Handbook of Emotions Lisa Feldman Barrett, Michael Lewis, Jeannette M. Haviland-Jones, 2016-07-12 Recognized as the definitive reference this handbook brings together leading experts from multiple psychological subdisciplines to examine one of today's most dynamic areas of research. Coverage encompasses the biological and neuroscientific underpinnings of emotions as well as developmental, social, and personality, cognitive, and clinical perspectives. The volume probes how people understand, experience, express, and perceive affective phenomena and explores connections to behavior and health across the lifespan. Concluding chapters present cutting-edge work on a range of specific emotions. Illustrations include 10 color plates. New to This Edition: Chapters on the mechanisms, processes, and influences that contribute to emotions such as genetics, the brain, neuroendocrine processes, language, the senses of taste and smell; Chapters on emotion in adolescence and older age and in neurodegenerative dementias; Chapters on facial expressions and emotional body language; Chapters on stress, health, gratitude, love, and empathy. Many new authors and topics extensively revised with the latest theoretical and methodological innovations. A Choice Outstanding Academic Title. **Academic Assessment and Intervention** Steven Little, Angeleque Akin-Little, 2014-01-21 Serving students with academic deficiencies necessitates communication and collaboration among professionals from several disciplines. *Academic Assessment and Intervention* brings together divergent approaches in order to demonstrate that scientific evidence rather than biases or previous practice must determine assessment practices that are selected and used for particular purposes. Similar to a handbook in its comprehensive topical coverage, this edited collection provides a contextual foundation for academic assessment and intervention, describes both norm-referenced and curriculum-based assessment measurement in detail, considers the implications of both of these assessments on ethnically diverse populations, provides a clear link between assessment evidence-based interventions and the RTI model, and considers other important topics related to this area such as teacher behavior. Intended primarily for graduate-level courses in education, school psychology, or child clinical psychology, it will also be of interest to practicing professionals in these fields. **Reading Achievement and Motivation in Boys and Girls** Pelusa Orellana García, Paula Baldwin Lind, 2018-05-02 This volume links theoretical and instructional approaches on how reading is motivated and assessed and examines the interrelationship between reading motivation and achievement among boys and girls in culturally and geographically different settings. Much of the research on children's reading has focused on cognitive processes; however, reading is an activity that also requires interest and motivation. These attitudes are generally defined as readers' affect toward reading, and their consequence is that children with more positive attitudes are more motivated to read. Taking into account the variability that exists within the notion of gender and age, this volume aims to examine and scrutinize previous

research on the topic as well as test theories on how the different dimensions of reading motivation vary with gender in relation to cultural issues motivational constructs such as engagement and classroom climate the role of emotions interests and attitudes towards reading among others The book will be of interest to researchers educators graduate students and other professionals working in the area of literacy reading motivation reading achievement and gender differences
