Relevance In Argumentation:

Relevance in Argumentation Douglas N. Walton, 2004 In *Relevance in Argumentation* author Douglas Walton presents a new method for critically evaluating arguments for relevance This method enables a critic to judge whether a move can be said to be relevant or irrelevant and is based on case studies of argumentation in which an argument or part of an argument has been criticized as irrelevant Walton s method is based on a new theory of relevance that incorporates techniques of argumentation theory logic and artificial intelligence The work uses a case study approach with numerous examples of controversial arguments strategies of attack in argumentation and fallacies Walton reviews ordinary cases of irrelevance in argumentation and uses them as a basis to advance and develop his new theory of irrelevance and relevance The volume also presents a clear account of the technical problems in the previous attempts to define relevance including an analysis of formal systems of relevance logic and an explanation of the Grecian notion of conversational relevance This volume is intended for graduate and advanced undergraduate courses in those fields using argumentation theory especially philosophy linguistics cognitive science and communication studies in addition to argumentation The work also has practical use as it applies theory directly to familiar examples of argumentation in daily and professional life With a clear and comprehensive method for determining relevance and irrelevance it can be convincingly applied to highly significant practical problems about relevance including those in legal and political argumentation

Topical Relevance in Argumentation Douglas Walton, 1982-01-01 It is a longstanding if not altogether coherent tradition of logic and rhetorical studies that an argument can be incorrect or

fallacious in virtue of some proposition in it being irrelevant This monograph clarifies that tradition Non classical propositional calculi including relevance logics and relatedness logics are juxtaposed against conversational criticisms of irrelevance in natural argumentation e g in parliamentary debates The object is to see if there is a reasonable way of evaluating criticisms like That s beside the point or That s irrelevant

Fallacies Hans V. Hansen, Robert C. Pinto, 2010-11 Since 1970 when Charles Hamblin issued a challenge for philosophers logicians and educators in general to begin work anew in fallacies a serious literature on fallacies has indeed developed Part of this literature deals with the theory of what fallacies are another part of it contains rigorous analyses of particular fallacies However most is still not readily accessible to the researcher teacher or student of the field As a result the best work on fallacies is not finding its way into the classroom nor is it informing the educational and intellectual experiences available to most college and university students A major purpose of this book is to make the post Hamblin work on fallacies available to a wider audience in a single convenient volume The editors have brought together for the first time the most important historical writings on fallacy theory from Aristotle to John Stuart Mill and the most recent and most important theoretical and pedagogical developments in the field since Hamblin s landmark 1970 book All but a few of the essays included are new contributions for this anthology and an extensive annotated bibliography is included for researchers and students of fallacies and fallacy theory

Cooperative Argumentation Josina M. Makau, Debian L. Marty, 2001-01-19 As the globe shrinks it is more important than ever to search for and discover ways for diverse groups to coexist peacefully This salient well researched text offers a practical guide for understanding and learning the skills and knowledge needed to participate effectively in cooperative argumentation a model for deliberative community Developing the capacity to engage meaningfully and successfully in cooperative argumentation across differences prepares individuals for ethical and effective deliberation in diverse twenty first century contexts The authors use a wide variety of examples to illustrate concrete proposals for cultivating moral abilities cognitive skills and communicative virtues

The New Dialectic Douglas N. Walton, 1998-01-01 Because developments in informal logic have been based for the most part on idealized and abstract models the tools available for argument analysis are not easily adapted to the needs of everyday argumentation In this book Douglas Walton proposes a new and practical approach to argument analysis based on his theory that different standards for argument must apply in the case of different types of dialogue By refining and extending the existing formal classifications of dialogue Walton shows that each dialogue type be it inquiry negotiation or critical discussion has its own set of goals He goes on to demonstrate that an argument can best be evaluated in terms of its contribution positive or negative to the goals of the particular dialogue it is meant to further In this way he illustrates how argument can be brought into the service of many types of dialogue and thus has valuable uses that go well beyond the mere settling of disputes and differences By reaching back to the Aristotelian roots of logic as an applied practical discipline and by formulating a new framework of rationality for evaluating arguments Douglas Walton restores a much needed balance to

argument analysis This book complements and extends his Argument Structure A Pragmatic Theory University of Toronto Press 1996 **Fundamentals of Argumentation Theory** Frans H. van Eemeren, Rob Grootendorst, Ralph H.

Johnson, Christian Plantin, Charles A. Willard, 2013-11-05 Argumentation theory is a distinctly multidisciplinary field of inquiry It draws its data assumptions and methods from disciplines as disparate as formal logic and discourse analysis linguistics and forensic science philosophy and psychology political science and education sociology and law and rhetoric and artificial intelligence This presents the growing group of interested scholars and students with a problem of access since it is even for those active in the field not common to have acquired a familiarity with relevant aspects of each discipline that enters into this multidisciplinary matrix This book offers its readers a unique comprehensive survey of the various theoretical contributions which have been made to the study of argumentation It discusses the historical works that provide the background to the field and all major approaches and trends in contemporary research Argument has been the subject of systematic inquiry for twenty five hundred years It has been graced with theories such as formal logic or the legal theory of evidence that have acquired a more or less settled provenance with regard to specific issues But there has been nothing to date that qualifies as a unified general theory of argumentation in all its richness and complexity This being so the argumentation theorist must have access to materials and methods that lie beyond his or her home subject It is precisely on this account that this volume is offered to all the constituent research communities and their students Apart from the historical sections each chapter provides an economical introduction to the problems and methods that characterize a given part of the contemporary research program Because the chapters are self contained they can be consulted in the order of a reader's interests or research requirements But there is value in reading the work in its entirety Jointly authored by the very people whose research has done much to define the current state of argumentation theory and to point the way toward more general and unified future treatments this book is an impressively authoritative contribution to the field **Manifest**

Rationality Ralph H. Johnson, 2012-11-12 This book works through some of the theoretical issues that have been accumulating in informal logic over the past 20 years At the same time it defines a core position in the theory of argument in which those issues can be further explored The underlying concern that motivates this work is the health of practice of argumentation as an important cultural artifact A further concern is for logic as a discipline Argumentative and dialectical in nature this book presupposes some awareness of the theory of argument in recent history and some familiarity with the positions that have been advanced It will be of interest to academics researchers and advanced undergraduate and graduate students in the disciplines of logic rhetoric linguistics speech communication English composition and psychology

Groundwork in the Theory of Argumentation J. Anthony Blair, 2011-10-20 J Anthony Blair is a prominent international figure in argumentation studies He is among the originators of informal logic an author of textbooks on the informal logic approach to argument analysis and evaluation and on critical thinking and a founder and editor of the journal Informal Logic

Blair is widely recognized among the leaders in the field for contributing formative ideas to the argumentation literature of the last few decades This selection of key works provides insights into the history of the field of argumentation theory and various related disciplines It illuminates the central debates and presents core ideas in four main areas Critical Thinking Informal Logic Argument Theory and Logic Dialectic and Rhetoric **Rigour and Relevance in Entrepreneurship Research, Resources and Outcomes** Eddy Laveren, Robert Blackburn, Ulla Hytti, Hans Landström, 2019 This insightful book examines the need to bridge the gap between scientific rigour in entrepreneurship research and its practical relevance to external stakeholders and demonstrates clearly how this can be achieved in practice Featuring cutting edge research Rigour and Relevance in Entrepreneurship Research Resources and Outcomes presents and evaluates current critical approaches in the field analysing their theoretical value and their relevance to policy and practice
