

Standard Language and Dialectology:

- By prestige dialect we mean that these dialects are not stigmatized in the society in which they are spoken.

Presentday Dialectology:

Present-day Dialectology Jan Berns, Jaap van Marle, 2011-05-12 Present day Dialectology does not treat dialectology as an isolated discipline. Instead, it discusses dialectological topics within the framework of present day linguistics. The book contains papers which seek to confront recent phonological, morphological, syntactic and semantic theory with dialectological data. In addition, it explores the link between dialectology on the one hand and sociolinguistics and the study of language contact on the other. Historical Dialectology in the Digital Age Rhona Alcorn, 2019-01-03 Examines how pre-modernist conceptions and social organizations of pleasure have impacted post WWII film. *Historical Dialectology* Jacek Fisiak, 2011-06-01 In this volume of 29 papers, readers interested in language variation and historical linguistics will find interesting theoretical proposals as well as suggestions concerning ways of approaching previously unsolved empirical problems in the field. The papers deal with various aspects of historical regional dialectology and some border on the issue of dialectology and linguistic change. Although many deal with English, a number discuss Romance languages in general as well as Norwegian, German, Celtic languages of the eastern Alpine region, Coptic and Fula. Some are devoted to more general issues. The language-specific contributions also often cover areas of a more general nature. The results indicate new vistas for further productive research in the area of historical dialectology.

Current Approaches to Limits and Areas in Dialectology Xosé Álvarez, Ernestina Carrilho, Catarina Magro, 2013-09-17 Defining the geographical space of linguistic variation and drawing the areal distribution of linguistic variants are classical issues in dialectology. Over recent decades, advances in geolinguistic methods along with new trends in the study of linguistic variation have significantly shaped new ways of approaching limits and areas in dialectology. This volume is at the crossroads of recent methodological and conceptual developments in dialectology and brings together contributions offering an unusual panorama of case studies from Basque, Romance, Germanic, Celtic and Slavic languages. The seventeen chapters in this volume address a wide spectrum of issues exploring new approaches to the interplay of dialect areas and time and society. Part I: current quantitative methods of studying dialect limits. Part II: and linguistic geovariation focused on lexical, prosodic, syntactic or morphosyntactic topics. Part III: One of the unique features of the volume is the important collection of contributions addressing issues of dialect syntax, a recent and rapidly growing field of linguistic research.

Dialectology meets Typology Bernd Kortmann, 2008-08-22 In what ways can dialectologists and language typologists profit from each other's work when looking across the fence? This is the guiding question of this volume, which involves following up questions such as: How can dialectologists profit from adopting the large body of insights in and hypotheses on language variation and language universals familiar from work in language typology, notably functional typology? Vice versa, what can typologists learn from the study of non-standard varieties? What are possible contributions of dialectology to areal typologies and the study of grammaticalization? What are important theoretical and methodological implications of this new type of collaboration in the study of language variation? The 18 contributors

among them many distinguished dialectologists sociolinguists and typologists address these and other novel questions on the basis of analyses of the morphology and syntax of a broad range of dialects Germanic Romance Balto Slavic Indo Aryan

Handbook of Perceptual Dialectology Daniel Long, Dennis R. Preston, 2002-12-20 The Handbook of Perceptual Dialectology Volume 2 expands on the coverage of both regions and methodologies in the investigation of nonlinguists' perceptions of language variety. New areas studied include Canada anglophone and francophone Cuba Hungary Italy Korea and Mali and most prominent among the new approaches are studies of the salience of specific linguistic features in variety identification and assessment. As in Volume I the reader will find in these chapters everything from the statistical treatment of the ratings of dialect attributes to studies of the actual discourses of nonlinguists discussing language variety. Dialectologists sociolinguists ethnographers and applied linguists who work in areas where language variety is a concern will appreciate the findings and methods of these studies but social scientists of every sort who want to understand the role of language in the cultural lives of ordinary people will also find much of interest here

The Handbook of Dialectology Charles Boberg, John Nerbonne, Dominic Watt, 2018-01-04 The Handbook of Dialectology provides an authoritative up to date and unusually broad account of the study of dialect in one volume. Each chapter reviews essential research and offers a critical discussion of the past present and future development of the area. The volume is based on state of the art research in dialectology around the world providing the most current work available with an unusually broad scope of topics. Provides a practical guide to the many methodological and statistical issues surrounding the collection and analysis of dialect data. Offers summaries of dialect variation in the world's most widely spoken and commonly studied languages including several non European languages that have traditionally received less attention in general discussions of dialectology. Reviews the intellectual development of the field including its main theoretical schools of thought and research traditions both academic and applied. The editors are well known and highly respected with a deep knowledge of this vast field of inquiry.

Perceptual Dialectology in Central Wisconsin Sarah Braun, 2021-06-09 This book investigates the complex interplay of language discourse and variation in Marathon County Wisconsin USA. The combination of different research methods such as ethnographic observations sociolinguistic interviews and methods used in perceptual dialectology allows the meaning of language variation in Marathon County to be studied on different levels i.e. how speakers position themselves within their speech community overtly through discourse and more subtly through their linguistic practices. Results show that Wisconsin English is becoming increasingly enregistered a finding which none of the individual approaches to studying language discourse and variation in Marathon County reveals on their own. It is shown that a Northwoods persona is beginning to evolve which links place identity and language use.
