Regulating The Future Broadcasting Technology And Governmental Control:

Regulating the Future W. A. Kelly Huff, Regulating the Future W.A. K. Huff, 2001-05-30 This comprehensive study examines the case of AM stereo and subsequent technologies to demonstrate the FCC's evolution from stern to reluctant regulator. It also examines emerging technologies such as multichannel television sound, digital audio broadcasting, and high definition television, and discusses their impact on the evolution of broadcast regulation. In the 1980s, the tension between governmental control and the marketplace resulted in the FCC's deregulation of TV and radio, electing to set only technical operating parameters and allowing legal operation of any system that meets those minimal standards. Huff argues that this approach is likely to influence regulatory approaches to other new developments in broadcast technologies. The extensive overview of the industry and the study of the interrelationships between the technologies will appeal to communication scholars in the fields of radio and television as well as interest industry professionals.

Encyclopedia of Radio 3-Volume Set Christopher H. Sterling, 2004-03 Produced in association with the Museum of Broadcast Communications in Chicago, the Encyclopedia of Radio includes more than 600 entries covering major countries and regions of the world as well as specific programs and people, networks and organizations, regulation and policies, audience research, and radio's technology. This encyclopedic work will be the first broadly conceived reference source on a medium that is now nearly eighty years old, with essays that provide essential information on the subject as well as comment on the significance of the particular person, organization, or topic being examined.

Electronic Media Management, Revised Peter Pringle, Michael F. Starr, 2013-06-26 The fifth edition of a classic text features important updates that reflect the enormous changes that have taken place in recent years: the Internet as an important information transmission format that is here to stay and convergence among media. This edition features thorough discussions on the Internet and convergence as well as reflects the latest information on broadcast and cable regulations and policies. It also includes a fresh batch of case studies and study questions. As in previous editions, this book also covers management theory, audience analysis, broadcast promotion, and marketing.

Mass Media in 2025 Erwin K. Thomas, Brown H. Carpenter, 2001-08-30 The future of mass media may appear unpredictable and too complex to fathom, but *Mass Media in 2025* takes a scholarly theoretical approach to identifying trends and explaining their possibilities. Noted contributors approach a variety of media with a solid grounding in the history of each and an eye for which may be vulnerable and which may thrive in the new technological age. Trends such as interactivity and niche building will affect everything from the newspaper to public relations, and this collection of essays provides a fascinating guide to where the next decades may take us. Regardless of the visual, aural, or printed form, *Mass Media in 2025* illustrates the degree to which older media will have to incorporate the level of interaction and specialization offered by newer media if they are to survive. These effects can already be seen in the proliferation of television channels, the ironic bent of advertising in the rise of infotainment, in news organizations. This book shows not only how all of this has come to be

but also more importantly where it will go **Shut Off** Gregory Taylor,2013 A critical analysis of the most significant technological change in Canadian television history **Breaks in the Air** John Klaess,2022-08-22 In *Breaks in the Air* John Klaess tells the story of rap's emergence on New York City's airwaves by examining how artists and broadcasters adapted hip hop's performance culture to radio. Initially artists and DJs brought their live practice to radio by buying time on low bandwidth community stations and building new communities around their shows. Later stations owned by New York's African American elite such as WBLS reluctantly began airing rap even as they pursued a sound rooted in respectability, urban sophistication and polish. At the same time large commercial stations like WRKS programmed rap once it became clear that the music attracted a demographic that was valuable to advertisers. Moving between intimate portraits of single radio shows and broader examinations of the legal, financial, cultural and political forces that indelibly shaped the sound of rap radio, Klaess shows how early rap radio provides a lens through which to better understand the development of rap music as well as the intertwined histories of sound, institutions, communities and legal formations that converged in the post-Civil Rights era.

Brown and Black Communication Diana Rios, Ali Mohamed,2003-07-30 Though Latinos and African Americans have lived together in large cities as neighbors, there is much that is still misunderstood between them. Those who live in non-diverse locales have only news and entertainment representations on which to base their information about the two cultures. This new collection of essays brings together the latest interdisciplinary works by scholars examining conflicts and convergences among Latinos and African Americans in mass-mediated and cross-cultural contexts. Contributions in the form of both empirical and critical ethnographic research present compelling works in cross-cultural relations: news, entertainment, news media, education and community relations. *Brown and Black Communication* challenges those who do not think that significant projects and key research have been conducted on the two largest ethnic communities in the United States. Of certain appeal to both scholars and those with more applied needs in media education and public policy, this challenging collection offers a range of perspectives on two widely diverse bodies of American people.

Manufacturing the Gang Raúl Damacio Tovares,2002-05-30 Coverage of Mexican American youth gangs has been a staple of local television news in the United States for decades and its form and content have come to embody many journalistic clichés: the rising tide of violence, the spread of drug addiction, the alienated minority youth. But as this bold new study argues, these stories contain gross exaggerations that lead to the reinforcement of stereotypes about Mexican American young people and the Mexican American community in general. Indeed, the police and community leaders greatly influence the content of this coverage by deciding what information to make available to the news media while reporters select certain sources and ignore others, thus slanting the story even further. As author Raúl Tovares makes clear, the true story of Mexican American youth is far more complex than local news would have its viewers believe. Cultural values, organizational structures and economic systems all contribute to the production of this journalism, which itself has a direct and real impact on the lives of Mexican American

teenagers Unlike other books on the subject of Mexican American youth gangs Tovares s work critiques the very assumptions on which ideas about such gangs are based and brings much needed attention to a timely and often misunderstood subject

John Vassos Danielle Shapiro,2016-03-30 What should a television look like How should a dial on a radio feel to the touch These were questions John Vassos asked when the Radio Corporation of America RCA asked him to design the first mass produced television receiver the TRK 12 which had its spectacular premier at the 1939 New York World s Fair Vassos emigrated from Greece and arrived in the United States in 1918 His career spans the evolution of central forms of mass media in the twentieth century and offers a template for understanding their success This is Vassos s legacy shaping the way we interact with our media technologies Other industrial designers may be more celebrated but none were more focused on making radio and television attractive and accessible to millions of Americans In John Vassos Industrial Design for Modern Life Danielle Shapiro is the first to examine the life and work of RCA s key consultant designer through the rise of radio and television and into the computer era Vassos conceived a vision for the look of new technologies still with us today A founder of the Industrial Designers Society of America he was instrumental in the development of a self conscious industrial design profession during the late 1920s and 1930s and into the postwar period Drawing on unpublished records and correspondence Shapiro creates a portrait of a designer whose early artistic work in books like Phobia and Contempo critiqued the commercialization of modern life but whose later design work sought to accommodate it Replete with rich behind the product stories of America s design culture in the 1930s through the 1950s this volume also chronicles the emergence of what was to become the nation s largest media company and provides a fascinating glimpse into its early corporate culture In our current era of watching TV on an iPod or a smartphone Shapiro stimulates broad discussions of the meaning of technological design for mass media in daily life
