Regional Guide South 2006

C. Michael Hall, Jarkko Saarinen

Regional Guide South 2006:

Regional Economic Communities and Integration in Southern Africa Leon Mwamba Tshimpaka, Christopher Changwe Nshimbi, Inocent Moyo, 2021-05-07 This book examines regional integration in Africa with a particular focus on the Southern African Development Community SADC. It argues that the SADC's pursuit of a rationalist and state-centric form of integration for Southern Africa is limited as it overlooks the contributory role and efficacy of non-state actors who are relegated to the periphery. The book demonstrates that civil society networks in Southern Africa constitute well-governed self-organised entities that function just like formal regional arrangements driven by state actors and technocrats. The book amplifies this point by deploying New Institutionalism and the New Regionalism Approach to examine the role and efficacy of non-state actors in building regions from below. The book develops a unique typology that shows how Southern African regional civil society networks adopt strategies, norms and rules to establish an efficient form of alternative integration in the region. Based on a critical analysis of this self-organised regionalism, the book projects the reality that alternative regionalism driven by non-state actors is possible. This book expands the study of regionalism in the SADC and makes a significant and innovative contribution to the study of contemporary regionalism. *Tourism and Change in Polar Regions* C. Michael Hall, Jarkko Saarinen, 2010-07-15 Explores the relationship between tourism and climate change in both Arctic and Antarctic polar regions by considering the associated environmental, economic, social and political factors. This book draws on both Arctic and Antarctic Polar region case studies to help illustrate these climate change issues. Health system resilience indicators World Health Organization, 2024-02-21 The package of health system resilience indicators serves as a dedicated resource to measure and monitor health system resilience in routine operations as well as in the context of disruptive shocks and stressors. This work addresses an identified gap in measurement and monitoring of health system resilience. It complements the Health Systems Resilience Toolkit and supports implementation of the recommendations in WHO's position paper on building health system resilience for UHC and health security. The package aims to support countries to progressively build their capacities to measure, monitor and build health system resilience from national to subnational levels covering health facilities and other service delivery platforms. It emphasizes an integrated approach to health system strengthening underpinned by essential public health functions encompassing health emergency preparedness. It includes guidance on how to utilize and adapt the health system resilience indicators including a step-by-step guide, a suite of recommended health system resilience indicators with technical specifications, supplementary indicators of relevance to health system resilience. The primary target audience for this package is national and subnational health authorities including planners and managers and service providers as well as local, regional and global technical organizations and partners working on health system strengthening including WHO, United Nations country teams, donors, nongovernment organizations, development and humanitarian agencies and other health-related technical agencies. **Region-Building in Southern**
