Nations Unbound:

Nations Unbound Linda Basch, Nina Glick Schiller, Cristina Szanton Blanc, 2020-07-24 Nations Unbound is a pioneering study of an increasing trend in migration transnationalism Immigrants are no longer rooted in one location By building transnational social networks economic alliances and political ideologies they are able to cross the geographic and cultural boundaries of both their countries of origin and of settlement Through ethnographic studies of immigrant populations the authors demonstrate that transnationalism is something other than expanded nationalism By placing immigrants in a limbo between settler and visitor transnationalism challenges the concepts of citizenship and of nationhood itself **The Multisite Nation** Michel S. Laguerre, 2016-06-21 This book explains the transformation of the nation into a cosmonation or multisite nation through the reunification of the homeland with its diaspora The book elaborates on how the mechanisms of linkages connections and networking interact to form distributed sites of homeland and diaspora into a cosmonation and how diasporans in different units of such a crossborder social formation wherever they relocate relate to each other The ensemble thereby functions as a cultural and political collectivity manifested through cultural traditions inter site familial institutional and associational ties transnational solidarity and reverence for the ancestral homeland Emigration Nations M. Collyer, 2013-10-16 Some states have a long history of reaching out to citizens living in other countries but since 2000 it has become much more common for states to encourage loyalty from current or former citizens living abroad Using detailed case studies this book sets out to explain this significant development with an innovative new theoretical framework *The Necessary Nation* Gregory Jusdanis, 2011-06-27 In this controversial look at nationalism Gregory Jusdanis offers a sweeping defense of the nation as a protector of cultural difference and a catalyst for modernization Since the end of the Cold War the nation state has undergone intense scrutiny among critics in the media and the academy Many believe that civic nationalism may be fruitful but that cultural nationalism fosters xenophobia and backward thinking Jusdanis however emphasizes the positive collaboration between nation building and culture Through a series of critical readings of multicultural postcolonial and globalization theories the author reveals how nationalism enables people to defend their distinctive ways of life to fight colonial oppression and to build an independent society of citizens He explains why people over the last two hundred years have politicized their ethnic identities and have sought a union of culture and power within an autonomous nation state While seeking to defend nationalism Jusdanis also examines its potential to unleash extraordinary violence into the world He thus proposes federalism as a political solution to the challenges posed by nationalism and globalization Jusdanis applies the tools of disciplines ranging from anthropology to philosophy as he explores the nation building projects of numerous and diverse countries around the world What emerges is a fresh perspective on the subjects of national culture identity political nations globalization postcolonialism and diaspora *Nations and Nationalism* Philip Spencer, Howard Wollman, 2005 Nationalism is a key area of political theory with a huge amount of literature available This text includes both the core texts in this area and

a selection of less mainstream pieces with the aim of engaging readers with contemporary debates which have reconfigured understanding of nationalism *Nations and Nationalism* Guntram H. Herb, David H. Kaplan, 2008-05-22 A comprehensive and revealing compilation of essays analyzing the varied dimensions of national identities and nationalisms across world regions and through time The pervasiveness of nationalism its many manifestations over the centuries and the widely scattered way it has been studied make it a particularly difficult subject to approach and explore ABC CLIO offers the finest comprehensive reference available on an essential topic in modern world history Across four volumes *Nations and Nationalism A Global Historical Overview* covers all aspects of nationalism in all parts of the world from the time of the French Revolution to the present day *Nations and Nationalism* helps students researchers and other interested readers explore national identities and nationalistic movements in historical context Organized chronologically its four volumes combine thematic essays on different characteristics of nationalism with case studies of key historical developments involving specific nations at specific times The encyclopedia focuses on Europe Latin America Africa and Asia with featured coverage of nationalist cultural creations including literature music symbols and mythologies **The Dialogic Nation of Cape Verde** , Márcia Rego, 2015-04-08 *The Dialogic Nation of Cape Verde* Slavery Language and Ideology is an ethnographic study of language use and ideology in Cape Verde from its early settlement as a center for slave trade to the postcolonial present The study is methodologically rich and innovative in that it weaves together historical linguistic and ethnographic data from different eras with sketches of contemporary life a homicide trial a scholarly meeting a competition for a new national flag a heterodox Catholic mass an analysis of love letters a priest's sermon and a death in the neighborhood In all these different contexts Márcia Rego focuses on the role of Kriolu the Cape Verdean Creole and its relation to Portuguese that is on the way people live through speaking *The Dialogic Nation of Cape Verde* shows how through the dialogic give and take of the two languages Cape Verdeans wrestle with deep seated colonial hierarchies invent and rehearse new traditions and articulate their identity as a sovereign creole nation **Race, Nation, and Religion in the Americas** Henry Goldschmidt, Elizabeth McAlister, 2004-08-12 A collection of new essays exploring the complex and unstable articulations of race and religion Drawing on original research the authors investigate how race and religion have defined global relations shaped the everyday lives of individuals and communities and how communities use religion to contest the power of racism Language, Nation and Development in Southeast Asia Lee Hock Guan, 2003-08-01 Language policies in Southeast Asia have been shaped by the process of nation building on the one hand and by political and economic considerations on the other The early years of nation building in Southeast Asia generated intensive language conflicts precisely because state policies privileged the idea of a monolingual nation and thus endeavoured to co opt or even do away with troublesome ethnic identities In recent years language policies are increasingly influenced by pragmatic considerations especially globalization and the awareness of a linkage between language and economic development such that Southeast Asian states in varying

degrees have become less insistent on promoting monolingual nationalism This book evaluates the successes and drawbacks of language policies in Indonesia Malaysia Singapore the Philippines Thailand Vietnam and Myanmar especially the ways in which these policies have often been resisted or contested It is an invaluable primer on this linguistically complex region and a resource for scholars policy makers civil society activists and NGOs in various parts of the world facing equally challenging ethnic language issues Migration, Identity and Resistance in the Postcolonial Nation-State Sk Sagir Ali,Tanmoy

Kundu,Saikat Sarkar,Sanjoy Saren,2025-02-25 This volume represents a significant contribution to the fields of migration studies postcolonial theory and critical geography It critically engages with the intersections of power space and identity to deepen our understanding of the challenges and possibilities of negotiating citizenship and belonging in an increasingly interconnected and precarious world The book interrogates the construction of nationalist narratives and their role in perpetuating exclusionary paradigms which marginalize certain demographic segments and reinforce hierarchical notions of belonging Further it examines the bio political mechanisms that engender conditions of precarity reshaping conceptions of citizenship and nationhood in response to environmental degradation population control policies and state surveillance The essays in the volume delve into the diverse factors driving displacement encompassing both state driven policies of engineered displacement and environmental factors such as climate change resource depletion and natural disasters They also focus on the marginalized spaces of displacement and explore how these sites become loci of resistance and incubators of alternative forms of belonging Interdisciplinary in its approach and rigorous in its empirical analysis the volume will stimulate further research provoke new questions and inspire transformative interventions in the fields of migration and diaspora studies literary and cultural studies politics and political processes and sustainability studies
