Practical, step-by-step guidelines for creating and implementing programs include clear rationales, instructive design, and case examples and ready-to-use interventions. The author also provides guidance on developmental, gender, and cultural considerations, the challenges of maintaining progress over the course of the school year, and the handling of severe learning and emotional problems. Among the topics covered: Organizing a group-centered after-school program; Combining learning and counseling into one curriculum; The role of motivation in an ongoing year-long program; Group process, self-efficacy, cohesion, applying the principles of change; Interaction in a year-long program; Solving problems and conflicts. Prevention Science in School Settings Kris Bosworth, 2015-11-24. This straightforward volume makes a strong, practical, research-based case for integrating prevention programs into middle and high schools. Written by experts in prevention science and education, it examines educational goals and prevention of risky behaviors as parallel and

complementary processes and provides evidence for health promoting schools as a critical forum for student development. Chapters show the benefits of this collaboration as instructors engage with prevention content, prevention scientists study schools and create interventions, and counselors develop and implement activities resulting in improved academic, social, and health outcomes. Examples of successful prevention strategies address personal and public health issues as varied as substance abuse, dating violence, dropping out, and suicide. Among the topics covered: Engaging school leaders in prevention; Developing school based prevention curricula; Scaling up evidence based prevention interventions and practices; Conducting prevention research and evaluation in schools; Promoting a positive school climate and culture; Reducing disruptive behavior, violence, and bullying. Child and school psychologists, administrators, teachers, school counselors, and prevention specialists will find significant common ground in *Prevention Science in School Settings*. The breadth and depth of coverage point to new multidisciplinary directions in health education, school climate, culture, and positive youth development.

Social Problem Solving Maurice J. Elias, Steven E. Tobias, 1996-03-08. This volume describes proven practical techniques for promoting key skills in students for everyday social, academic, familial, and vocational success. Based on the work of a highly acclaimed 15 year ongoing multisite project, the approach is designed to help professionals encourage the development of enduring life tools and prevent substance abuse, HIV infection, violence, and other behavior related problems. The program is directed toward children in primarily K-8 populations at high, moderate, and low levels of risk in both regular and special education contexts.
