## **Relating Humanities And Social Thought:**

*Relating Humanities and Social Thought* Abraham Edel, 1990-01-01 In the current atmosphere of controversy about modes of interpreting literature historical influences in science and subtle ideologies in social theory Abraham Edel confronts the institutionalized separation of the humanities and the sciences the segregation of disciplines through structures that rest on entrenched dualisms and the isolations reenforced by habits of the academy and its struggles over turf Edel s search for connections carried out not only theoretically but through a series of particular studies spanning major disciplines from philosophy and social theory to jurisprudence biography and cultural anthropology leads into uncharted waters He faces the startling conclusion that the clue to answering internal questions characteristically turns out to come from trans discipline relations This fourth volume of Edel s Science Ideology and Value focuses in a Deweyan vein on the functional requirements at the base of the social sciences and humanities alike discipline structures are subject to change development and decay and even to categorial shifts as well as to readjustments At the same time Edel s philosophical naturalism helps diagnose the obstacles to research that stem from imposed dualisms such as theory and practice subjectivity and objectivity fact and value individual and society as well as social contrasts of elite and mass Normative structures are to be held responsible to inquiry and a self conscious exploratory practice is needed to minimize the risks of arbitrary closures For those who wish to get beyond sloganeering in the world of education humane learning and the social and historical sciences this book is a must

*Hobbes and Human Nature* Arnold W. Green, 1993-01-01 Several excellent modern books about Hobbes either focus upon his life or analyze his ideas in a technical way Green s unique treatment of the English philosopher explores how his times helped shape his basic postulates which are then linked with his personal experiences an exercise in modern relativism that Hobbes and his generation would not have appreciated Hobbes s outlook still remains more relevant to the present time than to the two intervening centuries The faith that human nature has changed with time and circumstance has waned Hobbes and Human Nature is a study in applied social theory Green discusses those issues that Hobbes either stated or provoked individuals and society as metaphor religion and atheism sovereignty and the law intellectuals and the dominance of minorities over the majority the precedence of perceived interests over ideas and the failure of history to determine human fate The standard comparison with Rousseau is made with less emphasis upon character than upon revolution and Utopian hope This volume should be of interest to philosophers historians sociologists and political scientists It may find some place as assigned reading for undergraduate and especially for graduate students

**Toward a New Enlightenment** Paul Kurtz, Paul Kurtz has been the dominant voice of secular humanism over the past thirty years This compilation of his work reveals the scope of his thinking on the basic topics of our time and his many and varied contributions to the cause of free thought It focuses on the central issues that have concerned Kurtz throughout his career ethics politics education religion science and pseudoscience The chapters are linked by a common theme the need for a new enlightenment one committed to the use of

rationality and skepticism but also devoted to realizing the highest values of humanist culture Many writings included here were first published in magazines and journals long unavailable Some of the essays have never before been published They now appear as a coherent whole for the first time Also included is an extensive bibliography of Kurtz s writings Toward a New Enlightenment is essential for those who know and admire Paul Kurtz s work It will also be an important resource for students of philosophy political science ethics and religion Among the chapters are Humanist Ethics Eating the Forbidden Fruit Relevance of Science to Ethics Democracy without Theology Misuses of Civil Disobedience The Limits of Tolerance Skepticism about the Paranormal Legitimate and Illegitimate Militant Atheism vs Freedom of Conscience Promethean Love Unbound The Case for Euthanasia and The New Inquisition in the Schools

**The Bloomsbury Encyclopedia of Philosophers in America** John R. Shook, 2016-02-11 For scholars working on almost any aspect of American thought The Bloomsbury Encyclopedia to Philosophers in America presents an indispensable reference work Selecting over 700 figures from the Dictionary of Early American Philosophers and the Dictionary of Modern American Philosophers this condensed edition includes key contributors to philosophical thought From 1600 to the present day entries cover psychology pedagogy sociology anthropology education theology and political science before these disciplines came to be considered distinct from philosophy Clear and accessible each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading Featuring a new preface by the editor and a comprehensive introduction The Bloomsbury Encyclopedia to Philosophers in America includes 30 new entries on twenty first century thinkers including Martha Nussbaum and Patricia Churchland With in depth overviews of Waldo Emerson Margaret Fuller Noah Porter Frederick Rauch Benjamin Franklin Thomas Paine and Thomas Jefferson this is an invaluable one stop research volume to understanding leading figures in American thought and the development of American intellectual history

