

Retos Para La Modernizacion Industrial De Mexico

Miguel Angel Vázquez Ruiz

Retos Para La Modernización Industrial De México:

Retos para la modernización industrial de México Guillermo Becker, 1995 A la manera de una pirámide invertida esta obra se organiza primeramente su razón de ser la indispensable aplicación en México de una política industrial que rijan paralelamente los diversos acuerdos comerciales del país con el extranjero el autor toma en cuenta el desigual grado de desarrollo de nuestro país ante sus socios y los países con quienes compite el nivel de apertura la necesidad de más exportaciones y la urgencia de nuevos empleos Por otra parte descompone el todo que conforman los distintos sectores empresariales analiza el estado por el que atraviesan estos y lo sustenta con cifras y estadísticas sumamente reveladoras **Mexico's Economic Dilemma**

James M. Cypher, Raúl Delgado Wise, 2010-07-16 Written by two leading scholars this book provides a detailed analysis of Mexico's political economy James M Cypher and Raúl Delgado Wise begin with an examination of Mexico's pivotal economic crisis of the 1980s and the consequent turn toward an export led economy later anchored by NAFTA They show how Mexico after abandoning frequently successful past practices of state led development disastrously tied its future to an unconditional reliance on foreign corporations to promote an export led growth strategy Focusing on Mexico's cheap labor export model the authors use the maquiladora sector and the auto industry as case studies of the perils of globalization the race to the bottom as capital becomes ever more international The government's unconstrained free market policies they convincingly argue have resulted in a fragmented economy marked by stagnation falling wages informal part time employment and massive migration which define daily life for all but a tiny minority **Redescubriendo la microindustria** Gonzalo Andrés Saraví, 1997-07-01

El devenir de la industrialización y de los parques industriales en México David Iglesias Piña, 2025-04-06 La descentralización industrial la política industrial la infraestructura el equipamiento y la sustentabilidad productiva son las categorías transversales abordadas en esta obra las cuales en conjunto permiten comprender el desenvolvimiento de las unidades de producción y demás agentes que interactúan para conformar redes de empresas desarrollos industriales y sistemas productivos sustentables Los sistemas productivos sustentables son considerados formas de organización flexibles que actúan de forma reticular para potenciar una serie de recursos fuerzas y capacidades en miras de crear empleos nuevos regenerar la estructura socioeconómica territorial ampliar la vitalidad de los materiales así como aminorar las externalidades negativas al ambiente y a la sociedad Esta investigación contribuye al conocimiento de los parques industriales en México en términos de sus características infraestructurales y urbanísticas constituyendo con ello una fuente para ampliar su análisis estadístico con el fin de enriquecer las perspectivas de estudio desde un enfoque sustentable como premisa vigente y urgente DOI <https://doi.org/10.52501/cc.148> **Desafíos Industriales De México: Estudios**

Sectoriales Omar Neme Castillo, 2016-02-29 En México la industria es una parte crítica para la actividad económica Continúa generando mayor valor agregado por establecimiento o por persona que cualquier otro sector La dinámica de la producción industrial se refleja en la sincronización de ciclos con el PIB Además contribuye notablemente a la generación de puestos de

trabajo y al control de la inflación debido al crecimiento de la productividad del sector. Asimismo el sector manufacturero continúa pagando salarios promedio más altos que cualquier otra actividad. La industria es la actividad más conectada con el comercio internacional poco más del 95% del intercambio total se genera en este sector y nueve de cada diez dólares exportados son de bienes manufacturados. Asimismo es el destino favorito de las inversiones extranjeras. El sector industrial es el más intensivo en tecnología e innovaciones lo que se refleja en el gasto en investigación y desarrollo acumulado. Del mismo modo las importaciones de bienes de capital de la industria son casi cinco veces mayores que las compras del sector servicios. Dada la mayor sofisticación tecnológica y de procesos la industria mexicana demanda un alto porcentaje de mano de obra calificada. Finalmente este sector se vincula considerablemente con otros sectores el 18% de la demanda intermedia industrial proviene de los otros dos sectores y el 22% de su producción se coloca en servicios y agricultura. Representa también una actividad con potencial de desarrollo para PyMES nacionales si se excluye el sector comercio seis de cada diez PyMES son manufactureras o se vincula directamente con este sector. Por lo anterior la industria manufacturera desempeña un papel vital para el futuro económico y social del país. En este libro se analizan una serie de desafíos que enfrentan de forma individual las industrias identificando los elementos para el diseño de mejores estrategias pro competitividad y potenciar los alcances hacia la sociedad.

Aspectos tecnológicos de la modernización industrial de México

Pablo Mulás del Pozo, Jesús Álvarez C., 1995. En los diez capítulos de esta obra escritos por renombrados expertos se presentan diferentes facetas de los aspectos tecnológicos en la industria mexicana su modernización y la necesidad de competitividad en mercados internacionales. Se incluyen también estudios de la preparación y motivación de los recursos humanos y las peculiaridades de la micro, pequeña y mediana industrias.
