Reichstag Graffiti:

European Landscapes of Rock-Art Christopher Chippindale, George Nash, 2003-09-02 Rock art the ancient images which still scatter the rocky landscapes of Europe is a singular kind of archaeological evidence Fixed in place it does not move about as artefacts as trade objects do Enigmatic in its meaning it uniquely offers a direct record of how prehistoric Europeans saw and envisioned their own worlds European Landscapes of Rock Art provides a number of case studies covering a range of European locations including Ireland Italy Scandinavia Scotland and Spain which collectively address the chronology and geography of rock art as well as providing an essential series of methodologies for future debate Each author provides a synthesis that focuses on landscape as an essential part of rock art construction From the paintings and carved images of prehistoric Scandinavia to Second World War graffiti on the German Reichstag this volume looks beyond the art to the society that made it The papers in this volume also challenge the traditional views of how rock art is recorded

Throughout there is an emphasis on informal and informed methodologies The authors skilfully discuss subjectivity and its relationship with landscape since personal experience from prehistoric times to the present day plays an essential role in the interpretation of art itself The emphasis is on location on the intentionality of the artist and on the needs of the audience This exciting volume is a crucial addition to rock art literature and landscape archaeology It will provide new material for a lively and greatly debated subject and as such will be essential for academics non academics and commentators of rock art in general

 Walker, 2021-11-18 For years following reunification Berlin was the largest construction site in Europe with striking new
 architecture proliferating throughout the city in the 1990s and early 2000s Among the most visible and the most contested of
 the new projects were those designed for the national government and its related functions Berlin Contemporary explores
 these buildings and plans tracing their antecedents while also situating their iconic forms and influential designers within the
 spectacular world of global contemporary architecture Close studies of these sites including the Reichstag the Chancellery
 and the reconstruction of the Berlin Stadtschloss now known as the Humboldt Forum demonstrate the complexity of Berlin s
 political and architectural rebuilding and reveal the intricate historical negotiations that architecture was summoned to
 perform **Radical Communications** Michael Tsangaris, 2021-11-08 Radical Communications explores unauthorized
 messages we see in the cities we live in and their impact on the construction of social reality Michael Tsangaris treats the
 city as a text and examines the political slogans graffiti and street art of Athens as complex visual signs in an alternative
 communication system He argues that the legitimacy aesthetic value and social acceptability of these expressions depend on
 the time place and social group or individual that interprets them Finally his analysis reveals the contradictory character of
 the contemporary city It shows a city of social inequalities cultural diversity multinational encounters of conflicts between
 age groups and political economic and epidemic crises a city of one dimensional thinking apathy and consumer fetishism but
 also a city that aspires to the dream of a better society and holds utopian promise **Borders and Border Politics in a
 Globalizing World** Paul Ganster, David E. Lorey, 2005 Borders represent an intriguing paradox as globalization continues to
 leap barriers at a vigorous pace merging economies and cultures through world trade economic integration the mass media
 the Internet and increasingly mobile populations At the same time the political boundaries separating peoples remain
 pervasive and problematic Borders and Border Politics in a Globalizing World offers a carefully selected group of readings to
 enhance student understanding of the complexities of border regions The reader brings together key writings on the histories
 of borders their social development their politics and the daily life that characterizes them The authors place their analyses
 of these issues in an international context stressing how borders influence and how they are influenced by global processes

The selections provide a window on our current understanding of human interactions at and along national and interethnic boundaries interactions that will characterize borders and border politics for decades to come Drawing on a worldwide set of case studies this text divides border issues into seven thematic categories borders as barriers borders migrants and refugees borders and partitioned groups borders perceptions and culture borders and the environment borders goods and services and maritime and space borders An excellent text for courses on boundaries ethnicity and international relations this collection of cutting edge information and analysis on borders and border politics in the context of ongoing globalization will shed light both upon international and subnational boundaries and upon the unfolding processes of globalization or decades to come Drawing on a worldwide set of case studies this text divides border issues into seven thematic categories borders as barriers borders migrants and refugees borders and partitioned groups borders perceptions and culture borders and the environment borders goods and services and maritime and space borders An excellent text for courses on boundaries ethnicity and international relations this collection of cutting edge information and analysis on borders and border politics in the context of ongoing globalization will shed light both upon international and subnational boundaries and upon the unfolding processes of globalization or decades to come Drawing on a worldwide set of case studies this text divides border issues into seven thematic categories borders as barriers borders migrants and refugees borders and partitioned groups borders perceptions and culture borders and the environment borders goods and services and maritime and space borders An excellent text for courses on boundaries ethnicity and international relations this collection of cutting edge information and analysis on borders and border politics in the context of ongoing globalization will shed light both upon international and subnational boundaries and upon the unfolding processes of globalization ext for courses on boundaries ethnicity and international relations this collection of cutting edge information and analysis on borders and border politics in the context of ongoing globalization will shed light both upon international and subnational boundaries and upon the unfolding processes of globalization
