National Purpose In The World Economy:

National Purpose in the World Economy Rawi Abdelal, 2018-08-06 How do national identities affect the world economy Building on the insight that nationalisms and national identities endow economic policy with social purpose Rawi Abdelal proposes a novel theoretical framework a distinctively Nationalist perspective on international political economy to answer this question Using this framework and drawing on field research in Lithuania Ukraine and Belarus he provides an in depth look at the link between national identity and the economic policies of the new states formed by the breakup of the Soviet Union All these states from the Baltic coast to central Asia were economically dependent on Russia during the 1990s However they reacted very differently to that dependence and their reactions can be traced Abdelal contends to their individual societies Some such as Belarus found dependence inevitable and sought economic reintegration with Russia Others like Lithuania interpreted dependence as a large scale security threat and reoriented their economies away from Russia A third group typified by Ukraine demonstrated no coherent economic policy at all regarding dependence Abdelal distinguishes the Nationalist tradition in international political economy from the Realist tradition and shows that economic nationalism is different than mercantilism He demonstrates the ways that national identity affects economic policy and explains why some governments seek economic autonomy while others prefer regional reintegration He then applies his approach to other cases of economic reorganization after the end of empire eastern Europe in the 1920s after the Habsburgs 1950s Indonesia and French West Africa in the 1960s

National Purpose in the World Economy Rawi Abdelal, 2001 All these states from the Baltic coast to central Asia were economically dependent on Russia during the 1990s They reacted very differently to that dependence however and their reactions can be traced Abdelal contends to their individual societies Some such as Belarus found dependence inevitable and sought economic reintegration with Russia Others such as Lithuania interpreted dependence as a large scale security threat and reoriented their economies away from Russia Yet another typified by Ukraine demonstrated no coherent economic policy at all regarding dependence

The Social Sources of

Financial Power Leonard Seabrooke, 2006 A state's financial power is built on the effect its credit property and tax policies have on ordinary people this is the key message of Leonard Seabrooke's comparative historical investigation which turns the spotlight away from elite financial actors and toward institutions that matter for the majority of citizens Seabrooke suggests that everyday contests between social groups and the state over how the economy should work determine the legitimacy of a state's financial and fiscal system Ideally he believes such contests compel a state to intervene on behalf of people below the median income level leading the state to broaden and deepen its domestic pool of capital while increasing its influence on international finance But to do so Seabrooke asserts a state must first challenge powerful interests that benefit from the concentration of financial wealth Seabrooke's novel constructivist approach is informed by economic sociology and the work of Max Weber This book demonstrates how domestic legitimacy influences the character of international financial orders It

will interest all readers concerned with how best to transform state intervention in the economy for the good of the majority

The Role of National Saving in the World Economy International Monetary Fund, 1990-03-19 This paper reviews and analyzes broad developments and considers specific policy measures to foster saving The chapter also describes trends in national saving rates of industrial countries in recent years and briefly discusses the prospects over the medium term The paper also discusses the effects of policy measures on national saving and investment Fiscal monetary and exchange rate policies are all shown to have major implications for saving in developing countries Fiscal restraint is especially important since it increases national saving by both raising public saving and reducing the country's dependence on foreign borrowing Exchange rate devaluation and the unification of exchange markets also appear to be effective in stimulating national saving Interest rates and financial reforms play a crucial role in effecting an efficient allocation of resources including the mobilization of savings to finance domestic investment

Political Survival and Sovereignty in International Relations Jesse Dillon Savage, 2020-03-12 Why do political actors willingly give up sovereignty to another state or choose to resist sometimes to the point of violence Jesse Dillon Savage demonstrates the role that domestic politics plays in the formation of international hierarchies and shows that when there are high levels of rent seeking and political competition within the subordinate state elites within this state become more prepared to accept hierarchy In such an environment members of society at large are also more likely to support the surrender of sovereignty Empirically rich the book adopts a comparative historical approach with an emphasis on Russian attempts to establish hierarchy in post Soviet space particularly in Georgia and Ukraine This emphasis on post Soviet hierarchy is complemented by a cross national statistical study of hierarchy in the post WWII era and three historical case studies examining European informal empire in the nineteenth and early twentieth centuries

National Industrial Strategies and the World Economy John Pinder, 2017-10-10 With the economic crisis continuing into the 1980s the necessity to adapt industrial structures to contemporary requirements became clear This book first published in 1982 is a volume unique in its coverage of the major countries industries and international relationships that together generate the dynamic of structural change Case studies by industrial sector and country are provided as well as thoughtful analysis of a broad range of issues including protectionism foreign investment primary production vs processing and manufacture energy requirements market imperfections employment and the growth of interdependence

U.S. Army War College Guide to National Security Issues: Theory of war and

strategy J. Boone Bartholomees, Army War College (U.S.). Strategic Studies Institute, 2012 This edition of the U S Army War College Guide to National Security Policy and Strategy continues to reflect the structure and approach of the core national security strategy and policy curriculum at the War College The 5th Edition is published in two volumes that correspond roughly to the Department of National Security and Strategy s core courses Theory of War and Strategy and National Security Policy and Strategy Like previous editions this one is based on its predecessor but contains both updates and new scholarship Over a third of the chapters are new or have undergone significant rewrites Many chapters some of which appeared for years in this work have been removed Nevertheless the book remains unchanged in intent and purpose Although this is not primarily a textbook it does reflect both the method and manner we use to teach strategy formulation to America s future senior leaders The book is not a comprehensive or exhaustive treatment of either strategic theory or the policymaking process Both volumes are organized to proceed from the general to the specific Thus the first volume opens with general thoughts on the nature and theory of war and strategy proceeds to look at the complex aspect of power and concludes with specific theoretical issues Similarly the second volume begins by examining the policy strategy process moves to a look at the strategic environment and concludes with some specific issues This edition continues the effort begun in the 4th Edition to include several short case studies to illustrate the primary material in the volume
