Regional Security in the Middle East, *Constructing Regional Security* W. Durch, 2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability

Regional Security in Southeast Asia Mely Caballero Anthony, 2005 The book examines ASEAN's mechanisms in managing challenges and threats to regional security Its extensive analyses of the ASEAN story of managing regional security cover the different phases of ASEAN's development as a regional organization and explore the perceptible changes that have occurred in regional mechanisms of conflict management The book also examines the roles of relevant actors beyond the states of ASEAN and the key interactions that have evolved over time which have been instrumental in moving regional mechanisms beyond the ASEAN way The book argues that the ASEAN way has not been impervious to change As the association finds its way through periods of crises and continues to confront the many challenges ahead ASEAN and its mechanisms are already being transformed beyond the narrow confines of the modalities associated with the ASEAN way The changes in the political and security landscape of the region as well as the democratic transitions taking place in some member states have set the stage for a much more dynamic set of regional actors and processes that bring into question the kind of regionalism that is now taking place in the region the way regionalism is changing in Southeast Asia

foreign policy and IR The Third World Beyond the Cold War Louise Fawcett, Yezid Sayigh, 1999-04-01 The Third World Beyond the Cold War presents an overview of the changes brought about in Third World countries since the end of the cold war. The book does so in two ways by highlighting major areas of change in the Third World and using regional case studies as a means of isolating changes specific to certain regions. The themes chosen by the editors: economics, politics, security, are not of course exhaustive but are broadly interpreted so as to encompass the major areas of change among Third World countries. The regional case studies: Asia Pacific, Latin America, South Asia, Africa, the Middle East were selected to bring out both the themes and the diversity of experience. The essays written by leading scholars in the field of International Relations caters for a variety of constituencies: those who seek the big picture in understanding the Third World in International Relations; those who look for general patterns, explanations and trends in Third World politics; and those who seek up to date information and analysis on the progress of different regions.

Constructing Global Order Amitav Acharya, 2018-03-22 For a long time international relations scholars have adopted a narrow view of what is global order: who are its makers and managers and what means they employ to realize their goals. Amitav Acharya argues that the nature and scope of agency in the global order who creates it and how needs to be redefined and broadened. Order is built not by material power alone but also by ideas and norms. While the West designed the post war order, the non-Western countries were not passive. They contested and redefined Western ideas and norms and contributed new ones of their own making. This book examines such acts of agency especially the redefinitions of sovereignty and security shaping contemporary world politics. With the decline of Western dominance, ideas and agency from the Rest may make it possible to imagine and build a truly global order.
