

THE PRESENCE OF LIGHT

Divine Radiance and Religious Experience

EDITED BY Matthew T. Kapstein

Presence Of Light Divine Radiance And Religious Experience

Costas Papadopoulos, Holley Moyes

Presence Of Light Divine Radiance And Religious Experience:

The Presence of Light Matthew T. Kapstein, 2004-11-03 There is perhaps no greater constant in religious intuition and experience than the presence of light In spiritual traditions East and West light is not only ubiquitous but something that assumes strikingly similar forms in altogether different historical and cultural settings This study examines light as an aspect of religiously valued experiences and its entailments for mystical theology philosophy politics and religious art The essays in this volume make an important contribution to religious studies by proposing that it is misleading to conceive of religious experience in terms of an irreconcilable dichotomy between universality and cultural construction An esteemed group of contributors representing the study of Asian and Western religious traditions from a range of disciplinary perspectives suggests that attention to various forms of divine radiance shows that there is indeed a range of principles that if not universal are nevertheless very widely occurring and amenable to fruitful comparative inquiry What results is a work of enormous scope demonstrating compelling cross connections that will be of value to scholars of comparative religions mysticism and the relationship between art and the sacred Contributors Catherine B Asher Raoul Birnbaum Sarah Iles Johnston Matthew T Kapstein Andrew Louth Paul E Muller Ortega Elliot R Wolfson Mimi Hall Yiengpruksawan Hossein Ziai

The Presence of the Infinite Steve McIntosh, 2015-10-01 The Presence of the Infinite sheds new light on the important subject of spiritual experience Using the emerging insights of evolutionary spirituality integral philosopher Steve McIntosh enlarges readers capacity to have spiritual experience more abundantly and use it more effectively to improve their lives and the world around them The Presence of the Infinite starts by providing a timely cultural analysis and critique of the various forms of spirituality that are vying for influence in contemporary American society Building on this context McIntosh shows how evolutionary spirituality overcomes the limitations of religious secular and New Age spirituality by better harmonizing science and spirit Evolutionary spirituality s transcendent potential is found in its deepening realization of the essentially spiritual qualities of beauty truth and goodness McIntosh then uses evolutionary spirituality s enlarged understanding of what spiritual experience is and how it works to consider the question of ultimate reality This leads to an examination of conflicting ideas that regard spirit as either formless and nondual or as loving and creative By working to harmonize and integrate these alternative conceptions of ultimate reality McIntosh shows how evolutionary spirituality can achieve a synthesis of nondual and theistic teachings of truth that can produce a spiritual renaissance in America and beyond The Presence of the Infinite is destined to become a definitive text in the exciting new field of evolutionary spirituality **Naked**

Seeing Christopher Hatchell, 2014-09-03 Buddhism is in many ways a visual tradition with its well known practices of visualization its visual arts its epistemological writings that discuss the act of seeing and its literature filled with images and metaphors of light Some Buddhist traditions are also visionary advocating practices by which meditators seek visions that arise before their eyes Naked Seeing investigates such practices in the context of two major esoteric traditions the Wheel of

Time Kalacakra and the Great Perfection Dzogchen Both of these experimented with sensory deprivation and developed yogas involving long periods of dwelling in dark rooms or gazing at the open sky These produced unusual experiences of seeing which were used to pursue some of the classic Buddhist questions about appearances emptiness and the nature of reality Along the way these practices gave rise to provocative ideas and suggested that rather than being apprehended through internal insight religious truths might also be seen in the exterior world realized through the gateway of the eyes Christopher Hatchell presents the intellectual and literary histories of these practices and also explores the meditative techniques and physiology that underlie their distinctive visionary experiences The book also offers for the first time complete English translations of three major Tibetan texts on visionary practice a Kalacakra treatise by Yumo Mikyo Dorj The Lamp Illuminating Emptiness a Nyingma Great Perfection work called The Tantra of the Blazing Lamps and a B n Great Perfection work called Advice on the Six Lamps along with a detailed commentary on this by Drugom Gyalwa Yungdrung

Mystical Luminosity Experience Jonathan Dinsmore,2024-07-01 Light of a divine or transcendent nature is widely revered in various religious and mystical traditions around the world and luminosity with mystical qualities such as love bliss peace and noetic realization is also frequently reported by contemporary experiencers Despite being described as a profoundly significant sacred and transformative experience mystical luminosity has received relatively little attention in modern scholarship and scientific study and has only been examined empirically within isolated contexts such as NDEs or contemplative practices This study examines the phenomenology which binds mystical luminosity across various experiential contexts to construct a phenomenologically grounded theoretical model A three part mixed methods investigation using a new mystical luminosity experience scale based on this model is then summarized with findings generally supporting and further clarifying the model Dreaming Reality Vladimir Miskovic,Steven Jay Lynn,2025-02-04 Dreaming Reality looks to

mystical traditions to challenge orthodoxies of brain science that model consciousness in purely physical terms Instead of privileging the experience of waking life the authors study visionary states ego death meditation prayer and other phenomena that bring us closer to understanding how the mind makes experience **Garland of Visions** Jinah

