First multi year cumulation covers six years 1965 70 *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **Monographic Series** Library of Congress,1975 Utilization of Waste Heat from Power Plants David Rimberg,1974 *Contamination of Groundwaters* Domy C. Adriano,2020-11-25 International experts have contributed key chapters to this major work on groundwater contamination Section 1 Methodology and Modeling deals with both organic and inorganic contaminants including those from agricultural operations Section 2 Case Studies presents contamination scenarios with both inorganic and organic chemicals including agriculturally related constituents such as the nitrates This important new publication is a welcome addition to the literature and will enhance recent information on methodology modeling and real world situations It is of interest to scientists and planners in local and national government environmental chemists geochemists geologists and health and safety officers river authorities hydrologists and the mining and land reclamation industries **Groundwater Contamination, Volume I** Chester D. Rail,2000-04-14 Fully updated and expanded into two volumes the new edition of Groundwater Contamination explains in a comprehensive way the sources for groundwater contamination the regulations governing it and the technologies for abating it Volume 1 covers all major contaminants and explains the hydrology and data used to determine the extent of pollution *Material and Energy Recovery from Solid Waste for a Circular Economy* Atun Roy Choudhury,Sankar Ganesh Palani,2024-07-08 Material and Energy Recovery from Solid Waste for a Circular Economy describes solid waste to material and energy recovery to bridge the gap between theoretical possibilities and on field criticalities It deals with various resource recovery possibilities from numerous waste streams such as municipal solid hazardous waste human faecal sludge construction and demolition waste and electronic waste The practical issues of resource recovery and possible remedies derived through onsite practice and experience are incorporated It includes real life feasibility analysis and implementation of waste to energy systems supported by case studies Features Provides comprehensive discussion on both energy and material recovery Addresses the missing linkage between the techno commercial feasibility of existing systems and environmental impact Discusses techno commercial feasibility and environmental impacts Offers balance between theoretical knowledge sharing and practical execution related issues Includes case study LCA and technical feasibility chapters This book is aimed at graduate students and researchers in environmental civil and chemical engineering *Sustainable and Cleaner Technologies for Environmental Remediation* Aravind Jeyaseelan,Kamaraj Murugasen,Karthikeyan Sivashanmugam,2023-06-04 The ever increasing population and the associated anthropogenic activities have imparted an adverse impact on the environment resulting in an escalating pollution crisis and forcing the advancement of sustainable green and eco friendly technologies

There is an expanding and flourishing activity in environmental research specifically focusing on environmentally responsive approaches to combat xenobiotics pollutants and emerging contaminants discharged into the environment due to various anthropogenic activities. Bioremediation is an approach that can facilitate sustainable practices to mitigate various environmental pollutants. Alternative eco friendly technologies involving the utilization of various industrial and agricultural residues could be sourced as economically viable sources for harnessing various tools and value added products during their appliances in environmental remediation. This book focuses on the perception of the existing trends and recent developments in bioremediation and green technology usage in waste minimization and pollution mitigation has been focused through research and review type chapters. The encouraging conclusions of these research contributions could be incorporated for commercial scale appliances on sustainable environmental solutions. This book appeals to scientists, academicians and research scholars to gain inspiration and guidance for pursuing research on sustainable environmental applications.

Barrier Systems for Waste Disposal Facilities J.R. Booker, Richard Brachman, R.M. Quigley, R. Kerry Rowe, 2004-06-03. The protection of groundwater and surface water from contamination by the escape of contaminant from waste disposal is now an important consideration in many countries of the world. This book deals with the design of barrier systems which separate waste from the surrounding environment and which are intended to prevent contamination of both ground. **Injuries and Damages from Hazardous Wastes: The report and comments**, 1982. *Injuries and Damages from Hazardous Wastes: Appendices*, 1982. *Advances in Synthesis Gas: Methods, Technologies and Applications* Mohammad Reza

