**National Curriculum: National Disaster?** Dr Rhys Griffith, Rhys Griffith, 2012-11-12 National Curriculum National Disaster looks beyond the classroom and discusses the way in which the infrastructure of school codes of conduct the physical environment of school sites and the hierarchy of human resources within schools impact on the aims and reality of the National Curriculum An alternative skills based educational programme is also outlined which may be more likely to fulfil the expectations that many parents now hold for the education of their children

**Human Rights in the Field of Comparative Education** Heidi Biseth, 2013-02-11 There is no single answer to the question what are human rights The answer depends on whom you ask Several of the papers presented at Fourteenth World Congress of Comparative Education held at Bog azi i University in Istanbul Turkey in June 2010 discussed issues related to human rights from a comparative education viewpoint The nine papers presented in this book spans from policy analysis to practices in classrooms They include analyses of human rights from a regional or country perspective including Greece Jordan the Latin American region Morocco Northern Ireland Portugal the UK the US and Turkey In facilitating a clarification of the ways in which we understand and talk about human rights in the field of comparative education the editors have analysed and visualized the chapter contributions using Marie B n dicte Dembour s categorization of human rights discourses This is a fruitful exercise as it unravels the fact that we do not always mean the same thing when talking about human rights and also sheds light on the issues within human rights to which we are silent issues that we should conceivably be discussing Our engagement in human rights seems to focus on using these rights as leverage to promote our arguments about education not engaging in a more philosophical debate about human rights Human rights can be used as an ethical lingua franca and thus providing a fertile ground for nuancing our understanding of human rights Since we experience a huge gap between morality and reality an engagement in the ethical perspectives of human rights can help us on the way to closing this gap

**Disaster and Climate Risk Education** Ayse Yildiz, Rajib Shaw, 2024-09-30 Education serves as a cornerstone for gaining knowledge and taking initiative However despite efforts in disaster and climate risk education DCRE a gap often exists between awareness and meaningful action To bridge this gap and promote a progression from awareness to empowerment we offer the KIDA Knowledge Interest Desire Action framework The foundation of this framework is a collaboration between schools communities and families which calls for support from educational boards and local governments Following international tragedies like the Turkey Syria earthquake of 2023 as well as the ever changing difficulties posed by climate change DCRE has to be given priority immediately Our book proposes a comprehensive strategy that includes governance capacity building education in schools and the community and technology integration Our insights analyses and practical policy suggestions are based on multidisciplinary research and worldwide case studies with the goal of strengthening resilience and cultivating a generation committed to sustainability This book provides a comprehensive exploration of DCRE It aims to prepare

**Retrospect** Andre Kraak, Michael F. D. Young, 2001 The Institute of Education has been closely involved with post apartheid developments in education policy in South Africa The book examines the current policy dilemmas in South Africa It also provides a sophisticated exploration of the tensions that can occur between and among policy makers and policy researchers as a local vision is translated into reality in a global context At the same time the book provides clear evidence of the value as well as the difficulty of continuing dialogue between these groups which might usefully be heeded in those countries where such interaction too rarely takes place

*Using Shakespeare's Plays to Explore Education Policy Today* Sophie Ward, 2016-10-26 Shakespeare is revered as the greatest writer in the English language yet education reform in the English speaking world is informed primarily by the market order rather than the kind of humanism we might associate with Shakespeare By considering Shakespeare's dramatisation of the principles that inform neoliberalism this book makes an important contribution to the debate on the moral failure of the market mechanism in schools and higher education systems that have adopted neoliberal policy The utility of Shakespeare's plays as a means to explore our present socio economic system has long been acknowledged As a Renaissance playwright located at the junction between feudalism and capitalism Shakespeare was uniquely positioned to reflect upon the nascent market order As a result this book utilises six of his plays to assess the impact of neoliberalism on education Drawing from examples of education policy from the UK and North America it demonstrates that the alleged innovation of the market order is premised upon ideas that are rejected by Shakespeare and it advocates Shakespeare's humanism as a corrective to the failings of neoliberal education policy *Using Shakespeare's Plays to Explore Education Policy Today* will be of key interest to researchers academics and students in the fields of education policy and politics educational reform social and economic theory English literature and Shakespeare
