National Security In The 1980s From Weakness To Strength:

National Security in the 1980s Willard Scott Thompson,1980-01-01 Analyzes the foreign policy of the United States and recommends that the government make fundamental changes in diplomatic and military strategies *The Politics of National Security* Marcus G. Raskin,1979-01-01 The evolution of the national security state in the United States can be traced from the political military and economic dimensions of American power in the postwar world In Raskin s view the United States emerged from the Second World War with tremendously increased prestige and material power and American leadership created a national security apparatus as a planning instrument to ensure national stability to mute class conflicts and to secure the domestic economy This state then became the basis around the world for covert and overt imperialism The consensus that developed served to maintain stability at home and to guide the modern empire abroad This development required a state that was orderly and that was predicated on modern bureaucracy which operated within the values and assumptions of the ruling elites The national security state system was successful primarily in the economic sphere with bipartisan foreign policy decision making aimed at ensuring a stable business climate at home and abroad Military involvement in Indochina evidenced the decline of American hegemony the genocidal nature of the arms race and the questions raised by protestors of the sixties signaled the break up of the national security consensus Raskin concludes the book with an examination of alternative directions especially regarding the need and the possibilities for renewed public debate of national policy and purpose **Proceedings of the National Security Affairs Conference** ,1974 **National Security Affairs Monograph Series** ,1976 **National Security In The Third World** Abdul-Monem M. Al-Mashat,2019-03-13 For nations of the Third World national security poses serious dilemmas Unlike Western nations less developed countries must balance the complex and often contradictory requirements of socioeconomic and political development with problems of internal stability and the requirements of national defense For these countries a concept of national s National Security in the 1980s W. Gray,2021-10-21 What is Soviet American competition all about Is the Soviet Union a security problem that the United States must solve Or is it an insecurity condition with which the U S must learn to live and if so on what terms What kind of a player is the United States in the great game of power politics In *The Geopolitics of Super Power* one of our most respected strategic theorists answers these and other questions In geopolitical terms Colin Gray sees the Soviet American antagonism as an enduring contest between a continental empire and a maritime coalition each with its distinctive character and purposes Gray explores the roots of the American style in foreign policy and strategy and how that style relates to defense options He identifies four broad alternatives for U S national security policy passive and active means of containment disengagement from foreign security commitments and the rollback

of the Soviet empire Gray argues vigorously for active containment for the systematic deemphasis of nuclear weapons and for the intelligent use for deterrence and defense purposes of the West's great competitive strengths in the political economic and technological spheres
