Regional Unemployment Differences In Great Britain:

A Study of Regional Unemployment Differences in Great Britain (1962-1973). David Peter Blount Elias,1975

The Urban and Regional Transformation of Britain John Goddard,Anthony Champion,2018-05-30 Originally published in 1983 The Urban and Regional Transformation of Britain analyses economic and social changes recorded across the cities and regions of Britain since the Barlow Report The collection analyses the whole country at a more detailed scale than the ten Standard Regions for which most official statistics are produced Although there are important differences between the major regions of Britain many of the recent processes of change appear to have operated at a local level within rather than between regions The essays in this volume bring together change at the regional and local labour market scales and provides a comprehensive statement of urban and regional change seeking to highlight the new spatial priorities of the 1980s

Regional Policy in Britain Paul N. Balchin,2021-07-11 Originally published in 1990 this book examines the extent to which the north south divide in the UK has been a reality in recent years It also reveals the degree to which the gap between the two parts of Britain has worsened An issue of enduring relevance particularly given the political drive to level up the regions the book focusses particularly on the 1980s a period when regional assistance became a victim of both monetarism and free market ideology The book reviews legislation and considers whether regional policy has been effective and consistent To widen the debate the author questions some common assumptions about regional imbalance and argues that intraregional disparities and the plight of Inner London were causes of concern no less serious than the problem of the north south imbalance

regionale Disparitäten auf dem Arbeitsmarkt aus Regionalökonomische Studien liefern unterschiedlichste Ansätze um die Existenz solcher Unterschiede zu erklären. Aber nur wenige Arbeiten geben Aufschluss über die Dynamik regionaler Arbeitsmarktdisparitäten. Nehmen diese im Zeitablauf zu, verringern sie sich oder bleiben sie stabil? Auch blenden die bisherigen Studien aus, welche Rolle Beschäftigungsgruppen mit unterschiedlichem Qualifikationsniveau in diesem Prozess spielen. Die Arbeit von Daniel Werner schließt diese Lücken. Detailliert untersucht Werner zudem die Anpassungsprozesse nach regionalen Arbeitsmarktschocks. Sein Fazit: Die Mobilität der Arbeitskräfte und hier insbesondere das Pendeln ist der wichtigste Ausgleichsmechanismus.

The UK Regional-National Economic Problem Philip McCann, 2016-03-10. In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development, Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. The UK Regional National Economic Problem brings attention to the highly centralised top-down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities. The North-South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends, although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government.

Structure, System and Economic Policy British Association for the Advancement of Science. Section F (Economics), 1977-10-13. This is a volume of papers organized by Professor Leontief for the 1976 meeting of the Economics section of the British Association for the Advancement of Science. After a paper by Professor Leontief applying input-output to the future of the world economy, other papers consider prices, regional problems, material supplies, urban problems, technical progress, unemployment and energy policy. There are two papers with a broader view of the British economy: one surveying government policy on the industrial structure of the economy and one considering the use of input-output for monitoring the development of the economy.
