

THE NATIONAL QUESTION (continued)

The question that arises in connection with nationalism is whether it is a force for good or evil. It is a force for good when it leads to the creation of a new nation or the restoration of an old one. It is a force for evil when it leads to the destruction of a nation or the oppression of a nation. The question of the national question is a complex one and one that has been debated for centuries. It is a question that has no simple answer and one that is likely to continue to be debated for many years to come.

National Question In Europe In Historical Context:

The National Question in Europe in Historical Context Mikuláš Teich, Roy Porter, 1993-05-06 The historical impact of national movements in Europe has been dramatic and continues to be an issue of major importance Leading historians authoritatively discuss European nationalism in its historical context

Nature and Society in Historical Context Mikulas Teich, Roy Porter, Bo Gustafsson, 1997-02-13 A collection of essays describing the historical connection between nature and society

Economic Change and the National Question in Twentieth-Century Europe Alice Teichova, Herbert Matis, Jaroslav Pátek, 2000-11-30 The authors in this collection of essays address the largely neglected but significant economic aspects of the national question in its historical context during the course of the twentieth century There exists a large gap in our understanding of the historical relationship between the national question and economic change Above all there is insufficient knowledge about the economic dimension of the historical experience with regard to the former multi national states such as the Soviet Union Yugoslavia or Czechoslovakia and equally too little is known about the economic component of national tensions and conflicts in bilingual Belgium or Finland or the multilingual Spain or Switzerland At the same time as emphasis is placed on the complex relationships between the economy and society in individual European countries questions of state identity language religion and racism as instruments of economic

furtherance are at the centre of the contributors attention

Nationalism and Revolution in Europe, 1763-1848 Dean Kostantaras, 2025-10-01 Nationalism and Revolution in Europe 1763 1848 addresses enduring historiographical problems concerning the appearance of the first national movements in Europe and their role in the crises associated with the Age of Revolution Considerable detail is supplied to the picture of Enlightenment era intellectual and cultural pursuits in which the nation was featured as both an object of theoretical interest and site of practice In doing so the work provides a major corrective to depictions of the period characteristic of earlier ventures including those by authors as notable as Hobsbawm Gellner and Anderson while offering an advance in narrative coherence by portraying how developments in the sphere of ideas influenced the terms of political debate in France and elsewhere in the years preceding the upheavals of 1789 1815 Subsequent chapters explore the composite nature of the revolutions which followed and the challenges of determining the relative capacity of the three chief sources of contemporary unrest constitutional national and social to inspire extra legal challenges to the Restoration status quo

The Revolutions in Europe, 1848-1849 Hartmut Pogge von Strandmann, Robert John Weston Evans, 2000 These essays arose out of lectures given in Oxford to commemorate the 150th anniversary of the 1848 revolutions in Europe Authoritative yet readable and colourful they comprise judicious summaries of the existing state of knowledge as well as new insights and unfamiliar information The book also seeks to place the revolutionary events in their wider context apart from chapters covering the main centres of disturbance in France Germany Italy and the Habsburg lands there are discussions of the situation in Britain and Russia which were affected but not

convulsed by the disorders elsewhere of reactions in the United States of America of the symbolism of 1848 for the later democratic radical and socialist movements 1848 marked the first breakdown of traditional authority across much of the continent and as such is of profound significance in the development of modern European politics as a whole

Contemporary Nationalism in East Central Europe Paul Latawski, 2016-07-27 This book provides an introductory survey to contemporary nationalism in East Central Europe It examines the problem of nationalism in the region in the wake of the collapse of communism and attempts to place recent events within a historical context The book contains selected essays devoted to specific countries as well as those covering nationalism on a regional basis A further reading list is included to encourage a deeper probing into the problem of nationalism in East Central Europe [What Is a Nation?](#)

Timothy Baycroft, Mark Hewitson, 2006-06-29 This volume analyses and compares different forms of nationalism across a range of European countries and regions during the long nineteenth century It aims to put detailed studies of nationalist politics and thought which have proliferated over the last ten years or so into a wider European context By means of such contextualization together with new and systematic comparisons What is a Nation Europe 1789 1914 reassesses the arguments put forward in the principal works on nationalism as a whole many of which pre date the proliferation of case studies in the 1990s and which as a consequence make only inadequate reference to the national histories of European states The study reconsiders whether the distinction between civic and ethnic identities and politics in Europe has been overstated and whether it needs to be replaced altogether by a new set of concepts or types What is a Nation explores the relationship between this and other typologies relating them to complex processes of industrialization increasing state intervention secularization democratization and urbanization Debates about citizenship political economy liberal institutions socialism empire changes in the states system Darwinism high and popular culture Romanticism and Christianity all affected and were affected by discussion of nationhood and nationalist politics The volume investigates the significance of such controversies and institutional changes for the history of modern nationalism as it was defined in diverse European countries and regions during the long nineteenth century By placing particular nineteenth century nationalist movements and nation building in a broader comparative context prominent historians of particular European states give an original and authoritative reassessment designed to appeal to students and academic readers alike of one of the most contentious topics of the modern period

From Physico-Theology to Bio-Technology, 2020-01-29 For the last half century Mikul Teich has made many eminent contributions to the histories of science technology medicine and society His essentially Marxist historiographical stance has resisted the notion that science is an autonomous entity and has instead stressed the interplay of the economic the social and the scientific forces in history At the same time particularly in studies of biochemistry he has emphasized the significance of the role of science and technology in modern economic change In a career divided between Czechoslovakia and the UK he has always been highly internationalist in his historical outlooks combining what is valuable in Continental

and British methods This volume is to honour him on his eightieth birthday Examining European developments since the sixteenth century the essays many by old friends and colleagues cluster around themes close to his own personal scholarship and related to volumes which he has edited The book is divided into sections on Questions of History Scientific Lives Disciplines Natural History and Science and Disease *The Significance of Borders* Thierry Baudet, 2012-05-25 For almost three quarters of a century the countries of Western Europe have abandoned national sovereignty as an ideal Nation states are being dismantled by supranationalism from above by multiculturalism from below This book explains why supranationalism and multiculturalism are in fact irreconcilable with representative government and the rule of law It challenges one of the most central beliefs in contemporary legal and political philosophy which is that borders are bound to disappear **The Modern World-System IV** Immanuel Wallerstein, 2011-06-10 Immanuel Wallerstein s highly influential multi volume opus The Modern World System is one of this century s greatest works of social science An innovative panoramic reinterpretation of global history it traces the emergence and development of the modern world from the sixteenth to the twentieth century This new volume encompasses the nineteenth century from the revolutionary era of 1789 to the First World War In this crucial period three great ideologies conservatism liberalism and radicalism emerged in response to the worldwide cultural transformation that came about when the French Revolution legitimized the sovereignty of the people Wallerstein tells how capitalists and Great Britain brought relative order to the world and how liberalism triumphed as the dominant ideology
