

## SEPARATIST SHIPS

What very convenient details millions of Separatist warships in the Outer Rim, a few dozen battleships lined thousands of destroyers and frigates in a bold strike on the galactic capital Coruscant. These light warships, bristling with small laser cannons and impressive, mounted cannons, were pledged to Core Worlds by the governments of hundreds of aggressively independent star sectors. As the craft are largely controlled by automated droid-brain technology, little crew space is required. This gives the ships a sinister, skeletal appearance. Destroyers and frigates are not equipped with hangars or ground attack arms but carry enough security droids for boarding actions. They can also act as "tanks" for Separatist warfighters, providing protection inside their spacious hull cavities. If the vessels' defense shields fail, however, their hollow hulls can make them vulnerable targets for Lambda defenders.