Rahimpour, Mohammad Amin Makarem, Maryam Meshksar, 2022-10-18. *Advances in Synthesis Gas Methods Technologies and Applications*. Syngas Production and Preparation is a collection of various chapters concerning many aspects of syngas production technologies including common methods like gasification, steam dry autothermal reforming, membrane technology etc along with novel methods like plasma technology, micro reactors, electrolysis processes as well as photocatalytic systems. In addition, different sources for producing syngas including oil, crude oil, heavy oil, microalgae, black liquor, tar and bitumen as well as municipal, agricultural, food, plastic, wood and cardboard wastes are described in detail. Introduces syngas characteristics and its properties. Describes various methods and technologies for producing syngas. Discusses syngas production from different roots and feedstocks. *The Scientific Management of Hazardous Wastes* C. B. Cope, W. H. Fuller, S. L. Willetts, 1983-03-17. In this book first published in 1983, three independent scientists examine the results of research and development into the environmental aspects of hazardous wastes management. Within a legislative framework, the limits of our scientific knowledge are carefully defined and the ways in which this knowledge is extrapolated and applied are examined. Significant areas of uncertainty are identified and the authors have not been afraid to draw attention to the fallibility of certain interpretations. Landfill science, leachate characteristics, pollutant attenuation and toxicity measurement are reviewed. Alternative technologies such as chemical treatment and incineration are compared. Risk assessment cost

implications and public acceptance are examined It provides an objective assessment of the scientific and practical issues involved and constitutes a valuable source book for all concerned with hazardous wastes management planning and regulatory control pollution prevention and environmental protection **Injuries and Damages from Hazardous Wastes**,1982 *Sustainable Development of Electrical Energy Storage Technologies in Energy Production* Grigorios L. Kyriakopoulos,2021-04-23 Nowadays energy production increase has been proven a globally contentious issue as it counts variable stakeholders of competitive interests Such indicative competitive interests are land use for energy crops against maximizing agricultural production yields as well as the gradually localized trend of energy production from renewables compared to the central overexploitation of fossil fuelled energy sources in mainland grids of energy production In response to this multi parametric contradiction on traditional and novel approaches of energy production this Special Issue aims at attracting researchers whose scientific interest resides in the electrical energy storage EES systems in a wide range of applicability Technological advancements environmental impacts economies of scale achievement active involvement of renewables in EES technologies socio economic impacts upon EES diffusion in regional and globalized contexts of analysis The main limitations and the challenges derived from these scientific approaches will formulate a fresher scientific viewpoint of novel insights upon EES applicability in developed and developing economies accordingly Papers selected for this Special Issue are subject to a rigorous peer review procedure enabling an integrated manner of dissemination upon research advancements and multi disciplinary dynamics accordingly Hazardous Waste Management Facilities Directory,1990-01-15 A compilation of material from EPA data bases Lists 1 045 commercial hazardous waste management facilities along with information on the types of services they offer types of wastes managed and facility name address and contact person Stabilization Technologies for RCRA Corrective Actions Center for Environmental Research Information (U.S.),1991 *Waste Management Policies and Practices in BRICS Nations* Pardeep Singh,Yulia Milshina,Kangming Tian,Anwesha Borthakur,Pramit Verma,Ajay Kumar,2021-08-02 Waste Management Policies and Practices in BRICS Nations explores recent developments in waste management BRICS nations are the emerging economies of the world Increasing populations urbanization industrialization and uses of chemical fertilizer and pesticide in agriculture for enhanced productivity of food especially in India and China to support the large populations harm the natural environment The rise in the living standards of the human population has increased environmental pollution manifold resulting in the huge generation of biodegradable and non biodegradable waste simultaneously which has contaminated natural resources such as soil water and air It has led to undesirable effects on the environment and human health The book offers comprehensive coverage of the most essential topics including Waste management problems with special reference to MSW in Brazil Russia India China and South Africa Solid waste management in BRICS nations Hazardous waste management in BRICS nations Policies and laws in BRICS nations This book contains both policies and methods used for the management of waste in BRICS
