Return To Nature:

The Return of Nature John Sallis, 2016-09-30 A reflection on the urgent need for a new philosophical understanding of and relationship with nature John Sallis dismantles the traditional conception of nature in this book of imagination and the cosmos In the thought of Emerson Hegel and Schelling Sallis discerns the seeds of an understanding of nature that goes against the modern technological assault on natural things and opens a space for a revitalized approach to the world He identifies two fundamental reorientations that philosophical thought is called on to address today the turn to the elemental in nature and the turn from nature to the cosmos at large He traces the elusive course of the imagination as if coming from nowhere and describes the way in which it bears on the relation of humans to nature Sallis's account demonstrates that a renewal of our understanding of nature is one of the prime imperatives we demand from philosophy today Inspiring for anyone looking to open up their mind to the reflection on other ways to live more closely in tune with their own nature and to the nature that is around them **Phenomenological Reviews**

Inscriptions Hugh J. Silverman, 1997 Positioning itself within the Continental tradition *Inscriptions* is an interwoven set of investigations into the differences between phenomenology and structuralism and a cohesive and thoroughgoing inquiry into the contemporary status of Continental philosophy In *Inscriptions* Hugh J Silverman investigates two divergent yet related philosophical movements phenomenology from the later Husserl through Sartre and Heidegger to Merleau Ponty and structuralism from de Saussure through Levi Strauss and Lacan to Barthes This reading of the tradition culminates in an assessment of Derrida and Foucault From this foundation Silverman moves beyond structuralism and phenomenology and develops his own philosophical position in the context of semiotics hermeneutics and deconstruction A new preface by the author updates this classic text

Culture: A Drama of Nature and Person Piotr Jaroszyński, 2023-12-11 This monograph represents a rare classical philosophical approach to culture It is grounded in philosophical realism and emphasizes personalism as a true achievement of philosophical anthropology Employing the apparatus of the history of philosophy science and religion the author demonstrates the immense scope of the drama unfolding within human culture In a classical approach evaluation is inevitable with regard to various theories of culture human culture as such and all its main actors Jaroszyński's work shows that realistic study of what it means to be a human person leads to the most comprehensive understanding of culture as it is and should be

Elemental Discourses John Sallis, 2018-09-28 John Sallis's thought is oriented to two overarching tasks to bring to light the elemental in nature and to show how the imagination operates at the very center of human experience He undertakes these tasks by analyzing a broad range of phenomena including perception the body the natural world art space and the cosmos In every case Sallis develops an original form of discourse attuned to the specific phenomenon and enacts a thorough reflection on discourse itself in its relation to voice dialogue poetry and translation Sallis's systematic investigations are complemented by his extensive interpretations of canonical figures in the history of philosophy such as Plato Aristotle
