Memorial Tributes National Academy of Engineering, 2013-01-28 This is the 16th Volume in the series Memorial Tributes compiled by the National Academy of Engineering as a personal remembrance of the lives and outstanding achievements of its members and foreign associates These volumes are intended to stand as an enduring record of the many contributions of engineers and engineering to the benefit of humankind In most cases the authors of the tributes are contemporaries or colleagues who had personal knowledge of the interests and the engineering accomplishments of the deceased Through its members and foreign

associates the Academy carries out the responsibilities for which it was established in 1964 Under the charter of the National Academy of Sciences the National Academy of Engineering was formed as a parallel organization of outstanding engineers Members are elected on the basis of significant contributions to engineering theory and practice and to the literature of engineering or on the basis of demonstrated unusual accomplishments in the pioneering of new and developing fields of technology The National Academies share a responsibility to advise the federal government on matters of science and technology The expertise and credibility that the National Academy of Engineering brings to that task stem directly from the abilities interests and achievements of our members and foreign associates our colleagues and friends whose special gifts we remember in this book

Advanced Research Instrumentation and Facilities Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Committee on Science, Engineering, and Public Policy, Committee on Advanced Research Instrumentation, 2007-01-28 In recent years the instrumentation needs of the nation's research communities have changed and expanded The need for particular instruments has become broader crossing scientific and engineering disciplines The growth of interdisciplinary research that focuses on problems defined outside the boundaries of individual disciplines demands more instrumentation Instruments that were once of interest only to specialists are now required by a wide array of scientists to solve critical research problems The need for entirely new types of instruments such as distributed networks cyber tools and sensor arrays is increasing Researchers are increasingly dependent on advanced instruments that require highly specialized knowledge and training for their proper operation and use The National Academies Committee on Science Engineering and Public Policy Committee on Advanced Research Instrumentation was asked to describe the current programs and policies of the major federal research agencies for advanced research instrumentation the current status of advanced mid sized research instrumentation on university campuses and the challenges faced by each The committee was then asked to evaluate the utility of existing federal programs and to determine the need for and if applicable the potential components of an interagency program for advanced research instrumentation

Fostering Visions for the Future National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Committee to Review the NASA Institute for Advanced Concepts, 2009-10-21 The NASA Institute for Advanced Concepts NIAC was formed in 1998 to provide an independent source of advanced aeronautical and space concepts that could dramatically impact how NASA develops and conducts its missions Until the program's termination in August 2007 NIAC provided an independent open forum a high level point of entry to NASA for an external community of innovators and an external capability for analysis and definition of advanced aeronautics and space concepts to complement the advanced concept activities conducted within NASA Throughout its 9 year existence NIAC inspired an atmosphere for innovation that stretched the imagination and encouraged creativity As requested by Congress this volume reviews the effectiveness of NIAC and makes recommendations concerning the importance of such a program to NASA and to the nation as a whole including the proper

role of NASA and the federal government in fostering scientific innovation and creativity and in developing advanced concepts for future systems Key findings and recommendations include that in order to achieve its mission NASA must have and is currently lacking a mechanism to investigate visionary far reaching advanced concepts Therefore a NIAC like entity should be reestablished to fill this gap *Fiscal Year 2001 NASA Authorization* United States.
