Returnig To The Song:

The Book of Musical Knowledge Arthur Elson,1915

In Search of Mila's Collected Songs. Back to the Basics

Kristin Blancke,2024-11-13 In Search of Mila's Collected Songs Back to the Basics is a comparative study of Tibetan texts with stories and songs of the great yogin and poet Milarepa written between the 12th and the 15th centuries By comparing these texts the evolution of the narratives and the songs related to the lineages in which the texts were transmitted comes to light The research leads up to the most famous Tibetan text regarding Milarepa Tsangny n Heruka's Life and Songs The Life of Milarepa and The Hundred Thousand Songs of Milarepa The analysis of the evolution in the life and song stories allows us to evaluate the iconic image of the great yogin as depicted by Tsangny n Heruka The book consists of two main parts Part One assesses the available sources classified according to the period and the lineages in which they were produced In Chapter 1 the biographies before Tsangny n are studied In Chapter 2 the specific characteristics of Tsangny n's work are highlighted as compared to the earlier works Chapter 3 considers some doctrinal aspects and their evolutions in all these works The first part ends with the conclusions drawn from the comparative study Part Two consists of translations relative to the research This part is divided into ten chapters The first one Chapter 4 is a translation of Milarepa's hitherto unstudied life story by one of his main disciples Ngendzong Tonpa Chapters 5 6 and 7 are translations of specific topics as they appear in all the different texts Milarepa's stay with his teacher Marpa the encounter between Milarepa and Gampopa and the teaching transmission of a specific meditation tradition from Milarepa to his disciple Rechungpa Chapter 8 describes interesting details found in a text by Zhij Ripa Chapter 9 compares the episode of a dying B npo in the different texts In Chapter 10 three episodes from the biographical compendium Life and Songs of the Glorious Laughing Vajra are studied and compared with Tsangny n Heruka's version Chapter 11 gives an interesting interpretation of certain features of Mila's encounters with non human beings due to the interconnections between inner winds and outer appearances Chapter 12 analyses the colophons of the most ancient Chapters in the texts regarding Mila's interactions with the Tseringma long life sisters Chapter 13 gives Mila's instructions on the intermediate states Here two different texts explaining the same instructions are compared to each other Then follows a bibliography and an appendix containing 8 Song Charts in which the chapters and the songs in all these works are localised Social Influences on Vocal Development Charles T.

Snowdon,Martine Hausberger,1997-03-20 For at least 30 years there have been close parallels between studies of birdsong development and those of the development of human language Both song and language require species specific stimulation at a sensitive period in development and subsequent practice through subsong and plastic song in birds and babbling in infant humans leading to the development of characteristic vocalisations for each species This book illustrates how social interactions during development can shape vocal learning and extend the sensitive period beyond infancy and how social companions can induce flexibility even into adulthood Social companions in a wide range of species including birds and

humans but also cetaceans and nonhuman primates play important roles in shaping vocal production as well as the comprehension and appropriate usage of vocal communication This book will be required reading for students and researchers interested in animal and human communication and its development

Homer's Traditional Art John Miles Foley, 2015-08-10 In recent decades the evidence for an oral epic tradition in ancient Greece has grown enormously along with our ever increasing awareness of worldwide oral traditions John Foley here examines the artistic implications that oral tradition holds for the understanding of the Iliad and Odyssey in order to establish a context for their original performance and modern day reception In *Homer's Traditional Art* Foley addresses three crucially interlocking areas that lead us to a fuller appreciation of the Homeric poems He first explores the reality of Homer as their actual author examining historical and comparative evidence to propose that Homer is a legendary and anthropomorphic figure rather than a real life author He next presents the poetic tradition as a specialized and highly resonant language bristling with idiomatic implication Finally he looks at Homer's overall artistic achievement showing that it is best evaluated via a poetics aimed specifically at works that emerge from oral tradition Along the way Foley offers new perspectives on such topics as characterization and personal interaction in the epics the nature of Penelope's heroism the implications of feasting and lament and the problematic ending of the Odyssey His comparative references to the South Slavic oral epic open up new vistas on Homer's language narrative patterning and identity *Homer's Traditional Art* represents a disentangling of the interwoven strands of orality textuality and verbal art It shows how we can learn to appreciate how Homer's art succeeds not in spite of the oral tradition in which it was composed but rather through its unique agency

Technological Animation in Classical Antiquity Tatiana Bur, Maria Gerolemou, Isabel Ruffell, 2024-09-24 The persistent desire to animate inanimate objects has been a recurring theme in European culture dating back to ancient Greek and Roman times *Technological Animation in Classical Antiquity* aims to establish for the first time the significance of this aspiration and its practical realization within Greek and Roman societies While certain aspects of this narrative have been explored previously this study shifts the focus to place technological animation at the forefront The sixteen chapters examine the tangible existence of such devices across various media and considers their roles in diverse contexts delving into the reciprocal relationship between technological and material realities and its influence on the concept of animation and vice versa By adopting this perspective technological animation not only provides a new understanding of the processes behind animation but also lends a fresh perspective to the animated artifact In contrast to other types of animation where the technologically animated artifact is often dismissed as a perceptual error induced for instance by rhetoric or magic this study separates technological animation from notions of rhetorical or magical skills theurgy or divine intervention Specifically it concentrates on a subset of artificial animation solely produced through technical procedures exploring how various motive forces actively contributed to giving objects agency and impacting their viewers illuminating how the material conditions of the artifacts themselves played a role in the process of technological
