Natural Conflict Resolution

Maria Brockhaus

Natural Conflict Resolution:

Natural Conflict Resolution Filippo Aureli, Frans B. M. Waal, 2000 Annotation Aggression and competition are customarily presented as the natural state of affairs in both human society and the animal kingdom Yet as this book shows our species relies heavily on cooperation for survival as do many others from wolves and dolphins to monkeys and apes A distinguished group of fifty two authors including many of the world s leading experts on human and animal behavior review evidence from multiple disciplines on natural conflict resolution making the case that reconciliation and compromise are as much a part of our heritage as is waging war Chimpanzees kiss and embrace after a fight Children will appeal to fairness when fighting over a toy Spotted hyenas usually thought to be a particularly aggressive species use reconciliation to restore damaged relationships As these studies show there are sound evolutionary reasons for these peacekeeping tendencies This book also addresses the cultural ecological cognitive emotional and moral perspectives of conflict resolution

Natural Conflict Resolution Filippo Aureli, Frans B. M. Waal, 2000-08-07 Filippo Aureli and Frans De Waal have succeeded in cross fertilizing fields as disparate as ethology and medieval law to create a rich new field of research natural conflict resolution It makes one see conflict resolution among humans through a new and fascinating lens This is a landmark contribution William Ury co author Getting to YES author of Getting Past No and Getting to Peace

Natural Conflict Resolution in Humans Maaike M. Kempes, 2008

Natural Healing as Conflict Resolution Nicholson, Rebecca, 2020-10-16 Traditional methods for addressing conflict and healing have been largely replaced in elite settings by modern approaches Rather than old and new complementing one another bias is present New is widely perceived as better among elite institutions even when research indicates otherwise Within the realm of international development the need for cost effective sustainable and successful methods of healing must be explored Natural Healing as Conflict Resolution is an essential reference book that examines and addresses systemic bias towards natural healing methods and explores the mutually beneficial relationships of natural healing through human and non human life forms in the context of resolving conflict It illustrates not only the more obvious biological physiological benefits of complementary approaches but also the spiritual emotional and psychological benefits of integrating natural means of healing to resolve conflict As such the book acknowledges the effectiveness and articulates the benefits of traditional indigenous healing methods and how they can be used in complementary mutually beneficial ways with modern practices Highlighting emerging topics that include ecopsychology parapsychology and holistic medicine this book is ideal for conflict resolution practitioners psychologists trauma counselors veterans associations pet therapists nature organizations academics scientists eco architects and designers international development policymakers peacebuilding institutions natural and traditional healers alternative integrative medicine practitioners spiritualists researchers and students

Conflict Resolution and Mediation in Natural Resource Management in Nepal Krishna Prasad Oli, 1998

From conflict to collaboration in natural resource management Röttinger, L., Janáen, A., Knupp, C., Griestop, L.,

Natural resource management is closely linked to conflict management prevention and resolution. Managing natural resources involves reconciling diverging interests that often lead to conflict which can undermine management institutions and lead to exploitation, environmental destruction and deteriorating livelihoods. If conflicts turn violent they can rip apart the entire fabric of society. Thus managing conflicts in a peaceful manner is decisive not only for successful and sustainable resource management but for societal stability in general. Despite this connection the knowledge and experience gained in the fields of conflict transformation and peacebuilding in the last decades are often not used by natural resource managers. One reason is that this knowledge has not been translated into user friendly resources that can be easily understood by practitioners without prior experience in these fields. This handbook and toolkit helps fill this gap providing an orientation to the issues and a suite of practical exercises and tools to support participatory processes.

Potentials and Obstacles in the Arena of Conflict and Natural Resource Management Maria Brockhaus, 2005 *Natural Resource Conflicts and Sustainable Development* E. Gunilla Almered Olsson, Pernille Gooch, 2019-04-12. Providing both a theoretical background and practical examples of natural resource conflict this volume explores the pressures on natural resources leading to scarcity and conflict. It is shown that the causes and driving forces behind natural resource conflicts are diverse, complex and often interlinked including global economic growth, exploding consumption, poor governance, poverty, unequal access to resources and power. The different interpretations of nature culture and the role of humans in the ecosystem are often at the centre of the conflict. Natural resource conflicts range from armed conflicts to conflicts of interest between stakeholders in the North as well as in the South. The varying driving forces behind such disputes at different levels and scales are critically analysed and approaches to facilitate and enforce mediation, transformation and collaboration at these levels and scales are presented and discussed. In order to transform existing resource conflicts as well as to decrease the risk of future conflicts, approaches that enhance and enforce collaboration for sustainable development at global, regional, national and local levels are reviewed and sustainable pathways suggested. A range of global examples is presented including water resources, fisheries, forests, human wildlife conflicts, urban environments and the consequences of climate change. It will be a valuable text for advanced students of natural resource management, environment and development studies and peace and conflict management. The book will also be of interest to practitioners in the field of natural resource management.

Negotiation and mediation techniques for natural resource management. Case studies and lessons learned, Stakeholder Dialogues in

Natural Resources Management Susanne Stoll-Kleemann, Martin Welp, 2007-01-10. Participatory Processes for Natural Resource Management. Ortwin Renn, University of Stuttgart, Stuttgart, Germany. Need for analytic deliberative processes. Inviting the public to be part of the decision making process in natural resource management has been a major objective in European and American environmental policy arenas. The US National Academy of Sciences has encouraged environmental protection agencies to foster citizen participation and public involvement for making environmental policy making and

natural resource management more effective and democratic Stern and Fineberg 1996 The report emphasizes the need for a combination of assessment and dialogue which the authors have framed the analytic deliberative approach Unfortunately early public involvement of the public in deliberative processes may compromise however the objective of efficient and effective policy implementation or violate the principle of fairness Cross 1998 Okrent 1998 Another problem is that the public consists of many groups with different value structures and preferences Without a systematic procedure to reach consensus on values and preferences the public s position often appears as unclear Coglianese 1997 Rossi 1997 Participatory processes are thus needed that combine technical expertise rational decision making and public values and preferences How can and should natural resource managers collect public preferences integrate public input into the management process and assign the appropriate roles to technical experts stakeholders i e
