Nato Air Launched Weapons:

NATO Air-launched Weapons Jeremy Flack, 2002 *NATO Air Launched Weapons* is a detailed illustrated guide to every weapon currently carried by aircraft belonging to NATO. This includes weapons of the traditional Western members but also more recent members from the former Warsaw Pact including Czech Republic, Poland and Hungary. NATO plans to rationalize its weapon stocks but at present it boasts a bewildering variety of different weapons and systems. This invaluable book unravels them. Every type of air launched weapon from bomb and missile to torpedo and rocket is illustrated and described and its specifications and capability neatly presented in an easy to compare format. It will be an invaluable resource for all aircraft enthusiasts, modellers and people interested in the air defense of Europe.

Aircraft Systems Integration of Air-Launched Weapons Keith A. Rigby, 2013-02-21 From the earliest days of aviation where the pilot would drop simple bombs by hand to the highly agile, stealthy aircraft of today that can deliver smart ordnance with extreme accuracy, engineers have striven to develop the capability to deliver weapons against targets reliably, safely and with precision. *Aircraft Systems Integration of Air Launched Weapons* introduces the various aspects of weapons integration primarily from the aircraft systems integration viewpoint but also considers key parts of the weapon and the desired interactions with the aircraft required for successful target engagement. Key features: Addresses the broad range of subjects that relate directly to the systems integration of air launched weapons with aircraft such as the integration process, system and subsystem architectures; the essential contribution that open international standards have on improving interoperability and reducing integration costs and timescales; Describes the recent history of how industry and bodies such as NATO have driven the need for greater interoperability between weapons and aircraft and worked to reduce the cost and timescales associated with the systems integration of complex air launched weapons with aircraft; Explores future initiatives and technologies relating to the reduction of systems integration costs and timescales. The systems integration of air launched weapons with aircraft requires a multi-disciplinary set of engineering capabilities. As a typical weapons integration life cycle spans several years, new engineers have to learn the skills required by on-the-job training and working with experienced weapons integrators. *Aircraft Systems Integration of Air Launched Weapons* augments hands-on experience thereby enabling the development of subject matter expertise more quickly and in a broader context than would be achieved by working through the life cycle on one specific project. This book also serves as a useful revision source for experienced engineers in the field.

Modernizing NATO's Nuclear Weapons Oliver Ramsbotham, 1989-03-03 An examination of the current state of nuclear forces which explores the official defence policies of all 16 NATO countries, the rationale behind modernization plans and the opposition to these plans. The author establishes principles to guide continuing controversy in this area.
