Nationality And Statelessness In International Law:

Nationality and Statelessness in International Law Paul Weis, 1979-12-13 This second revised edition takes into account the decision of the International Court of Justice in the Nottebohm Case which was published just as the first edition was going to press and therefore received only cursory treatment It also of course includes an analysis of international legislation adopted since 1955 including the 1961 UN Convention on the Reduction of Statelessness the 1957 UN Convention on the Nationality of Married Women and the 1966 International Covenant on Civil and Political Rights The decisions of international tribunals and in particular of the Italian Conciliation Commissions are analysed Finally the author presents legislative judicial and governmental practice during the twenty two years After beginning with a clear definition of terms the author analyses the functions of nationality in international law the relationship between municipal and international law and then the public international law of nationality In this latter part he examines international conventions international custom and the principles of law generally recognized with regard to nationality The book ends with a summary and conclusions dealing with the existing law and future developments

Minority Rights Protection in International Law Helen O'Nions, 2016-04-22 There are approximately ten million Roma in Europe making them the continent's largest non territorial minority Despite this fact the Roma continue to experience routine discrimination and marginalization in European countries As a result they are seldom engaged in national political activism and are frequently at the bottom of the economic and social ladder The severity of exclusion experienced by the Roma in societies which have long paid heed to the notion of individual universal human rights combined with their geographical dispersal and heterogeneous nature makes the study of the Roma highly informative This book examines the theoretical debate concerning the most appropriate way of protecting the fundamental human rights of the Roma which also illuminates ways in which the rights of minority groups can be protected more generally As a result this work will be a valuable resource for social scientists and practitioners in the field of human rights
