Long March To Nowhere:

The Gospel & Abortion Russell D. Moore, Andrew T. Walker, 2017-01-01 The pro life movement didn't begin in the 1960s but in the Garden of Eden. Abortion has been a divisive issue in American culture since the sexual revolution. Yet the Bible is an unapologetic defender of human dignity. Moreover, Christians have always cared for the unborn, the orphan, and the least among us. The time is now for this generation to reaffirm what believers have always believed: everybody is created in the image of God. So what now? Editors Russell Moore and Andrew T. Walker of the Ethics and Religious Liberty Commission (ERLC) assemble leading voices to frame the issues with a gospel-centered perspective. The Gospel for Life series gives every believer a biblically saturated understanding of the most urgent issues facing our culture today because the gospel is for all of life.

Pension Politics Patrik Marier, 2008-03-25 Population ageing and slower economic growth have raised serious questions about the willingness and ability of governments to maintain current social policies. Within this new reality, discussions on the future of public pensions have been predominant in political debates across Europe. This book explains why certain countries have been able to radically transform their pension system while others have simply altered parameters. To answer this question, an extensive comparative analysis including more than 60 interviews was conducted in Belgium, France, Sweden, and the UK. This empirical data provides an interesting contrast between reforms. Parametric reforms have stemmed from the creation of pension administrations outside the traditional state apparatus in France and Belgium, and the resulting inclusion of social partners, while the state administrations of Sweden and the UK, where debates have been internalised, have led to programmatic reforms. Two controversial findings of this book include an explanation for the lack of influence on the part of the labour movement in the 1994-98 Swedish reform and a rejection of arguments claiming that policy change will be minimal with coalition governments. Finally, the conclusion seeks to extend the applicability of the model to other industrialized countries. This book will be of interest to students and scholars of public policy, specifically social policy, political economy, the welfare state, and comparative politics.

Geopolitics and the Indo-Pacific Region Ashok Kapur, 2024-08-27 Exploring geopolitics of the Indo-Pacific Region, a major hub of global economic, commercial, military, diplomatic, and cultural activities in the 21st century, this textbook provides students with an introduction to the existing debates, frameworks, and issues surrounding the Indo-Pacific. The second edition has been revised, updated, and expanded to explain the major build-up of deterrence hubs during 2022-2023 in the Indo-Pacific Region. The hubs have a clear focus on North Asia (Japan and South Korea), the Taiwan Strait and Taiwan, and the South China Sea (the Philippines, Vietnam, and Australia) and India and the Indian Ocean littoral areas (the Persian Gulf and the Bay of Bengal). This edition takes into account the effects of the Ukraine-Russia and Israel-Hamas-Iran proxy conflicts on the build-up of Russia, China, North Korea, Iran, ties, and the naval projections by China and Russia in the North Pacific off the Alaska coast and in relation to Myanmar and Bangladesh and the Gulf, Red Sea areas. Within the purview of maritime security and NATO, the

present century is critical with the introduction of missiles and nuclear submarine technology into IPR and by the fragmentation of arms control and nuclear and missile non proliferation arrangements of the 1960s 2000 period This volume predicts that China's oft proclaimed rise to global hegemonic status is not inevitable because of its many economic social problems and foreign policy dilemmas Nor is World War III inevitable because no one seeks unlimited warfare but the regions in conflict will likely remain on a low boil However problem solving and crisis resolution will remain problematic keeping the 21st century at its toes due to the inability of regional powers to unite for the common good Complete with a list of further reading Geopolitics and the Indo Pacific Region fills a gap in the market and will be of great interest to upper year level undergraduates postgraduate students and researchers studying international relations IPR geopolitics Asian politics and Asian security studies

On Unemployment Mark R. Reiff,2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book's various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology

Professor of Apocalypse Jerry Z. Muller,2024-05-14 The controversial Jewish thinker whose tortured path led him into the heart of twentieth century intellectual life Scion of a distinguished line of Talmudic scholars Jacob Taubes 1923 1987 was an intellectual impresario whose inner restlessness led him from prewar Vienna to

