A Sourcebook for Genealogical Research Foster Stockwell, 2015-09-18 Genealogists can sometimes require obscure resources when in search of information about ancestors Tracking down records to complete a family tree can become laborious when the researcher doesn't know where to begin looking Many of the best resources are maintained regionally or even locally and aren't widely known This reference work serves as a guide to both beginning and experienced genealogy researchers The sourcebook is easily accessible and usable featuring approximately 270 entries on all aspects of genealogical research and family history compilation The entries are listed alphabetically and cross referenced so any researcher can quickly find the information he or she is seeking Each state and each of the provinces of Canada has its own entry other countries are listed under appropriate headings The author also provides more than 700 addresses from all over the world so that the genealogist or general researcher may contact any one of these organizations to obtain specific information about particular births deaths marriages or other life events in order to complete a family tree

Genealogy and Ontology of the Western Image and Its Digital Future John Lechte, 2012 With the emerging dominance of digital technology the time is ripe to reconsider the nature of the image Some say that there is no longer a phenomenal image only disembodied information 0 1 waiting to be configured For photography this implies that a faith in the principle of an evidential force of the impossibility of doubting that the subject was before the lens is no longer plausible Technologically speaking we have arrived at a point where the manipulation of the image is an ever present possibility when once it was difficult if not impossible What are the key moments in the genealogy of the Western image which might illuminate the present status of the image And what exactly is the situation to which we have arrived as far as the image is concerned These are the questions guiding the reflections in this book In it we move in Part 1 from a study of the Greek to the Byzantine image from the Renaissance image and the image in the Enlightenment to the image as it emerges in the Industrial Revolution Part 2 examines key aspects of the image today such as the digital and the cinema image as well as the work of philosophers of the image including Roland Barthes Walter Benjamin Gilles Deleuze Jean Paul Sartre and Bernard Stiegler
