Rosano, 2022-01-27 After working for years in a war zone Danny D Amato needs a break Stressed he chooses the blue waters of Positano for his escape Soon the pages of his diary fill with notes about the woman he meets on the sunny Mediterranean cliffs and his conversion from a war weary veteran to a man in love In a few days he and Gaia fall in love share their lives and imagine a future together And then she is gone After Danny spends countless days looking for Gaia the vast distance between them finally closes but for reasons they could have never predicted *Gaia's Wager* Gary C. Bryner, 2001 Can environmentalism evolve into a powerful social movement that transforms human practices in ways that are ecologically sustainable Gary C Bryner contends that it is in our self interest as a species to ensure that environmental movements coalesce in the service of sustainability From the very first Earth Day to the setting of Agenda 21 for the new millennium this book traces the actors the issues and the institutions involved in moving environmentalism from a loose collection of fuzzy groups and goals to a new global force for change Will the next phase of environmental action resemble the WTO protests in Seattle the UN Kyoto Protocols or a Think Tank inside the Washington Beltway Gaia's Wager shows that movements play an important role between political parties and interest groups on the domestic scene and the unruly forces of globalization internationally Only social movements can catalyze a response to the global environmental threat that has a chance of both capturing imaginations and institutionalizing progress toward environmental sustainability Above all Gaia's Wager bets on the confluence of big ideas and social action to yield a more hopeful environmental future *Gaia's Web* Karen Bakker, 2024-04-16 A riveting exploration of one of the most important dilemmas of our time will digital technology accelerate environmental degradation or could it play a role in ecological regeneration At the uncanny edge of the scientific frontier Gaia's Web explores the promise and pitfalls the Digital Age holds for the future of our planet Instead of the Internet of Things environmental scientist and tech entrepreneur Karen Bakker asks why not consider the Internet of Living Things At the surprising and inspiring confluence of our digital and ecological futures Bakker explores how the tools of the Digital Age could be mobilized to address our most pressing

environmental challenges from climate change to biodiversity loss Interspersed with ten elegiac enigmatic parables each of which is based on an existing technology Gaia's Web evokes the conundrums we face as the World Wide Web intertwines with the Web of Life A new generation of innovators is deploying digital technology to come to the aid of the planet using spy satellites to track down environmental criminals inviting animals to the Metaverse and biohacking Frankenstein like biobots as environmental sentinels But will they end up doing more harm than good In an engaging take on conservation technology Bakker looks at the digital tech applications to environmental issues from predatory harvesting of environmental data to human bycatch and eco surveillance capitalism If we address these issues and mobilize digitally mediated forms of citizen science she argues digital tech could help reverse environmental harms and advance environmental sustainability And in the process Big Tech might be transformed for the better With its uniquely broad scope combining insights from computer science ecology engineering environmental science and environmental law Gaia's Web introduces profoundly novel ways of addressing our most pressing environmental challenges mitigating climate change protecting endangered species and creating new possibilities for ecological justice by empowering nonhumans to participate in environmental regulation

In Search of Leo Anitha Krishnan, 2023-02-07 When you lose someone you love how far would you go in search of them And what if the only way you can find them is by first losing yourself along the way Devastated by grief at the loss of her beloved dog Leo Heidi ventures into the woods behind her home hoping to find him there She meets strange and eccentric characters along the way but no one seems inclined to give her a straight answer about Leo's whereabouts Frustrated and confused Heidi begins to wonder if there is more to these characters than meets the eye The Oldest Witch who lives in a snow bubble of denial The Omniscient Man who trivializes Heidi's pain The lonely woman Gaia who is consumed by anger And many others As Heidi struggles to make sense of their cryptic responses she must also navigate her own emotions and face up to the distinct possibility she has been refusing to consider all along Perhaps Leo is truly gone forever and she may never find him Drifting from one dreamlike encounter to another Heidi discovers that the journey through grief from loss towards acceptance is a meandering It unfolds of its own accord often seemingly without purpose or reason But can she survive it without first getting hopelessly lost

Atlantean MICHAEL L. OLVERA, 2015-05-07 A magnificent city lost over time destroyed by the Gods and sent to the bottom of the Ocean forever later to be written by the Greek philosopher Plato in two dialogues Destroyed was their home but not its people who rebuilt their city back to its former glory Learning from their violent past not to repeat it the centuries go by and the outside world has populated the surface no place for the Atlantean people to call home Safe from the outside world and their advanced technology that is generated by a rare element only found at the outer reaches of the solar system The Atlanteans decide to stay below the waves to watch over and nurture the people from above giving them technology through the centuries until they are ready to accept them and their technology Creating another city on the other side of Earth deep below the Pacific Ocean the city grows rapidly hungry for more energy

and power the people in time rebel against Atlantis With all out war looming over the peaceful people of Atlantis one man not from their world will come to understand the past and his future Light of the Stars Adam Frank,2018-06-12 Winner of the 2019 Phi Beta Kappa Award for Science A valuable perspective on the most important problem of our time Adam Becker NPR Light of the Stars tells the story of humanity s coming of age as we realize we might not be alone in this universe

Kowalski,2003 Harvard educated theologian Gary Kowalski argues that many of the ills of the modern world from the rise of fundamentalist intolerance to secular society s endless and empty search for thrills stem from the mistaken view that science and faith are antagonists rather than natural allies Both science and faith the author suggests compel us now to move beyond materialism toward an understanding of the world that includes the realities of consciousness and spirit In the twenty first century human beings have less reason than before to feel they hold a privileged or special position in the cosmos but more cause than ever to feel connected and akin to all that is Christians and Jews skeptics and seekers alike will find that this brief persuasively written volume sheds new light on the old questions Who are we Where do we figure in the larger scheme of things And what can we honestly believe **Keep Your Sexy Sacred** Sabrina Universal
