Relations History Geography:

History, Identity and the Bukusu-Bagisu Relations on the Kenya and Uganda Border Peter Wafula Wekesa, 2023-02-27

History Identity and the Bukusu Bagisu Relations on the Kenya and Uganda Border analyzes issues of history identity and the Bukusu Bagisu relations on the Kenya and Uganda border From this microcosmic level Peter Wafula Wekesa explores forms of trans border social economic and political relations that have evolved between the two communities since the pre colonial period Utilizing both primary and secondary sources Wekesa presents the context within which border relations between the two groups emerged and were transformed over time This book delves into the history of relations between the two peoples that had long developed before the European colonial partition The partition as Wekesa observes not only ignored African interests but also generally entrenched western notions of the border that contradicted African conceptions of space These western notions were augmented by the colonial and independent government policies that froze the historical solidarities that had existed between the two communities However colonial and independent government policies generated contradictions over the Bukusu Bugisu borderland area that made the control of the interactions between the two communities within the distinct geopolitical spaces problematic As such both formal and informal dynamics made the common Bukusu Bugisu borderland a site of numerous permutations

The Relations of Geography History (Classic

Reprint) H. B. George, 2018-03-07 Excerpt from The Relations of Geography History Every reader of history is aware that he must learn some geography if he would understand what he reads Comparatively few however if one may judge from experience seem to realize how much light geography throws on history Geographical influences account for much that

happens or has happened Geographical knowledge affords valuable data for solving historical problems At the same time human action alters the aspect of those things of which geography takes cognizance man cuts canals and tunnels mountains drains marshes and constructs artificial harbours though it must be admitted that these things are trifles compared to the steady operation of geographical causes all history through I have attempted to point out systematically how these causes work first in general and then in reference to the various countries of Europe Obviously this can only be done in specimens to do it fully would be to write all history afresh The specimens given may however I hope suffice to call the attention of students of history to the modes in which geography operates so that they may be ready to perceive its influence on whatever period or country they may be dealing with About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Geographical Basis of European History John Kirtland Wright, 1928

Space and Time in Thai-Lao Relations Thanachate Wisaijorn, 2022-06-07 Wisaijorn explores how the concepts of space and temporality in traditional geopolitics have influenced the understanding of the Thai Lao border since Laos became independent in 1954 Arguing that a state centric conceptualisation of the Thailand Laos border falls into both a territorial and temporal trap Wisaijorn contests that privileging a theoretical border silences the voices of people on the ground In doing so he expands the concept of a temporal trap with the addition of a temporal dimension analysing how the state claims a monopoly not only on a geography but also a history Rooted in orientalism colonialism and the expediencies of the Cold War the border operates in the interest of elites and ignores the lived reality of peoples on the ground By bringing these voices back into the discussion Wisaijorn presents a more complex framework which reveals a human dimension missing not only from this particular case but more broadly from the conceptions of borders within International Relations theory A fascinating case study for scholars with an interest in mainland Southeast Asia which also makes a valuable theoretical contribution to International relations discourse
