*Official Gazette of the United States Patent and Trademark Office*, 2004 **Machines of Youth** Gary S. Cross, 2018-05-04 For American teenagers getting a driver s license has long been a watershed moment separating teens from their childish pasts as they accelerate toward the sweet sweet freedom of their futures With driver s license in hand

teens are on the road to buying and driving and maybe even crashing their first car a machine which is home to many a teenage ritual being picked up for a first date parking at a scenic overlook or blasting the radio with a gaggle of friends in tow So important is this car ride into adulthood that automobile culture has become a stand in a shortcut to what millions of Americans remember about their coming of age *Machines of Youth* traces the rise and more recently the fall of car culture among American teens In this book Gary S Cross details how an automobile obsession drove teen peer culture from the 1920s to the 1980s seducing budding adults with privacy freedom mobility and spontaneity Cross shows how the automobile redefined relationships between parents and teenage children becoming a rite of passage producing new courtship rituals and fueling the growth of numerous car subcultures Yet for teenagers today the lure of the automobile as a transition to adulthood is in decline Tinkerers are now sidelined by the advent of digital engine technology and premolded body construction while the attention of teenagers has been captured by iPhones video games and other digital technology And adults have become less tolerant of teens on the road restricting both cruising and access to drivers licenses Cars are certainly not going out of style Cross acknowledges but how upcoming generations use them may be changing He finds that while vibrant enthusiasm for them lives on cars may no longer be at the center of how American youth define themselves But for generations of Americans the modern teen experience was inextricably linked to this particularly American icon

*Street Machines* Sue Elliott,2010-12-02 Any custom automotive project begins with making choices There are choices under the hood such as which engine will match well with a certain chassis and transmission There are aesthetic choices like whether to use custom or stock wheels what paint scheme will look best and what type of interior will be comfortable as well as eye catching Each decision involves an investment of money and time Often what seems plausible in the imagination fails in execution And only after spending hours of time and thousands of dollars does it become clear that something s not right *Street Machines Classic Muscle Modern* is the ideal resource for anyone looking to build a powerful and stylish modified street machine
