Whales are the largest animals on Earth, and they are also the most mobile. They travel vast distances across the world's oceans, following seasonal migration patterns. Some whales, like the humpback, travel from the Arctic to the Antarctic. Others, like the blue whale, stay in the same area but move between feeding and breeding grounds. Whales are also known for their complex social structures and communication skills. They use a variety of sounds, including songs, to communicate with each other. Whales are also important to the marine ecosystem, as they help to regulate the food chain and contribute to the health of the ocean.

compelling memory of the place Glimpsing the intricate and ever shifting web of human connections with the Sea of Cortez the students comprehend anew their own place in the natural world suspended between past and future teetering between abundance and loss The redemption in their difficult realization is that as they find their places in a profoundly altered environment they also recognize their roles in the path ahead and ultimately come to see one another and themselves in a new light In *Telling Our Way to the Sea* Hirsh's voice resounds with compassionate humanity capturing the complex beauty of both the marine world he explores and the people he explores it with Vibrantly alive with sensitivity and nuance *Telling Our Way to the Sea* transcends its genre to become literature
