Wills, 2024-05-01 Assessment of abilities opinions and overall feelings of self worth are commonly acknowledged to be

influenced by how one's attributes compare with those of other people. In contemporary social psychology, this process is known as social comparison or interpersonal comparison. Originally published in 1991, this volume presents the most recent developments in this field of study at the time. As described in the chapters, the theory has gone through several iterations taken on new problems and research paradigms and reached out to other social psychological areas of study. Some of this research addresses questions that are logical extensions of Festinger's theory; some consider questions that derive from entirely different ways of construing the comparison process from Festinger's original approach. Although all questions are not settled, the work presented here shows how far the original social comparison theory has evolved and suggests where the next insights are likely to be found. Today it can be read in its historical context.

Social Comparison, Judgment, and Behavior Jerry M. Suls, Ladd Wheeler, Rebecca L. Collins, 2020. Comparison with other people, a core element of social life, influences self-concept, attitudes, conformity, psychological and physical well-being, achievement, educational outcomes, and social movements. This volume presents classic and state-of-the-science chapters by leading experts that survey the major areas of social comparison theory and research.

Handbook of Social Comparison Jerry Suls, Ladd Wheeler, 2013-11-11. Comparison of objects, events, and situations is integral to judgment; comparisons of the self with other people comprise one of the building blocks of human conduct and experience. After four decades of research, the topic of social comparison is more popular than ever. In this timely handbook, a distinguished roster of researchers and theoreticians describe where the field has been since its development in the early 1950s and where it is likely to go next.
