Preventive Aspects Of Coronary Heart Disease:

Prevention of Coronary Heart Disease: Diet, Lifestyle and Risk Factors in the Seven Countries Study Daan Kromhout, Alessandro Menotti, Henry Blackburn, 2012-12-06 In the 1940s I was struck by reports about many apparently healthy middle aged men who dropped dead instantly from heart attacks The causes of these sudden deaths were unknown I was interested to discover physio chemical characteristics of individuals with predictive value for the occurrence of these fatal heart attacks The discovery of preventive variables would point ways to prevent this disease In order to find relationships between mode of life and susceptibility to heart disease contrasting populations had to be studied Variety not a high degree of homogeneity in culture and habits must be sought After exploratory surveys in countries with supposed differences in dietary patterns lifestyle and heart disease rates in the early 1950s the Seven Countries Study took off in 1958 This study established relationships between risk factors and development of heart disease in middle aged men in health examined in countries with cultures we demonstrated to contrast in diet and lifestyle The results obtained in the Seven Countries Study from its inception till now are presented in this book entitled Prevention of coronary heart disease Diet lifestyle and risk factors in the Seven Countries Study Long ago I realized that our concern should not be restricted to the prevention of coronary heart disease but should be extended to all diseases and premature death Prevention of Coronary Heart Disease Harumi Okuyama, 2007 This publication is organized in an exceptional way Each chapter introduces several completed clinical trials and provides the original conclusions and discussions of the results The authors then contribute their own comments and interpretations of the findings challenging the prevailing belief that serum cholesterol is a mediator of disease which is increased by eating saturated fats and decreased by eating polyunsaturated fats They argue that upon closer scrutiny the diet recommendations based on the cholesterol hypothesis are essentially ineffective in reducing serum cholesterol levels in the long run Instead it is proposed that traditional cholesterol biomarkers are of different significance in short and long term interventions due to the feedback control mechanisms in the body Even more important the association of high serum cholesterol values with high coronary heart disease mortality is not consistent when different populations are compared This mortality rate may simply reflect the incidence and severity of familial hypercholesterolemia cases This agrees with the observation that higher serum cholesterol values associate with lower cancer and all cause mortalities in populations with a low relative proportion of this disorder Thus there seems to be no benefit of limiting dietary cholesterol intake or lowering serum cholesterol values below a certain limit Moreover evidence has been found that the health risk results from high intakes of calories aggravated by an unbalanced intake of omega6 omega3 polyunsaturated fats Based on the reviewed data new directions of lipid nutrition are recommended for the primary and secondary prevention of coronary heart disease cancer and all cause deaths which will likely revolutionize current dietary practice **Cardiovascular Diseases: Guidelines for Prevention and Care** Inter-Society Commission for Heart Disease Resources (New York,

N.Y.),1973 **Cardiovascular Diseases, Guidelines for Prevention and Care** United States. Regional Medical Programs Service,1974 Smoking and Health Bulletin ,1977 **Bibliography on Smoking and Health** ,1977 **Subject Index of Current Research Grants and Contracts Administered by the National Heart, Lung and Blood Institute** National Heart, Lung, and Blood Institute,1975 *Research Awards Index* ,1978 Cardiac Care David Barrett,2006-08-30 Written by experienced clinicians Cardiac Care An Introduction for Nurses takes readers step by step through the patient journey from initial prevention through the critical period to rehabilitation or palliative care A fundamental resource for all those new to cardiac care the book provides a basic grounding in the underlying pathophysiology of the disease as well as an understanding of available treatments and provides an accessible update on the latest research and trends in the cardiac specialty The editors and contributors have years of experience caring for patients with cardiac disorders Accessible and interesting update on the latest research and trends in the fast moving specialty of cardiac care The book has been designed so that the reader can dip in at any point to find out about a particular aspect of cardiac care *Preventive Cardiology* Jo Anne Micale Foody,2007-11-03 Preventive cardiology is a fast moving field that places emphasis on the prevention and treatment of coronary disease Preventive Cardiology Insights Into the Prevention and Treatment of Cardiovascular Disease Second Edition is intended for clinical cardiologists internists primary care providers and allied health care professionals who wish to extend their knowledge and expertise in the rapidly expanding field of preventive cardiology It is the mission of this book to provide clinicians with the understanding and tools necessary to implement prevention in their daily practices Recent changes in the delivery of health care in the United States and abroad in conjunction with new scientific evidence supporting the role of preventive strategies in the maintenance of cardiovascular health have focused new attention and efforts on the field of cardiovascular disease prevention The field of cardiology is thus making a gradual transition from the technology driven intervention oriented perspective of the last several decades to a new preventive molecular based perspective As fresh evidence amasses that preventive measures produce a considerable decrease in the incidence of both primary and secondary cardiac events and mortality there is growing widespread acknowledgment that health care providers from all arenas must initiate preventive strategies in the management and care of their patients
