CHAPTER I INTRODUCTION TO PERSONALITY THEORY

I. What Is Personality?

- Latin word: persona = the mask people wear or the role they play in life. (But its more than just a façade)
- a pattern of relatively **permanent traits and unique characteristics** that give both consistency and individuality to human behavior
- **Traits:** it may be unique, common to some group, or shared by the entire species BUT the pattern is different for each individual (*consistency & stability of behavior over time*)
- **Characteristics:** unique qualities of an individual that include such attributes as temperament, physique and intelligence

II. What is a Theory?

A. Theory Defined

- Set of related assumptions that allows scientists to use logical deductive reasoning to formulate testable hypotheses
- **Set:** A single assumption can never fill all the requirements of a good theory
- **Related:** Isolated assumptions can neither generate meaningful hypotheses nor possess internal consistency
- **Assumptions:** not proven facts but accepted as if they were true
- **Logical Deductive Reasoning:** to deduce a clearly stated hypothesis
- **Testable:** must suggest the possibility that scientists

B. Theory and Its Relatives

- Philosophy. Theory is related to philosophy, but it is a much narrower term.
- Speculation. Theories rely on speculation, but they are much more than mere armchair speculation.
- Hypothesis. Although theory is a narrower concept than philosophy, it is a broader term than hypothesis.
- Taxonomy. Mere classification does not constitute a theory. However, taxonomies can evolve into theories when they begin to generate testable hypotheses and to explain research findings.
- Relationship between theory and science. Theories are useful tools employed by scientists to give meaning and organization to observations. In addition, theories provide fertile ground for producing testable hypotheses.

C. Why Different Theories?

- Theories are built not on proven facts but on **assumptions** (assumed to be true) that are subject to individual interpretations
- Reflection of their personal background, their philosophical orientation, and the data they chose to observe
- Its usefulness depends on its ability to generate research and to explain research data and other observations
