Jean Thomas, 2023-01-13 This book explores the current impasse that global regulators face in the digital sphere Computer technology has advanced human civilization tenfold but the freedom to

interact with others in cyberspace has made individuals discrete communities organizations and governments more vulnerable to abuse In consequence political decision makers are seriously considering granting limited legal immunity to victims who decide to hack back Many victims frustrated by the slow pace of law enforcement in cyberspace have chosen to take the law into their own hands retaliating against those who have stolen valuable data and damaged network operations Political deliberations about limited immunity for hackbacks usually ignore global justice and moral justifications for active defense policies Typically cyber security policies balance deterrence against two different understandings of morality and the good life fairness or welfare This book proposes a third moral rationale for cyber security policies capability theory developed principally by Amartya Sen and Martha Nussbaum Properly formulated a capability based defense of retaliatory hackbacks can minimize attribution and cyber escalation risks deter bad behavior by casual computer users disingenuous security experts big tech companies criminals and rogue governments and satisfy calls for more retributive and distributive justice in the open world This book will appeal to legal theorists political philosophers social activists investors international relations scholars and businesspeople in the tech community

**Choosing and Using Fiction and Non-Fiction 3-11** Margaret Mallett,2010-07-02 Winner of

the United Kingdom Literacy Association's Author Award 2011 for its contribution to extending children's literacy. Praise for the book: This book is about making readers. A compact summary of its contents would not do it justice. It is the account of a life's work and it deserves thanks and readers. Margaret Meek, Books for Keeps online, Number 185, November 2010. This book is a cornucopia of varied pleasures offering something for all tastes presented with an awareness of the complexities of the field and communicated with commitment, enthusiasm and deep knowledge. Eve Bearne, English 4.11, the primary school journal of The English Association, Number 42, Summer 2011. Choosing and Using Fiction and Non Fiction 3.11 is a guide to the many kinds of text we want children to encounter, use and enjoy during their nursery and primary school years. So children's non-fiction literature including autobiography, biography, information and reference texts is given equal status with fiction, nursery rhymes, picture books, novels, traditional tales, playscripts and poetry. The author addresses important issues and allows the voices of teachers, reviewers and children to be heard. The book supports teachers as they help children on their journey to becoming insightful and critical readers of non-fiction and sensitive and reflective readers of fiction. It also contains suggestions for practice which are in the spirit of the more flexible and creative approach to learning towards which primary schools are moving. It includes help on using criteria to select quality texts, of all kinds, annotated booklists for each kind of text for different age groups, suggestions for keeping a balance between print and screen-based texts, case studies showing teachers and children using texts in interesting and imaginative ways to support learning in English lessons and across the curriculum, advice on developing children's visual and multimodal literacy, guidance on using the school library and embedding study skills in children's wider purposes and learning, critiques of key theoretical perspectives and research projects. Although the main readership will be primary and student teachers, it is hoped that the book will be of interest and use to anyone concerned with the role of texts in children's learning.

**The Oxford Handbook of Cyberpsychology** Alison Attrill-Smith, Chris Fullwood, Melanie Keep, Daria J. Kuss, 2019-05-16. The internet is so central to everyday life that it is impossible to contemplate life without it. From finding romance to conducting business, receiving health advice, shopping, banking and gaming, the internet opens up a world of possibilities to people across the globe. Yet for all its positive attributes, it is also an environment where we witness the very worst of human behaviour: cybercrime, election interference, fake news and trolling, being just a few examples. What is it about this unique environment that can make people behave in ways they wouldn't contemplate in real life? Understanding the psychological processes underlying and influencing the thinking, interpretation and behaviour associated with this online interconnectivity is the core premise of Cyberpsychology. The Oxford Handbook of Cyberpsychology explores a wide range of cyberpsychological processes and activities through the research and writings of some of the world's leading cyberpsychology experts. The book is divided into eight sections covering topics as varied as online research methods, self-presentation and impression management, technology across the lifespan, interaction and interactivity, online groups and communities, social media, health and technology, video gaming and cybercrime, and

cybersecurity The Oxford Handbook of Cyberpsychology will be important reading for those who have only recently discovered the discipline as well as more seasoned cyberpsychology researchers and teachers
