Ragep, 2013-06-29 I was introduced to Tūsi and his Tadhkira some 19 years ago That first meeting was neither happy nor auspicious My graduate student notes from the time indicate a certain level of confusion and frustration I seem to have had trouble with such words as tadvlwr epicycle which was not to be found in my standard dictionary and with the concept of solid sphere astronomy which when found was pooh poohed in the standard sources I had another even more decisive reaction boredom Only the end of the term brought relief and I was grateful to be on to other more exciting aspects of the history of science A few years later I found myself thanks to fellowships from Fulbright Hays and the American Research Center in Egypt happily immersed in the manu script collections of Damascus Aleppo and Cairo Though I had intended to work on a topic in the history of mathematics I was drawn perhaps inevitably to a certain type of astronomical writing falling under the rubric of hay a At first this fascination was based on sheer numbers that so many medieval scientists could have written on such a subject must mean something I told myself I was in a sociological mode at the time
