San Francisco Bay Portrait Of An Estuary:

San Francisco Bay John Hart, 2003 A magnificent pictorial tribute to the San Francisco Bay and the Delta region which together make one of the world's great estuaries This book celebrates the Bay's beauty and its importance to the region and inspires those who are helping restore and protect it Natural History of San Francisco Bay Ariel Rubissow Okamoto, Kathleen M. Wong, 2011-09 This exploration into the San Francisco Bay covers an array of topics including fish and wildlife populations ocean and climate cycles endangered and invasive species and the path from industrialization to environmental restoration **Down by the Bay** Matthew Booker, 2020-06-09 San Francisco Bay is the largest and most productive estuary on the Pacific Coast of North America It is also home to the oldest and densest urban settlements in the American West Focusing on human inhabitation of the Bay since Ohlone times *Down by the Bay* reveals the ongoing role of nature in shaping that history From birds to oyster pirates from gold miners to farmers from salt ponds to ports this is the first history of the San Francisco Bay and Delta as both a human and natural landscape It offers invaluable context for current discussions over the best management and use of the Bay in the face of sea level rise **An Island in Time** John Hart, 2012 On September 13 2012 Point Reyes National Seashore near San Francisco turned fifty Mixing wilderness history and agriculture Point Reyes is a hybrid park unlike any other in America *An Island in Time* traces the triumph of its creation the rescue effort that saved it from early abandonment and its frequent identity crises since Sixty images by regional photographers make it clear why people care Celebrating what has been accomplished in half a century at Point Reyes Hart takes a clear eyed look at the several and ongoing arguments about what this remarkable piece of land should ultimately be The nationally noted debate about the fate of a historic oyster farm within the park takes its place as the latest in a series of struggles to define the terms In 1962 Harold Gilliam's classic book *Island in Time* The Point Reyes Peninsula helped complete the drive to create the National Seashore In 2012 *An Island in Time* 50 Years of Point Reyes National Seashore tells the rest of the story and illuminates the choices now at hand Ecology, Conservation, and Restoration of Tidal Marshes Arnas Palaima, 2012-10-09 The San Francisco Bay the biggest estuary on the west coast of North America was once surrounded by an almost unbroken chain of tidal wetlands a fecund sieve of ecosystems connecting the land and the Bay Today most of these wetlands have disappeared under the demands of coastal development and those that remain cling precariously to a drastically altered coastline This volume is a collaborative effort of nearly 40 scholars in which the wealth of scientific knowledge available on tidal wetlands of the San Francisco Estuary is summarized and integrated This book addresses issues of taxonomy geomorphology toxicology the impact of climate change ecosystem services public policy and conservation and it is an essential resource for ecologists environmental scientists coastal policymakers and researchers interested in estuaries and conserving and restoring coastal wetlands around the world **The Country in the City** Richard A. Walker, 2009-11-23 Winner of the Western History Association's 2009 Hal K Rothman Award Finalist in the Western Writers of America Spur

Award for the Western Nonfiction Contemporary category 2008 **The San Francisco Bay Area** is one of the world's most beautiful cities. Despite a population of 7 million people, it is more greensward than asphalt jungle, more open space than hardscape. A vast quilt of countryside is tucked into the folds of the metropolis, stitched from fields, farms, and woodlands, mines, creeks, and wetlands. In **The Country in the City**, Richard Walker tells the story of how the jigsaw geography of this greenbelt has been set into place. The Bay Area's civic landscape has been fought over acre by acre, an arduous process requiring popular mobilization, political will, and hard work. Its most cherished environments, Mount Tamalpais, Napa Valley, San Francisco Bay Point Reyes, Mount Diablo, the Pacific coast, have engendered some of the fiercest environmental battles in the country and have made the region a leader in green ideas and organizations. This book tells how the Bay Area got its green grove from the stirrings of conservation in the time of John Muir to origins of the recreational parks and coastal preserves in the early twentieth century, from the fight to stop bay fill and control suburban growth after the Second World War to securing conservation easements and stopping toxic pollution in our times. Here, modern environmentalism first became a mass political movement in the 1960s with the sudden blooming of the Sierra Club and Save the Bay, and it remains a global center of environmentalism to this day. Green values have been a pillar of Bay Area life and politics for more than a century. It is an environmentalism grounded in local places and personal concerns close to the heart of the city. Yet this vision of what a city should be has always been informed by liberal, even utopian ideas of nature, planning, government, and democracy. In the end, green is one of the primary colors in the flag of the Left Coast, where green enthusiasms like open space are built into the fabric of urban life. Written in a lively and accessible style, **The Country in the City** will be of interest to general readers and environmental activists. At the same time, it speaks to fundamental debates in environmental history, urban planning, and geography.

