine reworkings of identifiable source texts from the medieval or Renaissance periods The reasons for the modern adaptations depend variously on an individual author s personal perspectives the worldview of his or her society and the individual s place in it The various chapters therefore address issues such as why a particular model was chosen and how its retelling depends on the modern author auteur s misreading or rereading of medieval chivalric conventions This book compliments numerous existing studies of medievalism in the Enlightenment and Victorian eras by examining more recent adaptations of the much studied Arthurian romances but primarily extends the discussion on the nature of revivals to other medieval or Renaissance chivalric texts especially the Carolingian cycle epic The collection includes not only literary retellings of medieval texts but also some in different media such as theatre and cinema      **Black American Literature Forum** , 1984      *The Year's Scholarship in Science Fiction, Fantasy, and Horror Literature, 1981* Marshall B. Tymn, 1984      **Historical Dictionary of Science Fiction Literature** Brian Stableford, 2004-04-19 This reference tracks the development of speculative fiction influenced by the advancement of science and the idea of progress from the eighteenth century to the present day The major authors and publications of the genre and significant subgenres are covered Additionally there are entries on fields of science and technology which have been particularly prolific in provoking such speculation The list of acronyms and abbreviations the chronology covering the literature from the 1700s through the present the introductory essay and the dictionary entries provide science fiction novices and enthusiasts as well as serious writers and critics with a wonderful foundation for understanding the realm of

science fiction literature The extensive bibliography that includes books journals fanzines and websites demonstrates that science fiction literature commands a massive following     **African American Writers** Valerie Smith, 2001 Contains biographical and critical essays on the work of important African American writers
