Reinventing American Education Rudy A. Magnan, 1993-01-01 **Making the Grade** Tony Wagner, 2003-12-16 This book provides a guide for a long overdue public dialogue about why and how we need to reinvent our nation's schools How has the world changed for our children what do all students need to know in light of these changes how do we hold students and schools accountable for results what do good schools look like and what must leaders do to create more of these schools These are some of the questions that drive this book The answers emerging to these questions may surprise many The most successful public schools of the 21st century look a lot more like our 19th century village schools than our current factory model of schooling This book describes these new village schools that have been created in the last decade and suggests that they are a prototype for the schools of the future

Reinventing American Education Dr. Rudy A. Magnan, 2010-11-10 Thinking skill is unquestionably the fundamental human resource We need to do much more about developing this skill because the complexity of modern life demands more than routine reactions There is an even bigger need for productive constructive and generative thinking I hope that everyone concerned with the future direction of education will pay attention to these important matters which you raise in this book Dr Edward de Bono WORLD'S LEADING AUTHORITY ON THINKING AS A DELIBERATE SKILL

Reinventing Public Education Paul Hill, Lawrence C. Pierce, James W. Guthrie, 1997-06 A heated debate is raging over our nation's public schools and how they should be reformed with proposals ranging from imposing national standards to replacing public education altogether with a voucher system for private schools Combining decades of experience in education the authors propose an innovative approach to solving the problems of our school system and find a middle ground between these extremes *Reinventing Public Education* shows how contracting would radically change the way we operate our schools while keeping them public and accessible to all and making them better able to meet standards of achievement and equity Using public funds local school boards would select private providers to operate individual schools under formal contracts specifying the type and quality of instruction In a hands on concrete fashion the authors provide a thorough explanation of the pros and cons of school contracting and how it would work in practice They show how contracting would free local school boards from operating schools so they can focus on improving educational policy how it would allow parents to choose the best school for their children and finally how it

would ensure that schools are held accountable and academic standards are met While retaining a strong public role in education contracting enables schools to be more imaginative adaptable and suited to the needs of children and families In presenting an alternative vision for America s schools Reinventing Public Education is too important to be ignored **The Buying and Selling of American Education** Susan Tave Zelman, Margaret Erlandson Sorensen, 2022-10-17 American educators and policy makers have grown increasingly frustrated in recent decades as attempts to enhance equity and bring American student learning to the level experienced in other countries have faltered Recent efforts have included the standards movement as well as broad expansion of school choice These endeavors which largely rely on market based thinking assume that individual schools and teachers have the will and ability to do better if only prodded by competition and other sticks and carrots Such attempts overlook flaws in a system developed to provide a common education while also subdividing resources to maintain privilege for some This book traces the history of American education as a foundation to examining persistent weaknesses in education today Meaningful reform and improvement which are urgent needs will require broad systemic change based on the engagement of many sectors This book offers a vision for such reform Following successful models in other countries suggests options for moving away from current deeply enmired systemic inequities to a system better suited to meeting a broad range of educational needs A portfolio of diverse schools regionally administered and held accountable for student learning presents an option for moving away from inequitable district structures and scatter shot choice options The critical questions are how to get there from here and do we have the will to do so The book concludes with suggestions on how to start the process *Higher Education* Christian Gilde, 2007-01-01 Higher Education Open for Business presents a well argued critique of the emergence of commercial values in a system reserved for learning and scholastic inquiry Through closer examination of academic areas such as the campus environment the classroom academic research and college sports the audience is made aware that we have to think carefully whether we want to turn a college nation into a college corporation