Cool Gray City of Love Gary Kamiya, 2013-08-06 A kaleidoscopic tribute to San Francisco by a life-long Bay Area resident and co-founder of Salon explores specific city sites including the Golden Gate Bridge and the Land's End sea cliffs while tying his visits to key historical events. By the author of *Shadow Knights*. 30,000 first printing.

The Fall and Rise of the Wetlands of California's Great Central Valley Philip Garone, 2020-03-03 This is the first comprehensive environmental history of California's Great Central Valley, where extensive freshwater and tidal wetlands once provided critical habitat for tens of millions of migratory waterfowl. Weaving together ecology, grassroots politics, and public policy, Philip Garone tells how California's wetlands were nearly obliterated by vast irrigation and reclamation projects but have been brought back from the brink of total destruction by the organized efforts of duck hunters, whistle-blowing scientists, and a broad coalition of conservationists. Garone examines the many demands that have been made on the Valley's natural resources, especially by large-scale agriculture, and traces the unforeseen ecological consequences of our unrestrained manipulation of nature. He also investigates changing public and scientific attitudes that are now ushering in an era of unprecedented protection for wildlife and wetlands in California and the nation.

Twain's Feast Andrew

Beahrs,2010-06-24 One young food writer's search for America's lost wild foods from New Orleans croakers to Illinois Prairie hen with Mark Twain as his guide In the winter of 1879 Mark Twain paused during a tour of Europe to compose a fantasy menu of the American dishes he missed the most He was desperately sick of European hotel cooking and his menu made up of some eighty regional specialties was a true love letter to American food Lake Trout from Tahoe Hot biscuits Southern style Canvasback duck from Baltimore Black bass from the Mississippi When food writer Andrew Beahrs first read Twain's menu in the classic work *A Tramp Abroad* he noticed the dishes were regional in the truest sense of the word drawn fresh from grasslands woods and waters in a time before railroads had dissolved the culinary lines between Hannibal Missouri and San Francisco These dishes were all local all wild and all Beahrs feared had been lost in the shift to industrialized food In Twain's *Feast* Beahrs sets out to discover whether eight of these forgotten regional specialties can still be found on American tables tracing Twain's footsteps as he goes Twain's menu it turns out was also a memoir and a map The dishes he yearned for were all connected to cherished moments in his life from the New Orleans croakers he loved as a young man on the Mississippi to the maple syrup he savored in Connecticut with his family during his final lonely years Tracking Twain's foods leads Beahrs from the dwindling prairie of rural Illinois to a six hundred pound coon supper in Arkansas to the biggest native oyster reef in San Francisco Bay He finds pockets of the country where Twain's favorite foods still exist or where intrepid farmers fishermen and conservationists are trying to bring them back In Twain's *Feast* he reminds us what we've lost as these wild foods have disappeared from our tables and what we stand to gain from their return Weaving together passages from Twain's famous works and Beahrs's own adventures Twain's *Feast* takes us on a journey into America's past to a time when foods taken fresh from grasslands woods and waters were at the heart of American cooking
