Regional Planning Evolution Crisis And Prospects:

Regional Planning Gill C. Lim, 1983 The Regional Imperative Urran A. Wannop, 2014-02-04 Based on cases and interviews in Britain Europe and the United States this book explains the recurrence of regional planning and of initiatives in regional governance in a wide range of advanced industrial countries Providing an analysis of the nature of regional planning and governance the book traces the development of regional planning and the institutions associated with it It also looks at the way that regions have been changing their form under pressure from economic and political developments and examines how regional planning and governance has responded comparing experience in the UK the rest of Europe and the US In concluding that regionalism is an imperative feature of politics in most countries associated with almost any of the variety of forms of governance the author offers a major appraisal of the significance of regional planning in an international context

Redevelopment and Race June Manning Thomas, 2013-04-15 In the decades following World War II professional city planners in Detroit made a concerted effort to halt the city's physical and economic decline Their successes included an award winning master plan a number of laudable redevelopment projects and exemplary planning leadership in the city and the nation Yet despite their efforts Detroit was rapidly transforming into a notorious symbol of urban decay In *Redevelopment and Race* Planning a Finer City in Postwar Detroit June Manning Thomas takes a look at what went wrong demonstrating how and why government programs were ineffective and even destructive to community needs In confronting issues like housing shortages blight in older areas and changing economic conditions Detroit's city planners worked during the urban renewal era without much consideration for low income and African American residents and their efforts to stabilize racially mixed neighborhoods faltered as well Steady declines in industrial prowess and the constant decentralization of white residents counteracted planners efforts to rebuild the city Among the issues Thomas discusses in this volume are the harmful impacts of Detroit's highways the mixed record of urban renewal projects like Lafayette Park the effects of the 1967 riots on Detroit's ability to plan the city building strategies of Coleman Young the city's first black mayor and his mayoral successors and the evolution of Detroit's federally designated Empowerment Zone Examining the city she knew first as an undergraduate student at Michigan State University and later as a scholar and planner Thomas ultimately argues for a different approach to traditional planning that places social justice equity and community ahead of purely physical and economic objectives *Redevelopment and Race* was originally published in 1997 and was given the Paul Davidoff Award from the Association of Collegiate Schools of Planning in 1999 Students and teachers of urban planning will be grateful for this re release A new postscript offers insights into changes since 1997 Atlanta Unbound Carlton Wade Basmajian, 2013-09-20 Looking at Atlanta Georgia one might conclude that the city's notorious sprawl degraded air quality and tenuous water supply is a result of a lack of planning particularly an absence of coordination at the regional level This book shows that Atlanta's low density urban form and its associated problems have been both highly coordinated and

regionally planned The author shows how regional policies spanned political boundaries and framed local debates over several decades in the city's history The author explores four cases regional land development plans water supply strategies growth management policies and transportation infrastructure programs to provide a detailed account of the interactions between citizens planners regional commissions state government and federal agencies New Urbanism and American Planning Emily Talen, 2005 Surveying four approaches to city making the author here gives an assessment of the development of American urbanism highlighting recurrent themes and how these interact merge and conflict *Remaking American Communities* David C. Soule, 2007-11-01 Urban sprawl has gained much national attention in recent years Sprawl involves not only land use issues but also legal political and social concerns It affects our schools the environment and race relations Comprehensive enough for high school students and also appropriate for college undergraduates *Remaking American Communities* delves into the challenges of urban sprawl by turning to some of America's top thinkers on the problem including Robert Yaro president of the Regional Plan Association Other cutting edge essays include a foreword about the emergence of sprawl by nationally syndicated columnist Neal Peirce views about race and class by former mayor of Albuquerque David Rusk and a discussion of transportation dynamics by Curtis Johnson president of the Citistates Group The essays in this collection explore the core issues of sprawl and the agenda for dealing with it Complete with a glossary resources and contact information for smart growth alliances this book is extremely user friendly David C Soule offers an unbiased viewpoint of this national phenomenon in a way that will be accessible to students and those with little background in the issue Breaking the Boundaries B. Sanyal, 2013-03-09 Exploring the complex arena of international planning for development has until now been uniquely the privilege of influential senior western planners This book calls into question many of their hallowed principles and much of the conventional wisdom still evident in the halls of academe At a time of increasing enrollment of foreign students in North American planning programs the emergence of a new voice has coincided with a growing skepticism worldwide about old notions of planning and development in poorer and ex colonial countries Now there is a need for brave innovations to reshape our understanding of the global crisis and the potential for progressive and democratic local solutions in both rich and poor nations alike This new voice is given expression by academics and professionals from Third World nations who received their planning education in the west and who now hold posts in major western planning schools *Breaking the Boundaries* presents their views and those of concerned colleagues about the need for a radically changed curriculum based on a comparative one world approach to planning education Their personal experiences as young expatriate scholars and later as teachers of both Third World and First World students in western planning schools are seen as crucial to this need for change Through candid reflections and perceptive critiques of their own field the spatial environmental social design and communications disciplines the contributors explore crucial issues in development planning from theoretical and professional practice perspectives **The Political Culture of Planning J**
