epigraphical commemoration of nostoi which played a central part in defining Greek ethnicity and crystallizing personal and communal identities This volume offers a truly interdisciplinary exploration of the concept of nostos in ancient Greek culture which draws on its contributors expertise in ancient Greek and Roman history literature archaeology and religion The chapters examine both literary and material evidence in order to achieve a better understanding of the nature of Greek settlement in the Mediterranean zone and of sometimes equivocal Greek and Roman perceptions of home displacement and returning The special problems and vocabulary of exile are explored in the long Introduction which offers an incisive yet accessible overview of the volume s key themes and sets its range of contributions clearly in context while two chapters are concerned in different ways with emotions and personal identity making use of the theoretical tool of place attachment another demonstrates that failed nostoi can be more interesting than successful examples Evidential absence can be as important and illuminating as presence and mythical women underrepresented in this regard feature extensively in several chapters which open up a range of new perspectives on nostos
