Preschool Teachers Month By Month Activities Program:

Child Advocacy and Early Childhood Education Policies in the Caribbean Ilene R. Berson, Michael J. Berson, 2015-10-01

This volume explores early childhood education policies and practices in the Caribbean. Early childhood development has gained increasing importance as part of national agendas to achieve social and economic goals. Regional guidelines and action plans have been developed but progress across nations varies. Chapters in the book analyze child policies and issues, critically examine progress on alignment between policies and practices, and propose recommendations for advocacy and implementation that may advance the early childhood development agenda throughout the Caribbean. The book includes the perspectives of early childhood practitioners, policymakers, caregivers, representatives from family agencies, as well as other key stakeholders in the education of young children. Across these diverse viewpoints is a shared commitment to children's well-being and the necessity of an integrated response that captures the challenges and opportunities of early childhood development services and initiatives that are framed based on contextual relevance and cultural appropriateness. Part One includes chapters that advocate for national policies throughout the Caribbean to support young children. Chapters in Part Two call for quality early childhood programming that is based on the tenets of developmentally appropriate practice. Part Three considers the pedagogical dilemmas that arise in math and literacy when schools neglect purposeful and engaging early childhood curriculum. Part Four presents various perspectives on child protection and the necessary infrastructure of policies and practices to ensure cognitive, social, and physical development of young children in the Caribbean. This important resource promotes critical discourse on the current status of children and efforts that have been developed to effectively advocate for the rights of the young.

Cradle to Kindergarten Ajay Chaudry, Taryn Morrissey, Christina Weiland, Hirokazu

Yoshikawa, 2021-03-25 Early care and education in the United States is in crisis. The period between birth and kindergarten is a crucial time for a child's development. Yet vast racial, ethnic, and socioeconomic disparities that begin early in children's lives contribute to starkly different long-term outcomes for adults. Compared to other advanced economies, child care and preschool in the U.S. are scarce, prohibitively expensive, and inadequate in quality for most middle- and low-income families. To what extent can early life opportunities provide these children with the same life chances of their affluent peers and contribute to reduced social inequality in the long term and across generations? The updated second edition of *Cradle to Kindergarten* offers a comprehensive evidence-based strategy that diagnoses the obstacles to accessible early education and charts a path to opportunity for all children. The U.S. government invests less in children under the age of five than do most other developed nations. Most working families must seek private child care, but high-quality child care options are expensive.

relative to the means of most families This means that children from lower income households who would benefit most from high quality early education are the least likely to attend them Existing policies such as pre kindergarten in some states are only partial solutions and what exists varies tremendously in terms of access and quality To address these deficiencies the authors propose to overhaul the early care and education system beginning with a federal paid parental leave policy that provides both mothers and fathers with time and financial support after the birth of a child They also advance an expansion of the child care tax credit and a new child care assurance program that provides grant assistance towards the cost of high quality early care for low and moderate income families Their plan establishes universal high quality early education in the states starting by age three and a reform of the Head Start program that would include more intensive services for families living in areas of concentrated poverty and experiencing multiple adversities from the earliest point in these most disadvantaged children's lives They conclude with an implementation plan and contend that these reforms are attainable well within a ten year timeline Reducing educational and economic inequalities requires that all children have robust opportunities to learn and fully develop their capacities and have a fair shot at success Cradle to Kindergarten presents a blueprint for fulfilling this promise by expanding access to educational and financial resources at a critical stage of child development

International Handbook of Child Care Policies and Programs Moncrieff Cochran, 1993-04-22 This reference offers a comprehensive overview of public policies and programs related to child care in Africa Asia Latin America Oceania Europe and North America Individual chapters profile policies and programs in 29 countries Each chapter contains a description of existing policies and programs presented against a particular historical cultural and ideological backdrop The chapters are arranged in alphabetical order to facilitate use as a reference and each includes a list of works for further reading The volume begins with an introductory essay that overviews recent trends and developments around the world The chapters that follow discuss the background and history of child care demographic characteristics of the country profiled the socioeconomic context of child care and the extent and nature of government intervention A final chapter synthesizes the information presented and makes crossnational comparisons of policies and programs Appendices provide demographic data and describe maternity and parental leave policies A general bibliography concludes the work making it a useful and current reference tool

Logics of Socialist Education Tom G. Griffiths, Zsuzsa Millei, 2012-09-14 For some socialism is a potent way of achieving economic political and social transformations in the twenty first century while others find the very term socialism outdated This book engages readers in a discussion about the viability of socialist views on education and identifies the capacity of some socialist ideas to address a range of widely recognized social ills It argues that these pervasive social problems which plague so called developed societies as much as they contribute to the poverty humiliation and lack of prospects in the rest of the world fundamentally challenge us to act In our contemporary world system distancing ourselves from the injustices of others is neither viable nor defensible Rather than waiting for radically new solutions to emerge this

book sees the possibility of transformation in the reconfiguration of existing social logics that comprise our modern societies including logics of socialism The book presents case studies that offer a critical examination of education in contemporary socialist contexts as well as reconsidering examples of education under historical socialism In charting these alternatives and retooling past solutions in a nuanced way it sets out compelling evidence that it is possible to think and act in ways that depart from today s dominant educational paradigm It offers contemporary policy makers researchers and practitioners a cogent demonstration of the contemporary utility of educational ideas and solutions associated with socialism A pioneering collection of essays which is central to understanding the historical and contemporary meanings of socialism in the context of neoliberal globalization It is a most timely contribution to a growing intellectual project that challenges the hegemony of capitalism while re thinking and theorizing alternatives Iveta Silova Associate Professor of Comparative Education Lehigh University Bethlehem PA USA In this significant contribution to recent scholarship the authors use the lens of socialist education to offer an original critique of hegemonic capitalism and present an intellectually rigorous search for alternatives by reconsidering historical socialism and advancing promising educational experiments that challenge the global architecture of education Anders Breidlid Professor of International Education and Development Oslo University College Norway
