National Toxicology Program Chemical Data Compendium:

National Toxicology Program's Chemical Solubility Compendium Lawrence H. Keith, Douglas B. Walters, 2019-11-11 This book is a compilation of experimentally determined solubility ranges of over 1 700 compounds in the National Toxicology Program's Chemical Repository. Each compound's solubility was determined in a consistent manner in one to six solvents. Solvents chosen were those most commonly used for toxicology studies: spill cleanups and chemical synthesis or chemical reaction experiments. These solvents include acetone, 95% ethanol, water, dimethyl sulfoxide, methanol, and toluene. Data for many of the research and industrial chemicals featured in this volume do not exist anywhere else. If you are a toxicologist, safety professional, industrial hygienist, or chemist, this book is a valuable reference tool you'll find yourself using every day.

The National Toxicology Program's Chemical Data Compendium Lawrence H. Keith, Douglas B. Walters, 1992-02-04 This Compendium provides a vast amount of information about potentially toxic chemicals to regulatory and research agencies, consultants, academics, and libraries.

The National Toxicology Program's Chemical Data Compendium Lawrence H. Keith, Douglas B. Walters, 1992

The National Toxicology Program's Chemical Data Compendium Lawrence H. Keith, Douglas B. Walters, 1991-12-20 This Compendium provides a vast amount of information about potentially toxic chemicals to regulatory and research agencies, consultants, academics, and libraries. The National Toxicology Program's Chemical Data Compendium consists of eight volumes containing 50 fields that present detailed information on 2 270 different chemicals. The data is obtained from the literature or experimentally determined. Each compound is listed in every volume even when there is no information available for it in some volumes. Information in the NTP Compendium was gathered and updated as compounds were used throughout a 12 year period from 1979 to 1991. Throughout the eight volumes, the primary chemical name and the Chemical Abstracts Service Registry Number (CAS No.) remain constant, and all 2 270 chemicals are listed alphabetically in each volume. Use the eight volumes together to get the full benefit of the NTP Chemical Data Compendium, or select only those volumes that contain the information you need and use them as stand-alone references.

The National Toxicology Program's Chemical Data Compendium Lawrence H. Keith, Douglas B. Walters, 1991-12-31 This Compendium provides a vast amount of information about potentially toxic chemicals to regulatory and research agencies, consultants, academics, and libraries.
