

NATIONAL DECONSTRUCTION

VIOLENCE, IDENTITY, AND JUSTICE IN BOSNIA

DAVID CAMPBELL

National Deconstruction

Matthew Fluck

National Deconstruction:

National Deconstruction David Campbell, How did Bosnia once a polity of intersecting and overlapping identities come to be understood as an intractable ethnic problem David Campbell pursues this question and its implications for the politics of community democracy justice and multiculturalism through readings of media and academic representations of the conflict in Bosnia National Deconstruction is a rethinking of the meaning of ethnic nationalist violence and a critique of the impoverished discourse of identity politics that crippled the international response to the Bosnian crisis Rather than assuming the preexistence of an entity called Bosnia Campbell considers the complex array of historical statistical cartographic and other practices through which the definitions of Bosnia have come to be These practices traverse a continuum of political spaces from the bodies of individuals and the corporate body of the former Yugoslavia to the international bodies of the world community Among the book's many original disclosures arrived at through a critical reading of international diplomacy is the shared identity politics of the peacemakers and paramilitaries Equally significant is Campbell's conclusion that the international response to the Bosnian war was hamstrung by the poverty of Western thought on the politics of heterogeneous communities Indeed he contends that Europe and the United States intervened in Bosnia not to save the ideal of multiculturalism abroad but rather to shore up the nationalist imaginary so as to contain the ideal of multiculturalism at home By bringing to the fore the concern with ethics politics and responsibility contained in more traditional accounts of the Bosnian war this book is a major statement on the inherently ethical and political assumptions of deconstructive thought and the reworkings of the politics of community it enables United States Foreign Policy and National Identity in the 21st Century Kenneth Christie, 2009 Examines the complex relationship between United States foreign policy and American national identity as it has changed from the post cold war period through the defining moment of 9 11 and into the 21st century Starting with a discussion of notions of American identity in an historical sense the contributors go on to examine the most central issues in US foreign policy and their impact on national identity including the end of the Cold War the rise of neo conservatism ideas of US Empire and the influence of the War on Terror The book sheds significant new light on the continuities and discontinuities in the relationship of US identity to foreign policy The Concept of Truth in International Relations Theory Matthew Fluck, 2017-04-12 This book charts the role played by conceptions of truth in the development of a critical tradition of International Relations theory Providing a detailed account of the conceptions which have shaped the work of Critical Theorists and Poststructuralists the book reaffirms the importance of epistemic reflection for the discipline It argues that the partially abstract character of the main strands of critical IR arises not from their concern with epistemic matters but from their insistence that truth is purely intersubjective Drawing on the philosophy of Theodor Adorno the book argues that IR's critical tradition can be rejuvenated by combining its original politicisation of truth with a critical account of its objectivity The book will be a valuable resource for scholars and graduate

students interested in the future of critical International Relations theory **Ethics and Politics after Poststructuralism** Madeleine Fagan, 2013-09-16 What would political thought look like without the foundation of ethics Drawing on the work of Emmanuel Levinas Jacques Derrida and Jean Luc Nancy Madeleine Fagan puts forward a radical and far reaching refusal of foundational ethics Instead she proposes an account of the inseparability of ethics and politics The ethical should not be understood as a label it does not mean good or right it is not an evaluation or guide Rather both the ethical and the political are descriptions of the context in which we find ourselves The book highlights the necessity of a practice based rethinking of the relationship between ethics and politics and so denaturalises a series of commonplaces about poststructuralist ethics

Security as Practice Lene Hansen, 2013-04-03 This important text offers a full and detailed account of how to use discourse analysis to study foreign policy It provides a poststructuralist theory of the relationship between identity and foreign policy and an in depth discussion of the methodology of discourse analysis Part I offers a detailed discussion of the concept of identity the intertextual relationship between official foreign policy discourse and oppositional and media discourses and of the importance of genres for authors ability to establish themselves as having authority and knowledge Lene Hansen devotes particular attention to methodology and provides explicit directions for how to build discourse analytical research designs Part II applies discourse analytical theory and methodology in a detailed analysis of the Western debate on the Bosnian war This analysis includes a historical genealogy of the Western construction of the Balkans as well as readings of the official British and American policies the debate in the House of Commons and the US Senate Western media representations academic debates and travel writing and autobiography Providing an introduction to discourse analysis and critical perspectives on international relations this book will be essential reading for students and scholars of international relations discourse analysis and research methodology *Critical Terrorism Studies* Jacob Stump, Priya Dixit, 2013-05-02

This book is an introduction to critical approaches to terrorism studies While there is a growing body of Critical Terrorism Studies CTS literature devoted to empirical examples and conceptual development very little has been written about how to systematically carry out this kind of research Critical Terrorism Studies fills this gap by addressing three key themes The position of terrorism studies and critical terrorism studies in the discipline of International Relations IR Theoretical and methodological elaborations of critical approaches to the study of terrorism Empirical illustrations of those approaches Drawing upon a range of engaging material the volume reviews a series of non variable based methodological approaches It then goes on to provide empirical examples that illustrate how these approaches have been and can be utilized by students teachers and postgraduate researchers alike to critically and rigorously study terrorism This textbook will be of much interest to students of terrorism studies sociology critical security studies and IR in general The Global Politics of Contemporary Travel Writing Debbie Lisle, 2006-11-02 To what extent do best selling travel books such as those by Paul Theroux Bill Bryson Bruce Chatwin and Michael Palin tell us as much about world politics as newspaper articles policy

documents and press releases Debbie Lisle argues that the formulations of genre identity geopolitics and history at work in contemporary travel writing are increasingly at odds with a cosmopolitan and multicultural world in which everybody travels Despite the forces of globalization common stereotypes about foreignness continue to shape the experience of modern travel The Global Politics of Contemporary Travel Writing is concerned with the way contemporary travelogues engage with and try to resolve familiar struggles about global politics such as the protection of human rights the promotion of democracy the management of equality within multiculturalism and the reduction of inequality This is a thoroughly interdisciplinary book that draws from international relations literary theory political theory geography anthropology and history

Identities, Nations and Politics after Communism Roger E. Kanet, 2013-10-18 This book focuses on questions of identity that have confronted the countries of Central and Eastern Europe after the collapse of the communist system that had previously provided them with an identity This development both facilitated and necessitated a reassessment of the now independent nations history orientation symbols and identity In some cases new states were created without a clear national identity while in others the nation was regaining statehood but not always within borders that had an historical association with the nation concerned The multiethnic character of the space of the former Soviet Union and its erstwhile satellites and the long historical legacy of complex relations boundary changes population migration and economic and social changes presented different challenges to the various nations and states concerned The essays in this volume attempt to elucidate and understand the issues of ethnic and national identity and their relationship to the emerging statehood in various regions of the post communist world This study makes clear that some nation states were far better prepared to handle these issues than others and that the longer term impact of the communist experience has varied This book was previously published as a special issue of Nationalities Papers

'Balkanization' and the Euro-Atlantic Processes of the (Western) Balkans Liridona Veliu Ashiku, 2024-08-30 This book explores how balkanization as a discourse underpins the policies of the European Union EU and the North Atlantic Treaty Organization NATO toward the Western Balkans It shows how EU and NATO policies have emerged from and led to the constant reinvention of the unity of the West through balkanizing the region and illustrates how this dynamic is maintained by and instrumentalized for the political elites Through a genealogical analysis that stretches from the Balkans Wars to more recent events such as North Macedonia's change of name in 2018 the author shows how Western policies have aimed at recreating the united West on the back of the broken Balkans The book will appeal to scholars and students of Southeast Europe International Relations Political Science Peace and Conflict Studies and History
