Conjuring Science Sofie Lachapelle, 2015-10-07 Conjuring Science explores the history of magic shows and scientific entertainment It follows the frictions and connections of magic and science as they occurred in the world of popular entertainment in France from the mid eighteenth to the early twentieth century It situates conjurers within the broader culture of science and argues that stage magic formed an important popular conduit for science and scientific enthusiasm during this period From the scientific recreations of the fairs to the grand illusions of the theatre stage and the development of early cinema conjurers used and were inspired by scientific and technological innovations to create illusions provoke a sense of wonder and often even instruct their audience In their hands science took on many meanings and served different purposes it was a set of pleasant facts and recreational demonstrations upon which to draw it was the knowledge presented in various scientific lectures accompanied by optical projections at magic shows it was the techniques necessary to create illusions and effects on stage and later on at the cinema and it was a way to separate conjuring from the deceit of mediums mystical showmen and quacks in order to gain a better standing within an increasingly scientifically minded society

Mad Loves Heather Hadlock, 2016-07-26 In a lively exploration of Jacques Offenbach's final masterpiece Heather Hadlock shows how *Les Contes d'Hoffmann* summed up not only the composer's career but also a century of Romantic culture A strange fusion of irony and profundity frivolity and nightmare the opera unfolds as a series of dreamlike episodes peopled by such archetypes as the Poet the Beautiful Dying Girl the Automaton the Courtesan and the Mesmerist Hadlock shows how these episodes comprise a collective unconscious Her analyses touch on topics ranging from the self-reflexive style of the protagonist and the music to parallels between nineteenth century discourses of theater and medical science to fascination with the hysterical female subject *Les Contes d'Hoffmann* is also examined as both a continuation and a retraction of tendencies in Offenbach's earlier operettas and operacomiques Hadlock investigates the political climate of the 1870s that influenced the composer's vision and the reception of his last work Drawing upon insights from feminist literary and cultural theory she considers how the opera's music and libretto took shape within a complex literary and theatrical tradition Finally Hadlock ponders the enigmas posed by the score

of this unfinished opera which has been completed many times and by many different hands since its composer's death shortly before the premiere in 1881. In this book the mad loves that drive Les Contes d'Hoffmann, a poet's love, a daughter's love, erotic love, and fatal attraction to music become figures for the fascination exercised by opera itself. **Deburau** Edward Nye, 2022-07-01. This volume analyses the nature of the mime art of Deburau and of the pantomime performances of the Théâtre des Funambules in Paris in the context of Romantic art, literature, and socio-political thought. Deburau and the Théâtre des Funambules are characteristic of Romantic art in that they are closely associated with certain aspirations for social reform, even revolution. Deburau was an iconic figure for intellectuals such as George Sand, who effectively considered him to be part of the *poète-macon* movement. Edward Nye examines this fascination as well as the myth which developed from it. With its unique framing in art, literature, and politics, this book is a must-read for undergraduates and postgraduates in theatre, literary studies, and the Romantic period. **Biographie Universelle Classique. Biographie Universelle, Ou Dictionnaire Historique, Etc**, 1833.