*In Search of the Ethical* Abraham Edel, 1993-01-01 The twentieth century has been rich in the variety of its ethical theories Since the turn of the century contending philosophical positions have tended to view ethics either as spiritual and separate from the natural world or as a function of bodily or material forces Although both factions had roots in older philosophies the speed and complexity of modern development in science and technology engendered a multiplicity of smaller schools within traditional domains Li the fifth volume of Science Ideology and Value Abraham Edel offers a consideration of some of the major moral theories of this troubled century and a guide to their historical development and context In treating the newer and distinctively twentieth century philosophical schools Edel concentrates on movements rather than on the individual philosopher s rounded theory The treatment of John Dewey comes in a chapter on pragmatic tests and ethical insights while that of Edward Alexander Westermarck comes in a larger discussion of ethical relativism Edel s consideration of John Rawls and Alasdair MacIntyre provides a broader lesson in the problems and pitfalls of dealing with ethical ideas apart from history and social context Edel observes that while the concepts of morality and the theories in which

they are enmeshed have been familiar subject matter of ethical theory the one topic that has been little explored is changes over time in ethical practice While the fact of different moralities and the rise and fall of a given morality have been dealt with in a historical vein how such changes have impacted the theory of ethics as such has received only limited treatment Edel devotes significant space to this topic noting that the study of moral change may yield both a deeper understanding of the functioning of morality within the social culture as well as new vistas on the function of ethical theories themselves

*Traditions of Systems Theory* Darrell Arnold, 2013-12-17 The term systems theory is used to characterize a set of disparate yet related approaches to fields as varied as information theory cybernetics biology sociology history literature and philosophy What unites each of these traditions of systems theory is a shared focus on general features of systems and their fundamental importance for diverse areas of life Yet there are considerable differences among these traditions and each tradition has developed its own methodologies journals and forms of analysis This book explores this terrain and provides an overview of and guide to the traditions of systems theory in their considerable variety The book draws attention to the traditions of systems theory in their historical development especially as related to the humanities and social sciences and shows how from these traditions various contemporary developments have ensued It provides a guide for strains of thought that are key to understanding 20th century intellectual life in many areas

**The Decomposition of Sociology** Irving Louis Horowitz, 1994 The author examines the field of sociology and the closing of many sociology departments and then proposes an alternative positive view of social research Jacket

*A Quarter Century of Value Inquiry* Richard T. Hull, 2021-11-01 This volume contains all of the presidential addresses given before the American Society for Value Inquiry since its first meeting in 1970 Contributions are by Richard Brandt Virgil Aldrich John W Davis the late Robert S Hartman James B Wilbur the late William H Werkmeister Robert E Carter the late William T Blackstone Gene James Eva Huel Cadwallader Richard T Hull Norman Bowie Stephen White Burton Leiser Abraham Edel Sidney Axinn Robert Ginsberg Patricia Werhane Lisa M Newton Thomas Magnell Sander Lee John M Abbarno Ruth Miller Lucier and Tom Regan Autobiographical sketches by all of the living contributors and one recently deceased biographical statements of the remainder together with photographic portraits of all the contributors make this volume a unique record of value inquiry during the past quarter century indicates previously unpublished or unpublished in the present form indicates substantial new material has been added The addresses cover diverse topics from broad general ones to value inquiry into literature bioethics and public policy to philosophy of mind to critical studies of other philosophers work defenses of philosophy and of applied ethics individual role and cultural relativism of values The American Society for Value Inquiry is nearing its 25th anniversary Its leadership is elected annually often with a vice president becoming president elect then president then past president a structure that serves to insure a measure of continuity Its members are drawn to

the society not by a particularly credo or ideology or philosophical position but by a common interest in questions of value ranging from abstract meta value inquiry to disciplinary and trans disciplinary value inquiry For those who share this range of passions the volume will preserve collect organize and in a number of cases recover material in danger of being lost to them The Presidential Address is a unique genre resembling in some ways a sermon Indeed preparing a presidential address before a philosophical society is often an exercise in developing an exhortation to members to take up a neglected topic to embrace as important a particular viewpoint it may as well be a cautionary to avoid a particular error It is often a dramatic moment as a last act of the presidency having observed closely the trends and winds blowing through the discipline the speaker is afforded the opportunity to hold forth on a topic at once intensely personal and believed to be of wide interest While some societies publish presidential addresses in newsletters or informal proceedings and occasionally in professional bulletins or journals rarely have a substantial bloc of a society s presidential addresses been collected and published under one cover Too often the presidential address is delivered discussed by those present perhaps summarized in a paragraph in a newsletter to members and filed as a fond memory of a moment of honor in the papers of the author sometimes to be forgotten lost discarded or otherwise removed from availability to scholars of the history of philosophy This volume inaugurates a series aiming at preserving presidential and other major addresses before philosophical societies It seeks to be a historical record not only of the address but also of the reflections and recollections of the author It seeks to preserve as a part of the historical record a photograph of the author And with the personal character of an autobiographical statement it seeks to humanize and render lively and real the professi
