Eysenck,Sybil B. G. Eysenck,2013-11-26 Originally published in 1969 this book deals extensively with the description and measurement of personality Beginning with a statement of the principles of typological research in psychology set against the background of general taxonomic principles in biology the study discusses in detail results and generalisations from the Eysencks previous work The second part of the book describes several large scale studies using personality questionnaires prepared by the authors as well as the standard ones of Cattell and Guilford There is a comparative study of the Eysenck Cattell and Guilford inventories which analyses the degree to which similar factors can be found in these three instruments and discusses areas of agreement and disagreement between the three authors The third part deals with personality studies in children and includes a chapter on personality structure in

subnormal subjects These studies are concerned with discovering the extent to which personality structure changes with increasing age and to what extent it is possible to measure personality in younger children They also examine sex differences in personality structure and show quite marked differences between the sexes on a number of primary personality traits The results of the Eysencks work in this field directed new light on the structure of personality and cast doubt on many widely accepted findings of the time

Obese Humans and Rats (Psychology Revivals) Stanley Schacter, Judith

Rodin, 2014-10-14 Originally published in 1974 this volume examines the behavioural similarities of obese humans and animals whose so called feeding centre the ventro medial hypothalamic nuclei has been lesioned Both the obese human and the VMH lesioned animal seem to share a hyposensitivity to the internal physiological cues to eating and hypersensitivity to external cues associated with food Beginning with a review these obese animals and the human obese are compared point by point on experimental results reported in the literature Then new findings are presented that specifically tested humans for relationships that are well established for lesioned animals Next a theoretical framework integrates the human and animal data to postulate that the relationship of cue prominence and probability of response is stronger for the obese than for normal The causes for this and the extension of the basis for the obese s eating behaviour to other areas are discussed in light of further experiments that will make this invaluable reading for all concerned with the history of obesity and the issues of regulatory behaviour

Methods of Architectural Programming (Routledge Revivals) Henry Sanoff, 2016-05-20 First

published in 1977 this volume was intended as a sourcebook for designers and attempts to specify the ingredients necessary to develop a design program rather than postulate a model program for which no consensus exists As such it filled a void in the existing literature which seldom covered programming with much depth and provides technical aids to guide designers The author attempts to integrate the pioneering contributions from others in order to identify the substance of programming for designers and represents a culling of the strategies and techniques from the social behavioural and management sciences building on the developing efforts of other disciplines

The Personal Distribution of Incomes (Routledge Revivals) A.

B. Atkinson, 2013-12-19 First published in 1976 the essays in this volume are concerned with the distribution of income and wealth The papers were first presented at the Royal Economic Society s conference in 1974 which examined the evidence concerning the personal distribution of earnings compared the distributions apparent in different periods and societies and studied the association between personal attributes and income The contributions from internationally renowned authors reflect these areas and address the questions surrounding inequality the taxation of wealth and capital transfers that remain relevant in twenty first century society

National Security and International Relations (Routledge Revivals) Peter

Mangold, 2013-10-14 First published in 1990 National Security and International Relations provides a concise analysis of the problem of national security in the twentieth century It examines the criteria by which states decide what level of security they want to seek in an uncertain and essentially Hobbesian world and why some states tend to underinsure while

obsessively insecure states overinsure frequently making others more insecure in the process In the wake of two world wars and the threat of nuclear destruction Peter Mangold argues that war was becoming as much a source of insecurity as the intentions of other states It then explores the different approaches attempted during the twentieth century to ameliorate or ideally escape from the security dilemma These range from international regimes to the restructuring of the international politics of Western Europe so as to substitute cooperation for conflict and U S and Soviet attempts to render nuclear competition safer through arms control and confidence building measures Of special value to students of International Relations and Strategic Studies this book will also interest those keen to understand the challenges embodied in Gorbachev s new thinking in foreign policy
