

National Water Quality Assessment Program

Southwest Principal Aquifers Regional Ground-Water Quality Assessment

The National Water Quality Assessment (NWQA) Program of the U.S. Geological Survey is conducting a regional analysis of water quality in the principal aquifers in the southwestern United States. The Southwest Principal Aquifers (SWPA) study is building a better understanding of the vulnerability and sustainability of these aquifers in the region to ground-water contamination by synthesizing the available knowledge of ground-water quality and trends in 17 major aquifers including the Fort Worth, Ogallala, and others. The improved understanding of aquifer vulnerability and sustainability to contamination from this study is shown on page 10 in providing a better understanding of why the aquifers are vulnerable to contamination and how the quality of ground-water resources. The NWQA Program is performing water quality assessments from the major principal aquifers across the country (California and others, 1997).

These 17 aquifers include about 40 percent of the 400,000 sq. miles of land area and are the primary ground-water supply for urban and agricultural communities. In several areas, these aquifers provide base flow to streams that support riparian aquifers and riparian habitats. When aggregated across the study area, the SWPA aquifers comprise more than 10 percent of the principal aquifers of the United States. The Texas and Orange Texas (OT) aquifers in California, Nevada, Utah, and Arizona; the San Joaquin aquifer in most of Kern, Fresno and Coahuila; and the Central Valley aquifer and the Central Valley aquifer system in California (fig. 1, 1997 Geological Survey, 1997).

About 40 million people live in the SWPA study area. It supplies a total population of about 100 million people in urban, suburban areas. Just after a total agricultural community that used about 10 million acres of cropland (U.S. Geological Survey, 1997). These aquifers are used for many other uses, including, but not limited to, irrigation, and