Zurich Israel and Cold War Berlin Regarded by some as a genius by others as a charlatan Taubes moved among yeshivas monasteries and leading academic institutions on three continents He wandered between Judaism and Christianity left and right piety and transgression Along the way he interacted with many of the leading minds of the age from Leo Strauss and Gershom Scholem to Herbert Marcuse Susan Sontag and Carl Schmitt Professor of Apocalypse is the definitive biography of this enigmatic figure and a vibrant mosaic of twentieth century intellectual life Jerry Muller shows how Taubes s personal tensions mirrored broader conflicts between religious belief and scholarship allegiance to Jewish origins and the urge to escape them tradition and radicalism and religion and politics He traces Taubes s emergence as a prominent interpreter of the Apostle Paul influencing generations of scholars and how his journey led him from crisis theology to the Frankfurt School and from a radical Hasidic sect in Jerusalem to the center of academic debates over Gnosticism secularization and the revolutionary potential of apocalypticism Professor of Apocalypse offers an unforgettable account of an electrifying world of ideas focused on a charismatic personality who thrived on controversy and conflict *Link*, 1978 [The Black Chalice](#) Marie Jakober, 2014-07-16 It s 1134 In a bleak monastery somewhere in Germany Paul of Ardiun begins the chronicle he has been ordered by his religious superiors to write the story of the knight Karelian Brandeis for whom Paul once served as squire who fell prey to the evil wiles of a seductive sorceress thereby precipitating civil war and the downfall of a king But before Paul can set down more than a sentence or two of this cautionary tale the sorceress herself magically appears to him He is a liar she tells him and always has been She lays a spell on him from this moment he will only be able to write the truth But what is the truth All his life he has rearranged his memories to suit his faith He has judged Karelian judged the women judged the world Now against his will an entirely different story begins to emerge *Kilima-njaro* Henry Aloysius Gogarty, 1927 [The Holy Wars of King Wladislas and Sultan Murad](#) John Jefferson, 2012-08-13 The Holy Wars of King Wladislas and Sultan Murad comprises the first detailed treatment of the pivotal conflict between the Ottomans and Christendom from 1438 1444 Beginning with the Council of Florence and renewed Ottoman expansion it covers the election of Wladislas the rise of John Hunyadi and the factional politics of the Porte The author recounts the major campaigns including Hunyadi s victories in 1442 as well as the Long March and Varna expeditions of 1443 44 He also gives a thorough description of the armies their tactics and strategy Dr Jefferson s work is the first to make full use of both Ottoman and Christian sources and not only corrects persistent misconceptions but provides the fullest picture of this conflict to date *A History of the Modern Chinese Army* Xiaobing Li, 2007-06-01 Since the establishment of the Red Army in 1927 China s military has responded to profound changes in Chinese society particularly its domestic politics shifting economy and evolving threat perceptions Recently tensions between China and Taiwan and other east Asian nations have aroused great interest in the extraordinary transformation and new capabilities of the Chinese army In *A History of the Modern Chinese Army* Xiaobing Li a former member of the People s Liberation Army PLA provides a comprehensive examination of the PLA

from the Cold War to the beginning of the twenty first century that highlights the military's central function in modern Chinese society. In the 1940s the Chinese army was in its infancy and many soldiers were rural conscripts and volunteers who had received little formal schooling. The Chinese military rapidly increased its mobility and weapon strength and the Korean War and Cold War offered intense combat experience that not only allowed soldiers to hone their fighting techniques but also helped China to develop military tactics tailored to the surrounding countries whose armies posed the most immediate threats. Yet even in the 1970s the completion of a middle school education nine years was considered above average and only 4 percent of the 224 top Chinese generals had any college credit hours. However in 1995 the high command began to institute massive reforms to transform the PLA from a labor intensive force into a technology intensive army. Continually seeking more urban conscripts and emphasizing higher education the PLA Reserve Officer Training and Selection program recruited students from across the nation. These reservists would become commissioned officers upon graduation and they majored in atomic physics computer science and electrical engineering. Grounding the text in previously unreleased official Chinese government and military records as well as the personal testimonies of more than two hundred PLA soldiers Li charts the development of China's armed forces against the backdrop of Chinese society cultural traditions political history and recent technological advancements. *A History of the Modern Chinese Army* links China's military modernization to the country's growing international and economic power and provides a unique perspective on China's establishment and maintenance of one of the world's most advanced military forces.
