Arturo Cuomo

Nationalization Of The Social Sciences:

The Nationalization of the Social Sciences Samuel Z. Klausner, Victor M. Lidz, 2016-11-11 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 1 100 titles from Penn Press s distinguished backlist from 1899 1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer reviewed scholarship in a wide range of subject areas *The Romance of American Psychology* Ellen Herman, 1996-01-01 A wonderfully written book about a little recognized but enormously significant process that has shaped contemporary American political culture Cynthia Enloe author of *The Morning After*

Alternative Discourses in Asian Social Science Syed Farid Alatas, 2006-05-10 This book situates Asian social sciences in the global context in terms of the perspectives that have evolved and the contributions they have made to the general body of knowledge in the field More than a mere chronology of key growth points of various social science disciplines in the vast region of Asia and the Pacific the book focuses on major theoretical problems and issues and offers a critique of various approaches and orientations pursued by scholars worldwide in the investigation of Asian societies and cultures **Social Studies of Science** Bernard Barber, 1990-01-01 One of the first and premier specialists in the sociology of science presents seventeen published and unpublished essays in Social Studies of Science This rich volume is introduced by a long essay *The Multiple Diverse and Unexpected Origins of the Sociology of Science* a sociological analysis of the fifty years of development of what has finally become the fully realized field of the sociology of science Barber s personal connection with this development makes this analytical essay a vivid contribution to the history of sociology **The Word As Scalpel** Samuel W. Bloom, 2002-05-23 A doctor can damage a patient as much with a misplaced word as with a slip of the scalpel In this statement from Lawrence J Henderson a famous physician whose name is part of the basic science of medicine epitomizes the central theme of *The Word as Scalpel* If words the main substance of human relations are so potent for harm how equally powerful they can be to help if used with disciplined knowledge and understanding Nowhere does this simple truth apply more certainly than in the behavior of a physician Medical Sociology studies the full social context of health and disease the interpersonal relations social institutions and the influence of social factors on the problems of medicine Throughout its history medical sociology divides naturally into two parts the pre modern represented by various studies of health and social problems in Europe and the United States until the second World War and the modern post war period The modern period has seen rapid growth and the achievement of the full formal panoply of professionalism This engaging account documents the development of professional associations official journals and programs of financial support both private and governmental Written by a distinguished pioneer in medical sociology *The Word as Scalpel* is a definitive study of a relatively new but critically important field *Sociology in Post-Normal Times* Charles Thorpe, 2022-02-28 The Covid 19 pandemic and the disruptions of climate change are features of post normal times In *Sociology in Post Normal Times* Charles Thorpe

contends that the modern project of creating normalcy within the nation state has broken down Integral to this is sociology which is the science of social reform Drawing from the work of seminal theorists such as Zygmunt Bauman and Anthony Giddens Thorpe contends that sociology's society is no longer viable because globalization has put an end to social reform thus the assumptions and goals of sociology must be left behind in order to create a new global humanity In the face of the pandemic and climate change Sociology in Post Normal Times demands no less than the birth of a global humanity beyond nation states as the precondition for human survival De-Westernizing Communication Research Georgette Wang, 2010-12-14 The rise of postmodern theories and pluralist thinking has paved the way for multicultural approaches to communication studies and now is the time for decentralization de Westernization and differentiation This trend is reflected in the increasing number of communication journals with a national or regional focus Alongside this proliferation of research output from outside of the mainstream West there is a growing discontent with communication theories being Westerncentric Compared with earlier works that questioned the need to distinguish between the Western and the non Western and to build Asian communication theories there seems to be greater assertiveness and determination in searching for and developing theoretical frameworks and paradigms that take consideration of and therefore are more relevant to the cultural context in which research is accomplished This path breaking book moves beyond critiquing Westerncentrism in media and communication studies by examining where Eurocentrism has come from how is it reflected in the study of media and communication what the barriers and solutions to de centralizing the production of theories are and what is called for in order to establish Asian communication theories *Values of American Society* Talcott Parsons, Winston White, 2016 The material in *Values of American Society* remains the principal resource for understanding Parsons conception of value systems His treatment of value systems has been much debated although poorly understood in considerable part because Parsons never published his full conception developed only in these manuscripts They continue to hold interest for social scientists both for their carefully developed analytical scheme and for the resulting discussion of American culture and society *Series Studies in the Theory of Action Vol 3 Subject Sociology American Studies* **Sociology and Anthropology in Twentieth Century China** Arif Dirlik, Guannan Li, Hsiao-pei Yen, 2012-02-03 Within this text the contributors provide a historical perspective on the development of anthropology and sociology since their introduction to Chinese thought and education in the early twentieth century with an emphasis on the 1930s and 1980s The authors offer different windows on theoretical and research agendas of anthropologists and sociologists of the PRC and Taiwan shaped as much by their political context as by disciplinary training In examining the careers of several individual scholars they also make note not only of their creative contributions but also of the resonance of their intellectual concerns with contemporary issues in sociology and anthropology culturalism frontiers women Finally the volume is organized loosely around the problem of how to translate these disciplines into a Chinese context's the issues of indigenization bentuhua or making Chinese Zhongguohua which have haunted the two

disciplines since their establishment in the 1930s because of the contradictory expectations that they generate This is where the case of China resonates with similar concerns in other societies where the disciplines were imported from abroad as products of a Euro American capitalist modernity conflicting with aspirations to create their own localized alternative modernities **Columbia Studies in the Social Sciences** ,1915

Nationalization Of The Social Sciences Book Review: Unveiling the Magic of Language