Kim,2021-02-16 Garland of Visions explores the generative relationships between artistic intelligence and tantric vision practices in the construction and circulation of visual knowledge in medieval South Asia Shifting away from the traditional connoisseur approach Jinah Kim instead focuses on the materiality of painting its mediums its visions and especially its colors She argues that the adoption of a special type of manuscript called pothi enabled the material translation of a private and internal experience of seeing into a portable device These mobile and intimate objects then became important conveyors of many forms of knowledge ritual artistic social scientific and religious and spurred the spread of visual knowledge of Indic Buddhism to distant lands By taking color as the material link between a vision and its artistic output Garland of Visions presents a fresh approach to the history of Indian painting Embodied Awareness of Space Christos Kakalis,David

Boyd,2025-01-16 This edited volume explores the notion of embodied experience through a diverse range of disciplines architecture music literature performance studies philosophy geopolitics In doing so it illuminates the need to redefine the role of the human body as one of the protagonists for raising awareness of space time issues through processing experimentation and application of histories and theories of embodied awareness of space Critically revisiting these spatio temporal dialogues this book suggests a method of linking theory history and practice past present and future The authors reinstate the significance of history and theory in creative thinking and test their applicability in a number of different areas theoretical and buildable architectural projects mapping and geography representation and performative arts This volume will appeal to students and scholars from architecture art cultural studies landscape studies media studies and other disciplines in the humanities and social sciences

The Super Natural Whitley Strieber,Jeffrey J. Kripal,2017-09-26 Two of today s maverick authors on anomalous experience present a perception altering and intellectually thrilling analysis of why the paranormal is real but radically different from what is conventionally understood Whitley Strieber Communion and Jeffrey J Kripal J Newton Rayzor professor of religion at Rice University team up on this unprecedented and intellectually vibrant new framing of inexplicable events and experiences Rather than merely document the anomalous these authors one the man who popularized alien abduction and the other a renowned scholar and renegade advocate for including the paranormal in religious studies The New York Times deliver a fast paced and exhilarating study of why the supernatural is neither fantasy nor fiction but a vital and authentic aspect of life Their suggestion That all kinds of impossible things from extra dimensional beings to bilocation to bumps in the night are not impossible at all rather they are a part of our natural world But this natural world is immeasurably more weird more wonderful and probably more populated than we have so far imagined with our current categories and cultures which are what really make these things seem impossible The Super Natural considers that the natural world is actually a super natural world and all we have to do to see this is to change the lenses through which we are looking at it and the languages through which we are presently limiting it In short The extraordinary exists if we know how to look at and think about it

Experiencing Byzantium Dr Claire Nesbitt,Dr Mark Jackson,2013-11-28 From the reception of imperial ekphraseis in Hagia Sophia to the sounds and smells of the back streets of Constantinople the sensory perception of Byzantium is an area that lends itself perfectly to an investigation into the experience of the Byzantine world The theme of experience embraces all aspects of Byzantine studies and the Experiencing Byzantium symposium brought together archaeologists architects art historians historians musicians and theologians in a common quest to step across the line that divides how we understand and experience the Byzantine world and how the Byzantines themselves perceived the sensual aspects of their empire and also their faith spirituality identity and the nature of being in Byzantium The papers in this volume derive from the 44th Spring Symposium of Byzantine Studies held for the Society for the Promotion of Byzantine Studies by the University of Newcastle and University of Durham at Newcastle upon

Tyne in April 2011 They are written by a group of international scholars who have crossed disciplinary boundaries to approach an understanding of experience in the Byzantine world Experiencing Byzantium is volume 18 in the series published by Ashgate on behalf of the Society for the Promotion of Byzantine Studies *The Oxford Handbook of Light in Archaeology* Costas Papadopoulos, Holley Moyes, 2021-12-09 Light has a fundamental role to play in our perception of the world Natural or artificial lightscapes orchestrate uses and experiences of space and in turn influence how people construct and negotiate their identities form social relationships and attribute meaning to im material practices Archaeological practice seeks to analyse the material culture of past societies by examining the interaction between people things and spaces As light is a crucial factor that mediates these relationships understanding its principles and addressing illumination s impact on sensory experience and perception should be a fundamental pursuit in archaeology However in archaeological reasoning studies of lightscapes have remained largely neglected and understudied This volume provides a comprehensive and accessible consideration of light in archaeology and beyond by including dedicated and fully illustrated chapters covering diverse aspects of illumination in different spatial and temporal contexts from prehistory to the present Written by leading international scholars it interrogates the qualities and affordances of light in different contexts and im material environments explores its manipulation and problematises its elusive properties The result is a synthesis of invaluable insights into sensory experience and perception demonstrating illumination s vital impact on social cultural and artistic contexts
